Sallows, 2013-10-03 This innovative work replaces magic square numbers with two dimensional forms The result is a revelation that traditional magic squares are now better seen as the one dimensional instance of this self same geometrical activity **His Good Name** Christina Geisen, Jean Li, Steven B. Shubert, Kei Yamamoto, 2021-03-20 The wish to affiliate with a specific cultural social or ethnical group is as important today as it was in past societies such as that of the ancient Egyptians The same significance applies to the self presentation of an individual within such a group Although it is inevitable that we perceive ancient cultures through the lens of our time place and value systems we can certainly try to look beyond these limitations Questions of how the ancient Egyptians saw themselves and how individuals tried to establish and thus present themselves in society are central pieces of

the puzzle of how we interpret this ancient culture This volume focuses on the topic of identity and self presentation tackling the subject from many different angles the ways in which social and personal identities are constructed and maintained the manipulations of culture by individuals to reflect real or aspirational identities and the methods modern scholars use to attempt to say something about ancient persons Building on the work of Ronald J Leprohon to whom this volume is dedicated contributions in this volume present an overview of our current state of understanding of patterns of identity and self presentation in ancient Egypt The contributions approach various aspects of identity and self presentation through studies of gender literature material culture mythology names and officialdom
