Road Traffic Analysis, Theoretical

Approaches and Practical Solutions Elżbieta Macioszek, Irena Jurdana, Grzegorz Sierpiński, 2024-01-10 This book presents many valuable tips for making decisions related to road traffic in transport networks. The knowledge base in practical examples as well as the decision support systems described in this volume finds interest among people who face the daily challenge of searching for advanced solutions and practical applications in road traffic engineering. The publication is therefore addressed to local authorities related to the planning and development of development strategies for selected areas with regard to transport both in the urban and regional dimension and to representatives of business and industry as people directly involved in the implementation of traffic engineering solutions. The tips contained in individual sections of the publication allow to look at a given problem in an advanced way and facilitate the selection of the appropriate strategy among others in relation to the heuristic approach to assessing the performance efficiency of road intersections in urban environments from the resilience perspective, modeling the distribution of transport pollutants in a naturally ventilated road tunnel, development of a camera based parking monitoring system with an automatic parking spot identification. In turn, due to a new approach to theoretical models including inter alia problems with the safety of passengers at tram stops or energy efficient radio platforms for the implementation of nodes of sensor networks, the publication also interests scientists and researchers carrying out research in this area. The publication entitled **Road Traffic Analysis Theoretical Approaches and Practical Solutions** contains selected papers submitted to and presented at the 19th Transport Systems Theory and Practice Scientific and Technical Conference organized by the Department of Transport Systems Traffic Engineering and Logistics at the Faculty of Transport and Aviation Engineering at the Silesian University of Technology. The conference took place on September 18-19, 2023 in Katowice, Poland. **Environmental Sociology** Leslie King, Deborah McCarthy
