Introduction to Rhetorical Theory Gerard A. Hauser, 2002-02-08 In this highly accessible new edition Hauser systematically provides a humanistic account of what transpires when people communicate for some purpose. His masterful blend of classical and contemporary thinking about the use of language and the value of symbolic inducements for social cooperation illuminates fundamental rhetorical precepts and their implications for shaping human realities. The new chapter on public theory complements the four chapters that introduce the broad themes and issues essential for a rhetorical approach to communication. The new chapter on narrative theory bridges the four chapters devoted to the content of rhetoric and the concluding chapters that emphasize symbolic processes by which humans induce social cooperation and constitute social reality. Throughout the text Hauser skillfully underscores the power of language to present a particular reality. He explores the fundamental relationship between public discourse and judgment, helping students understand the core of rhetoric's civic function. Through relevant current examples he illustrates how knowledge and power shape our social and political practices and how both are formed through discourse. Social Control and Socialization Jenny

Cook-Gumperz, 2025-05-09 Basil Bernstein's theory of social control was the foundation for this pioneer study of the language mothers use to socialize their children and how it affects their understanding of social values and social attitudes as they grow older. Originally published in 1973, Dr. Cook-Gumperz's research was particularly important in that it made use of analytical methods which could measure numerically the manifestations of the three kinds of control: imperative, positional, and personal that Bernstein distinguished. Using the coding grid developed by Professor Bernstein and herself, Jenny Cook-Gumperz demonstrates clearly the relations between maternal class, maternal approach to discipline, and the child's progress. By showing that the effects of early upbringing on the educational potential of children were measurable, this significant work in the comparatively new field of sociolinguistics would form a basis for the methodological approach to further practical investigations of a similar nature at the time. Today it can be read in its historical context. Introduction to Communication

Course Book 1 S. Steinberg, 1995 Introduces history and basics of human communication, covering the communication process, functions of communication, language and communication, non-verbal communication, interpersonal communication, listening, public speaking, and mass communication. **Speech Communication** Gordon I. Zimmerman, 1986
