their exceptional characteristics this book aims to break through the barrier of prejudice and to pay homage to their true nature. Representing a last vestige of wildness, their populations are nevertheless under threat like so many species; they have been hunted and exploited by humans. Sarano argues for a change of mindset in which we lose ourselves in the world of the other so that each living entity, human and non-human, can take their rightful place in the broader global ecosystem. Brute Force Dominic Lennard, 2019-11-01. It's always been a wild world with humans telling stories of killer animals as soon as they could tell stories at all. Movies are an especially popular vehicle for our fascination with fierce creatures. In *Brute Force*, Dominic Lennard takes a close look at a range of cinematic animal attackers including killer gorillas, sharks, snakes, bears, wolves, spiders and even a few dinosaurs. Lennard argues that animal horror is not so much a focused genre as it is an impulse tapping into age-old fears of becoming prey. At the same time, these films expose conflicts and uncertainties in our current relationship with animals. Movies considered include *King Kong*, *Jaws*, *The Grey*, *Them*, *Arachnophobia*, *Jurassic Park*, *Snakes on a Plane*, *An American Werewolf in London* and many more. Drawing on insights from film studies, art history,
