

A Celebration of Life for  
**Hannah Erickson-Diehl**  
will be held

October 5th at 1 PM at the I BAR Ranch  
Service followed by food and drink to celebrate her  
life between friends and family.

*Her Story*

It is with deep sadness we announce the untimely passing of  
Hannah Erickson-Diehl on 9-26-24 in Gunnison, Colorado.

Hannah was born on April 18th, 1995 in Colorado Springs, Colorado. Life brought her to Gunnison in the fall of 2013 to attend college where she excelled in Track and Field and studied Biology. Her outgoing nature led her to her husband Andrew Diehl. Together, their desire to help their community inspired them both to join the Law Enforcement profession. Hannah enjoyed being an outdoor adventures, and was a lover of animals, arts and crafts, flowers...especially sunflowers... dinosaurs and exercise. They experienced their greatest joy on September 10th, 2024 with the birth of their first child, a beautiful baby girl, Eleanor Mae. As Andrew & Hannah were preparing for their first nature walk, Hannah collapsed and passed away shortly after. Hannah is survived by her Husband Andrew, baby Daughter Eleanor, Mother, Father, Sister Two Brothers, Nephew and extended family.

Her memory will live on in everyone who knew her and their responsibility to her memory, will be to share their memories of Hannah with Eleanor as she grows, so she may too, know the mother she will forever miss.

A First Responder's procession will be departing from Cross Fit in Gunnison to Hwy 50 and then to the I-BAR Ranch. Please take a few minutes to observe the passing at some point on the route if you are able.

Hannah loved sunflowers. We encourage anyone planning on attending to wear jeans and a YELLOW shirt

## Share The Tragedy:

*Making an Entrance* Juliane Vogel,2022-10-03 How does the entrance of a character on the tragic stage affect their visibility and presence Beginning with the court culture of the seventeenth century and ending with Nietzsche s Dionysian theater this monograph explores specific modes of entering the stage and the conditions that make them successful or cause them to fail The study argues that tragic entrances ultimately always remain incomplete that the step figures take into visibility invariably remains precarious Through close readings of texts by Racine Goethe and Kleist among others it shows that entrances promise both triumph and tragic exposure though they appear to be expressions of sovereignty they are always simultaneously threatened by failure or annihilation With this analysis the book thus opens up possibilities for a new theory of dramatic form one that begins not with the plot itself but with the stage entrance that structures how characters appear and thus determines how the plot advances By reflecting on acts of entering this book addresses not only scholars of literature theater media and art but anyone concerned with what it means to appear and be present Sharing Responsibility Larry May,1996-06 Are individuals responsible for the consequences of actions taken by their community What about their community s inaction or its attitudes In this innovative book Larry May departs from the traditional Western view that moral responsibility is limited to the consequences of overt individual action Drawing on the insights of Arendt Jaspers and Sartre he argues that even when individuals are not direct participants they share responsibility for various harms perpetrated by their communities *The Business of Sharing* Alex Stephany,2015-03-09 Providing a colorful insight into the people at the forefront of the emergent Sharing Economy a movement predicted to already be worth around 26B a year this book gives vital advice to anyone thinking of starting or investing in a collaborative consumption business The first of its kind written by an author on the forefront of this new trend **History of Manistee, Mason and Oceana Counties, Michigan ...** ,1882 Sharing Matthew David,2017-09-05 Today s economic system premised on the sale of physical goods does not fit the information age in which we live The capitalist order requires the maintenance of an artificial scarcity in goods that have the potential for near infinite and almost free replication The sharing of informational goods through distributed global networks digital libraries file sharing live streaming free software free access publishing the free sharing of scientific knowledge and open source pharmaceuticals not only challenges the dominance of a scarcity based economic system but also enables a more efficient innovative just and free culture In a series of seven explorations of contemporary sharing Matthew David shows that in each case sharing surpasses markets private ownership and intellectual property rights in fostering motivation creativity innovation production distribution and reward In transforming the idea of an information economy into an information society sharing connects struggles against inequality and poverty in developed and developing countries Challenging taken for granted justifications of the status quo Sharing debunks the tragedy of the commons and makes the case for digital network sharing as a viable mode of economic counterpower prefiguring a post capitalist society

**Herder's Philosophy** Michael N. Forster, 2018-08-16 Johann Gottfried Herder 1744 1803 is a towering figure in modern thought but one who has hitherto been severely underappreciated Michael Forster seeks to rectify that situation He considers Herder's philosophy in the round and argues that it is both far more impressive in quality and far more influential in modern thought than has previously been realized After an introduction on Herder's intellectual biography philosophical style and general program in philosophy there are chapters on his philosophy of language his hermeneutics his theory of translation his contribution of the philosophical foundations for both linguistics and cultural anthropology his philosophy of mind his aesthetics his moral philosophy his philosophy of history his political philosophy his philosophy of religion and his intellectual influence Forster argues that Herder contributed vitally important ideas in all of these areas that in many of them his ideas were seminal for major subsequent philosophers including Friedrich Schlegel Schleiermacher Wilhelm von Humboldt Hegel and Nietzsche that they indeed founded whole new disciplines such as linguistics anthropology and comparative literature and that moreover they were in many cases even better than what these subsequent thinkers and disciplines went on to make of them

**Muthos** Loren D. Marsh, 2021-04-12 This book presents a new analysis of Aristotle's concept of narrative in the Poetics Arguing that the term muthos in the Poetics cannot be understood as equivalent to plot Marsh shows that the muthos concept is instead a useful tool for grouping larger sets of narratives based on specific criteria The results of this muthos analysis indicate that in the classical period neither formal structure nor the structure of events was determined by theatrical genre but by the specific combination of tone and plot type Marsh concludes that the category of genre itself may be less helpful for classifying these plays than is typically assumed

**The Sentimental Education of the Novel** Margaret Cohen, 2018-06-05 The nineteenth century French novel has long been seen as the heroic production of great men who confronted in their works the social consequences of the French Revolution And it is true that French realism especially as developed by Balzac and Stendhal was one of the most influential novelistic forms ever invented Margaret Cohen however challenges the traditional account of the genesis of realism by returning Balzac and Stendhal to the forgotten novelistic contexts of their time Reconstructing a key formative period for the novel she shows how realist codes emerged in a hostile take over of a prestigious contemporary sentimental practice of the novel which was almost completely dominated by women writers Cohen draws on impressive archival research resurrecting scores of forgotten nineteenth century novels to demonstrate that the codes most closely identified with realism were actually the invention of sentimentality a powerful aesthetic of emerging liberal democratic society although Balzac and Stendhal trivialized sentimental works by associating them with frivolous women writers and readers Attention to these gendered struggles over genre explains why women were not pioneers of realism in France during the nineteenth century a situation that contrasts with England where women writers played a formative role in inventing the modern realist novel Cohen argues that to understand how literary codes respond to material factors it is imperative to see how such factors take shape within the literary field as well as within society as a

whole The book also proposes that attention to literature as a social institution will help critics resolve the current vital question of how to practice literary history in the wake of poststructuralism *Tragedy's End* Francis M. Dunn,1996-07-25 Euripides is a notoriously problematic and controversial playwright whose innovations according to Nietzsche brought Greek tragedy to an early death Dunn here argues that the infamous and artificial endings in Euripides deny the viewer access to a stable or authoritative reading of the play while innovations in plot and ending opened tragedy up to a medley of comic parodic and narrative impulses Part One explores the dramatic and metadramatic uses of novel closing gestures such as aetiology closing prophecy exit lines of the chorus and deus ex machina Part Two shows how experimentation in plot and ending reinforce one another in *Hippolytus Trojan Women and Heracles* Part Three argues that in three late plays *Helen Orestes and Phoenician Women* Euripides devises radically new and untragic ways of representing and understanding human experience *Tragedy's End* is the first comprehensive study of closure in classical literature and will be of interest to a range of students and scholars *A Tragic Vision* Ann M. *A Stage for Debate* Martin Wagner,2023-05-26 A Stage for Debate presents a detailed analysis of the repertoire of the leading German language stage of the nineteenth century Vienna s Burgtheater The book explores the extent to which the Burgtheater repertoire contributed to important political and cultural debates on individual liberty the role of women in society and the understanding of national and regional identity The relevance of the Burgtheater as a forum for political debate is assessed not by the degree to which the performed plays transgressed established norms but by the range of positions that were voiced on a given topic Martin Wagner investigates the roughly 1 000 plays from across Europe that were introduced to the Burgtheater s repertoire between 1814 and 1867 by combining a general overview with detailed interpretations of especially successful plays Wagner reveals that the Burgtheater was significantly more involved in contemporary debates than the stereotype of this stage as an artistically refined but apolitical institution suggests Drawing from theatre studies and German and Austrian studies more broadly A Stage for Debate revises the history of one of Europe s leading theatres

*Governing Agrobiodiversity* Regine Andersen,2016-04-22 Plant genetic diversity is crucial to the breeding of food crops and is therefore a central precondition for food security Diverse genetic resources provide the genetic traits required to deal with crop pests and diseases as well as changing climate conditions Plant genetic diversity is also essential for traditional small scale farming and is therefore an indispensable factor in the fight against poverty However the diversity of domesticated plant varieties is disappearing at an alarming rate while interest in the commercial use of genetic resources has increased in line with biotechnologies followed by demands for intellectual property rights This important book contributes to our understanding of how international regimes affect the management of plant genetic resources for food and agriculture in developing countries It identifies entry points to shape a better governance of agrobiodiversity and provides the first comprehensive analysis of how the international agreements pertaining to crop genetic resources affect the management of these vital resources for food security and poverty eradication in developing countries
