argues that realization of the fact that all entities in the world are illuminated by the same Universal Spirit is also necessary. While the book emphasizes the external environmental woes of the world such as deforestation, animal cruelty, pollution, climate change, and more, it also underscores that these are merely manifestations of humans' internal perverted environmental states. Thus, humankind should not look at external issues that are limited and temporary but should focus on the longer-lasting internal transformation.

Expanding Environmental Awareness in Education Through the Arts Biljana C. Fredriksen, Camilla Groth, 2022-11-25. This book presents diverse processes of crafting that bring humans more than humans and the environment closer to one another and by doing so addresses personal and educational developments towards ecological awareness. It discusses the human-material relationship, introduces posthuman theoretical entry points, and reflects on the implementation of such theoretical perspectives in education. The practical examples of crafting with the environment, the material practices, and reflections posed in the book provide insights into possible ways of levelling out human and material hierarchies. The chapters of this book give examples of artists and craftspeople's processes of thinking through materials and with materials but also their reflections on how more than humans, animals, and plants craft from available materials and how the environment and landscapes re-craft themselves through tedious processes of transformation. These case examples are founded on the authors' own experiences with phenomena they are trying to understand and critically explore. This book is of interest to professional creative practitioners, art and craft educators, art teacher educators, or researchers in the field of creative practices. It has power to inspire rethinking of present educational practices, to ignite critical reflections about materials and more than humans, and hopefully motivate transformations toward more ecologically sustainable ways of life.

Environmental Debates in Albania Deniz Çupi, 2023-09-30. This book investigates the role played by classical and digital media and social networks in shaping debates on the environment. Providing a unique window of observation on environmental debates, the book explores the media theatre from the post-communist perspective of Albania. The work navigates the creation and development of environmental debate in Albania using evidence-based case studies investigating the role of actors involved who are closely related to the media, such as in business or politics. *Environmental Debates in Albania* offers an original insight on environmental debate which is closely tied to and influenced by the place and culture within which it originates. Rich literature exists on global environmental issues, protests, policy, and the rhetoric around climate change; this book supplies another piece to the puzzle through its focus on the under-researched area of environmental debate in post-communist and Eastern European countries.
