Full-Spectrum Thinking Bob Johansen,2020-03-20 Leading futurist Bob Johansen shows how a new way of thinking enhanced by new technologies will help leaders break free of limiting labels and see new gradients of possibility in a chaotic world The future will get even more perplexing over the next decade and we are not ready The dilemma is that we are restricted by rigid categorical thinking that freezes people and organizations in neatly defined boxes that often are inaccurate or obsolete Categories lead us toward certainty but away from clarity and categorical thinking moves us away from understanding the bigger picture Sticking with this old way of thinking and seeing isn't just foolish it's dangerous Full spectrum thinking is the ability to seek patterns and clarity outside across beyond or maybe even without any boxes or categories while resisting false certainty and simplistic binary choices It reveals our commonalities that are hidden in plain view Bob Johansen lays out the core concepts of full spectrum thinking and reveals the role that digital media including gameful engagement big data analytics visualization blockchain and machine learning will play in facilitating and enhancing it He offers examples of broader spectrums and new applications in a wide range of areas that will become possible first then mandatory This visionary book provides powerful ways to make sense of new opportunities and see the world as it really is
