Nomaden In Der Schweiz:

Nomaden in der Schweiz Urs Walder, Mariella Mehr, 1999 *Tunguska, or the End of Nature* Michael Hampe, 2015-06-04 On June 30 1908 a mysterious explosion erupted in the skies over a vast woodland area of Siberia Known as the Tunguska Event it has been a source of wild conjecture over the past century attributed to causes ranging from meteors to a small black hole to antimatter In this imaginative book Michael Hampe sets four fictional men based on real life scholars a physicist G nter Hasinger and Steven Weinberg a philosopher Paul Feyerabend a biologist Adolf Portmann and a mathematician Alfred North Whitehead adrift on the open ocean in a dense fog to discuss what they think happened The result is a playful and highly illuminating exploration of the definition of nature mankind s role within it and what its end might be Tunguska Or the End of Nature uses its four man setup to tackle some of today s burning issues such as climate change environmental destruction and resource management from a diverse range of perspectives With a kind of foreboding it asks what the world was like and will be like without us whether we are negligible and the universe random whether nature can truly be explained whether it is good or evil or whether nature is simply a thought we think This is a profoundly unique work a thrillingly interdisciplinary piece of scholarly literature that probes the mysteries of nature and humans alike
