The Project Management Paradigm Ken Burnett, 2012-12-06 Introduction The changing business environment of global operations mergers decentralization increased competition pressure on budgets etc has contributed to a positive change in the workplace As this change continues we must keep up to date and follow good standards principles and practices To help we present the Paradigm of Project Management which is based on a simple practical approach to managing projects The method is flexible and may be applied to any project although in this book we concentrate on the development of systems However it also illustrates that the formation and management of project teams are changing in line with technology As Dr Tom Peters says Stability and predictability are gone forever For example project teams may work from home telework using email and groupware along electronic highways Therefore instead of going through a pyramid of people to reach an executive one can use the Internet an intranet or an extranet and go direct Another change is represented by the transient teams and Get it Done working approaches An example of how a global project was managed is one in which Malaysia s International Shipping Corporation MISC implemented MISC Net a networking project to link online all of its shipping agents worldwide to its HQ in Malaysia Project management was a key component in the solution prior to awarding the contract IBM and MISC worked on the International Project Management System
