Shcokwave Rider:

The Shockwave Rider John Brunner, 2014-04-01 In a world drowning in data a fugitive tries to outrun the forces that want to reprogram him in this smart edgy novel by a Hugo Award winning author Constantly shifting his identity among a population choking on information innovation and novelty Nickie Haflinger is a most dangerous outlaw yet he doesn't even appear to exist As global society falls apart in all directions with corporate power run amok and personal freedom surrendered to computers and bureaucrats Haflinger is caught and about to be reprogrammed Now he has to try to escape once again defy the government and turn the tide of organizational destruction in this visionary science fiction novel by the author of *The Sheep Look Up* and *Stand on Zanzibar* Brunner writes about the future as if he and the reader were already living in it The New York Times Book Review When John Brunner first told me of his intention to write the book I was fascinated but I wondered whether he or anyone could bring it off Bring it off he has with cool brilliance A hero with transient personalities animals with souls think tanks and survival communities fuse to form a future so plausibly alive it as twitched at me ever since Alvin Toffler author of *Future Shock* One of the most important science fiction authors Brunner held a mirror up to reflect our foibles because he wanted to save us from ourselves SF Site

The Shockwave Rider John Brunner, 1995-03-01 He was the most dangerous fugitive alive but he didn't exist Nickie Haflinger had lived a score of lifetimes but technically he didn't exist He was a fugitive from Tarnover the high powered government think tank that had educated him First he had broken his identity code then he escaped Now he had to find a way to restore sanity and personal freedom to the computerized masses and to save a world tottering on the brink of disaster He didn't care how he did it but the government did That's when his Tarnover teachers got him back in their labs and Nickie Haflinger was set up for a whole new education

The Watchman Jonathan Littman, 1997-03-31 This is a first rate detective story and all true It's the story of a seemingly invincible electronic thief con man and stalker and the people who tracked him down Jonathan Littman brings his readers straight into the world of cyberpunk crime as he shows the origins development and climax of the wildest and most audacious known crime spree in cyberspace Hundreds of hours of interviews allow Littman to tell much of the story through the eyes of those who lived it and his own edgy style and excellent pacing make for a thriller that's hard to put down

Technobiophilia Sue Thomas, 2013-09-26 Why are there so many nature metaphors clouds rivers streams viruses and bugs in the language of the internet Why do we adorn our screens with exotic images of forests waterfalls animals and beaches In *Technobiophilia Nature and Cyberspace* Sue Thomas interrogates the prevalence online of nature derived metaphors and imagery and comes to a surprising conclusion The root of this trend she believes lies in biophilia defined by biologist E O Wilson as the innate attraction to life and lifelike processes In this wide ranging transdisciplinary study she explores the strong thread of biophilia which runs through our online lives a phenomenon she calls technobiophilia or the innate attraction to life and lifelike processes as they appear in technology The restorative qualities of biophilia can alleviate

mental fatigue and enhance our capacity for directed attention soothing our connected minds and easing our relationship with computers Technobiophilia Nature and Cyberspace offers new insights on what is commonly known as work life balance It explores ways to make our peace with technology induced anxiety and achieve a tech nature balance through practical experiments designed to enhance our digital lives indoors outdoors and online The book draws on a long history of literature on nature and technology and breaks new ground as the first to link the two Its accessible style will attract the general reader whilst the clear definition of key terms and concepts throughout should appeal to undergraduates and postgraduates of new media and communication studies internet studies environmental psychology and human computer interaction www.technobiophilia.com **John Brunner** Jad Smith, 2013-01-30 Under his own name and numerous pseudonyms John Brunner

1934 1995 was one of the most prolific and influential science fiction authors of the late twentieth century During his exemplary career the British author wrote with a stamina matched by only a few other great science fiction writers and with a literary quality of even fewer importing modernist techniques into his novels and stories and probing every major theme of his generation robotics racism drugs space exploration technological warfare and ecology In this first intensive review of Brunner s life and works Jad Smith carefully demonstrates how Brunner s much neglected early fiction laid the foundation for his classic Stand on Zanzibar and other major works such as The Jagged Orbit The Sheep Look Up and The Shockwave Rider Making extensive use of Brunner s letters columns speeches and interviews published in fanzines Smith approaches Brunner in the context of markets and trends that affected many writers of the time including Brunner s uneasy association with the New Wave of science fiction in the 1960s and 70s This landmark study shows how Brunner s attempts to cross fertilize the American pulp tradition with British scientific romance complicated the distinctions between genre and mainstream fiction and between hard and soft science fiction and helped carve out space for emerging modes such as cyberpunk slipstream and biopunk **The Posthuman Condition** Kasper Lippert-Rasmussen, Mads Rosendahl Thomsen, Jacob Wamberg, 2012-05-10

If biotechnology can be used to upgrade humans physically and mentally should it be used at all And if so to what extent How will biotechnology affect societal cohesion Can the development be controlled or is this a Pandora s box that should remain closed These are but a few of the perplex questions facing scientists as a result of the increasing ability of technology to change biology and in turn profoundly change human living conditions This development has created a new posthuman horizon that will influence contemporary life and politics in a number of ways The Posthuman Condition addresses the challenges of Imagining a society where the properties of humans have shifted radically Assessing the scope of deploying technologies that are already underway Basing decisions on an ethical foundation that does not entail a concept of human nature Ascertaining the types of political action that can and should be taken in the face of this situation The anthology brings together researchers from a wide range of disciplines biotechnology medicine ethics politics and aesthetics and among contributors are Francis Fukuyama Julian Savulescu Maxwell Mehlman John Harris and Chris Hables Gray
