Nobody Wanted War Misperception In Vietnam And Other Wars:

Nobody Wanted War Ralph K. White, 1970 **Nobody Wanted War; Misconception in Vietnam and Other Wars** Ralph K. White, 1968 *The Ten Commandments and the Beatitudes* Yiu Sing Lúcas Chan, 2012-09-14 The Ten Commandments and the Beatitudes are often considered significant texts for the Christian moral life However most interpretations of these passages either focus on the original meaning of the text or how the texts should impact ordinary living today In *The Ten Commandments and the Beatitudes* Yiu Sing L c s Chan brings together biblical studies and Christian ethics to look at these foundational texts in a new way For each passage Chan asks both what the texts meant and what they mean today He helps readers to carefully study the text s original meaning then interpret the text within a sound ethical framework *The Ten Commandments and the Beatitudes* is an excellent introduction to key concepts in biblical studies and Christian ethics that combines sound study with warmth and wisdom **Select List of Recent Publications** East-West Center. Library, 1968 **Department of State News Letter** United States. Department of State, 1968 **Congressional Record** United States. Congress, 1969 Handbook of the Sociology of the Military Giuseppe Caforio, 2007-07-23 Never before has there been so extensive a collection of what has been thought said and written about the sociology of the military This accessible handbook is the first of its kind to delve into the sociological approach to the study of the military This book is compiled of documents coming from various researchers at universities around the world as well as military officers devoted to the sector of study Covered in this volume is a historical excursus of studies prior to contemporary research interpretive models and theoretical approaches developed specifically for this topic civic military relations including issues surrounding democratic control of the armed forces military culture professional training conditions and problems of minorities in the armed forces an examination of the structural change within the military over the years including new duties and functions following the Cold War This book is ideal for scholars of the subject as well as those coming to the sociology of the military for the first time Information Strategy and Warfare John Arquilla, Douglas A. Borer, 2007-09-11 This volume develops information strategy as a construct equal in importance to military strategy as an influential tool of statecraft John Arquilla and Douglas A Borer explore three principal themes the rise of the information domain and information strategy as an equal partner alongside traditional military strategy the need to consider the org Conflict Regulation Paul Wehr, 2019-03-01 This volume examines conflict and conflict regulation processes The author reviews theories of conflict and techniques of conflict management and then presents case studies of self limiting conflict in Gandhi s India Nazioccupied Norway and at a nuclear weapons plant in Colorado to illustrate unconventional approaches to conflict regulation He **Discourses on Violence** Vivienne Jabri, 1996 **Painful Choices** David A. Welch, 2011-06-27 Under what conditions should we expect states to do things radically differently all of a sudden In this book David Welch seeks to answer this question constructing a theory of foreign policy change inspired by organization theory cognitive and motivational psychology and prospect theory He then test

drives the theory in a series of comparative case studies in the security and trade domains Argentina's decision to go to war over the Falklands/Malvinas vs Japan's endless patience with diplomacy in its conflict with Russia over the Northern Territories America's decision to commit large scale military force to Vietnam vs its ultimate decision to withdraw and Canada's two abortive flirtations with free trade with the United States in 1911 and 1948 vs its embrace of free trade in the late 1980s *Painful Choices* has three main objectives to determine whether the general theory project in the field of international relations can be redeemed given disappointment with previous attempts to reflect on what this reveals about the possibilities and limits of general theory and to inform policy Welch argues that earlier efforts at general theory erred by aiming to explain state behavior which is an intractable problem Instead since inertia is the default expectation in international politics all we need do is to explain changes in behavior *Painful Choices* shows that this is a tractable problem with clear implications for intelligence analysts and negotiators

Trusting Enemies Nicholas J. Wheeler, 2018-03-09 How can two states with enemy relations transform their relationship Nicholas Wheeler argues that the discipline of International Relations has not done a good job of answering this question because its focus has been on the state and the individual levels of analysis In this ground breaking book he argues for the importance of a new level of analysis in trust research the interpersonal relationships between state leaders In doing so he makes two key contributions Firstly developing a new theory of interpersonal trust that can be applied to the international level and secondly showing how this theory contributes to the literature on signalling in IR The theory of interpersonal trust developed in the book provides a novel response to the central problem identified by signalling theory in IR whether the receivers of signals interpret them in the way intended by their senders The author argues that in fact trust between two leaders is causally prior to the accurate interpretation of the signals they send with the aim of communicating peaceful intent Trust therefore does away with the problem of the ambiguity of signal interpretation He goes on to examine exactly how a new relationship of trust emerges between two leaders who represent states with enemy relations through face to face interaction and the crucial process of bonding between them that this makes possible This powerful new theory of interpersonal trust is applied to three cases the personal interactions between US and Soviet leaders Ronald Reagan and Mikhail Gorbachev in ending the Cold War the face to face interactions between Indian Prime Minister Atal Bihari Vajpayee and Pakistani Prime Minister Nawaz Sharif in reducing conflict between India and Pakistan in 1998 1999 and the interactions in 2009 10 between Barack Obama and Ayatollah Ali Khamenei that failed to achieve a breakthrough in US Iran nuclear relations

events during the ongoing process of conflict resolution Written in a clear and accessible style Emotions in Conflict offers a thought provoking and pioneering insight into the role discrete intergroup emotions play in impeding as well as facilitating peace processes in intractable conflicts This book is essential reading for those who study intractable conflicts and their resolutions and those who are interested in the real world implication of recent theories and findings on emotion and emotion regulation
