Anthroposophical Leading Thoughts Rudolf Steiner, 1998 Leading thoughts and letters for members of the Anthroposophical Society CW 26 The leading thoughts here given are meant to open up subjects for study and discussion Points of contact with them will be found in countless places in the anthroposophic books and lecture courses so that the subjects thus opened up can be enlarged upon and the discussions in the groups centered around them Rudolf Steiner This key volume contains Rudolf Steiner's leading thoughts or guiding principles and related letters to members of the Anthroposophical Society Using brief aphoristic statements Steiner succinctly presents his spiritual science as a modern path of knowledge accompanied by letters that expand and contextualize the guiding thought These 185 thoughts constitute invaluable clear summaries of Steiner's fundamental ideas indeed they contain the whole of Anthroposophy They are intended not as doctrine but to stimulate and focus one's study and discussion of spiritual science Anthroposophy is a path of knowledge to guide the Spiritual in the human being to the Spiritual in the universe Anthroposophy communicates knowledge that is gained in a spiritual way There are those who believe that with the limits of knowledge derived from sense perception the limits of all insight are given Yet if they would carefully observe how they become conscious of these limits they would find in the very consciousness of the limits the

faculties to transcend them Rudolf Steiner This volume is a translation of Anthroposophische Leitstz Der Erkenntnisweg der Anthroposophie Das Michael Mysterium GA 26 Advanced Criminology or the WHY of Crimes James Vadackumchery, 2017-01-01 Push Pull Ego Factor Theory of Crime Causation my Eureka is fully and elaborately exposed in this book Heredity interacts with environments to form the Personality Ego The Animality Spirituality Morality Ethics and Intelligence form the Push Factors which along with the Ego interact with the environment otherwise known as the Pull Factors As a result a crime comes into being and the Ego Factor formed out of the interactions between the Push and Pull Factors are etiologically connected or related to crimes This is not a theory of causality rather is a theory of Crime Causation An individual commits or desists from committing a crime depending upon the ego state from which he interacts or transacts Crimes can never be eliminated in society They can be reduced nevertheless the energy behind the commission of a crime is not destroyed but is converted to another energy This is called the Quota Theory of Crime Anyone interested to study the causation of crimes will find the book extremely useful enlightening and educative Crimes are reduced only by an Ego Factor uprightly formed in the right direction Climate Trauma E. Ann Kaplan, 2015-12-04 Each month brings new scientific findings that demonstrate the ways in which human activities from resource extraction to carbon emissions are doing unprecedented perhaps irreparable damage to our world As we hear these climate change reports and their predictions for the future of Earth many of us feel a sickening sense of d j vu as though we have already seen the sad outcome to this story Drawing from recent scholarship that analyzes climate change as a form of slow violence that humans are inflicting on the environment Climate Trauma theorizes that such violence is accompanied by its own psychological condition what its author terms Pretraumatic Stress Disorder Examining a variety of films that imagine a dystopian future renowned media scholar E Ann Kaplan considers how the increasing ubiquity of these works has exacerbated our sense of impending dread But she also explores ways these films might help us productively engage with our anxieties giving us a seemingly prophetic glimpse of the terrifying future selves we might still work to avoid becoming Examining dystopian classics like Soylent Green alongside more recent examples like The Book of Eli Climate Trauma also stretches the limits of the genre to include features such as Blindness The Happening Take Shelter and a number of documentaries on climate change These eclectic texts allow Kaplan to outline the typical blind spots of the genre which rarely depicts climate catastrophe from the vantage point of women or minorities Lucidly synthesizing cutting edge research in media studies psychoanalytic theory and environmental science Climate Trauma provides us with the tools we need to extract something useful from our nightmares of a catastrophic future
