Shaping Space Marjorie Senechal, George M. Fleck, 1988 **Light: The Shape of Space** Lou Michel, 1995-10-27 *Light The Shape of Space* Designing with Space and Light Lou Michel Every design professional who touches a space shapes the light and the feeling of that space Architect lighting engineer interior designer lighting or home furnishing manufacturer each contributes an aesthetic layer sometimes yielding unexpected results All too often the best laid plans of one professional are unintentionally subverted by another Removing surprises and guess work from design Lou Michel honored architectural lighting educator has created *Light The Shape of Space* showing how to design with the effects of light rather than light itself The book is a revolutionary resource for all design professionals and manufacturers of surfacing materials Drawing on over fifteen years experience of research and teaching in the architectural Space and Light Laboratory at The University of Kansas Michel masterfully examines the interrelationship of lighting and the design of architectural space as perceived not in architectural photos or paint chips and fabric swatches but by human vision the gateway to emotional response The book was written for professionals who care about how people feel in the spaces they design and focuses on the humanization of

architecture Taking a non stylistic approach to design Michel analyzes architecture from the perspective of how the users see their surroundings as they move through space The reader will learn what pleases and what disturbs people based on how the human visual system responds to color texture pattern and brightness The book features principles of design for the student and professional and is generously supported by illustrations and research Michel also provides a method for evaluating the visual effectiveness of building materials and lighting systems including those that will appear on the market long after this book is dog eared Michel unveils a groundbreaking luminance brightness rating system LBR and a nine zone brightness scale to aid designers in previsualizing the appearance of surfacing materials at every stage of the design process from schematics to development to refinement Among the topics treated are the interaction of lighting and spatial design color theory for space and light the luminance relationships between free standing objects and the surrounding spatial boundaries against which they are seen the appearance of building materials in color and brightness when modified by light and spatial location lighting spatial connections including the perception of rooms adjacent to the observer lighting and perception of spaces screened by architectural grilles creating lighted space Designing with the effects of light is both an art and a science No other book on the market bridges that gap as successfully as Light The Shape of Space Eloquent Spaces Shonaleeka Kaul,2019-04-25 Eloquent Spaces adopts the twin analytic of meaning and community to write a fresh history of building in early India It presents a new perspective on the principles and practices of early Indian architecture Defining it broadly over a range of space uses the book argues for architecture as a form of cultural production as well as public consumption Ten chapters by leading archaeologists architects historians and philosophers examining different architectural sites and landscapes including Sanchi Moodabidri Srinagar Chidambaram Patan Konark Basgo and Puri demonstrate the need to look beyond the built form to its spirit beyond aesthetics to cognition and thereby to integrating architecture with its myriad living contexts The volume captures some of the semantic diversity inherent in premodern Indian traditions of civic building both sacred and secular which were however unified in their insistence on enacting meaning and a transcendent validity over and above utility and beauty of form The book is a quest for a culturally rooted architecture as an alternative to the growing crisis of disembeddedness that informs modern praxis This volume will be of interest to scholars and practitioners of architecture ancient Indian history philosophy art history and cultural studies **Planting Design** Patrick Mooney,2019-10-30 Landscape designers have long understood the use of plants to provide beauty aesthetic pleasure and visual stimulation while supporting a broad range of functional goals However the potential for plants in the landscape to elicit human involvement and provide mental stimulation and restoration is much less well understood This book meshes the art of planting design with an understanding of how humans respond to natural environments Beginning with an understanding of human needs preferences and responses to landscape the author interprets the ways in which an understanding of the human environment interaction can inform planting design Many of the principles and techniques that

may be used in planting design are beautifully illustrated in full colour with examples by leading landscape architects and designers from the United Kingdom Europe North America and Asia including Andrea Cochran Andrea Cochran Landscape Architecture San Francisco CA Design Workshop Inc Richard Hartlage Land Morphology Seattle WA Shunmyo Masuno Japan Landscape Consultants Ltd Yokohama Piet Oudolf Hummelo The Netherlands Melody Redekop Vancouver Christine Ten Eyck Ten Eyck Landscape Architects Inc Austin TX Kongjian Yu Turenscape Ltd Beijing The book stimulates thought provides new direction and assists the reader to find their own unique design voice Because there are many valid processes and intentions for landscape design the book is not intended to be overly prescriptive Rather than presenting a strict design method and accompanying set of rules Planting Design provides information insight and inspiration as a basis for developing the individual designer s own expression in this most challenging of art forms

dichotomy On a national level post war West Germany demonstratively rejected Nazi era values by rebuilding cities based on interwar modernist tenets while choosing a decidedly modern and transparent architecture for high visibility national projects In the domestic realm government media and everyday citizens countered this turn to state sponsored modernism by embracing traditional architectural aesthetics and housing that encouraged patriarchal family structures Written for readers interested in cultural theory history and the politics of space as well as those engaged with architecture and the built environment *Conflicted Identities* provides an engaging new perspective on power and identity as they relate to architectural settings
