Generation Share brings to life the phenomenon causing the most significant shift in society since the Industrial Revolution **Sharing Democracy** Michael L. Ferguson, 2012-10-18
Democratic theorists frequently assume that the people must have something in common or else democracy will fail This produces an ironically anti democratic tendency to emphasize the passive possession of commonality
Sharing Democracy counters this tendency with a radical vision of democracy grounded instead in the active exercise of political freedom **Documentarity** Ronald E. Day, 2019-10-01
A historical conceptual account of the different genres technologies modes of inscription and innate powers of expression by which something becomes evident In this book Ronald Day offers a historical conceptual account of how something becomes evident
Crossing philosophical ontology with documentary ontology Day investigates the different genres technologies modes of inscription and innate powers of expression by which something comes into presence and makes itself evident He calls this philosophy of evidence documentarity and it is through this theoretical lens that he examines documentary evidence and documentation within the tradition of Western philosophy largely understood as representational in its epistemology ontology aesthetics and politics
Day discusses the expression of beings or entities as evidence of what exists through a range of categories and modes from Plato s notion that ideas are universal types expressed in evidential particulars to the representation of powerful particulars in social media and machine learning algorithms He considers among other topics the contrast between positivist and anthropological documentation traditions the ontological and epistemological importance of the documentary index the nineteenth century French novel s documentary realism and the avant garde s critique of representation performative literary genres expression as a form of self evidence and the post documentation technologies of social media and machine learning described as a posteriori real time technologies of documentation
Ultimately the representational means are not only information and knowledge technologies but technologies of judgment judging entities both descriptively and prescriptively Manual for Living Seth David Chernoff, 2010-06-07
