Nominal Anaphors And The Coherence Of Discourse:

Nominal Anaphors and the Coherence of Discourse Fons Maes, 1991 *Issues in Cognitive Linguistics* Leon de Stadler, Christoph Eyrich, 2011-04-20 No detailed description available for *Issues in Cognitive Linguistics* **Coherence and Anaphora** Walter de Mulder, Liliane Tasmowski, 1996 As of Volume 9 1994 95 John Benjamins Publishing Company is the official publisher of the Belgian Journal of Linguistics the annual publication of the Linguistic Society of Belgium Each volume is topical and includes selected papers from the international meetings organised by the LSB The objective of this collection of essays is to show the ways in which anaphoric expressions contribute to the coherence or possibly the incoherence of discourse Coherence can be viewed as a general interpretive principle that hearers follow in integrating information from current clauses and utterances in their mental model of discourse Semantic value and formal morphological and syntactic properties restrain the interpretation of anaphora Research into the activation and accessibility of the knowledge store leads to Gricean maxims and Relevance Theory which are exemplified here **Nominal Anaphors, Markedness and the Coherence of Discourse** Fons Maes, Alfons A. Maes, 1996-01 Peeters 1996 *Toward a Calculus of Meaning* Edna Andrews, Y. Tobin, 1996-01-01 This volume contains papers presented at a symposium in honor of Cornelis H van Schooneveld and invited papers on the topics of invariance markedness distinctive feature theory and deixis It is not a Festschrift in the usual sense of the word but more of a collection of articles which represent a very specific way of defining and viewing language and linguistics The specific approach presented in this volume has its origins and inspirations in the theoretical and methodological paradigm of European Structuralism in general and the sign oriented legacy of Ferdinand de Saussure and Charles Sanders Peirce and the functional and communication oriented approach of the Prague School in particular The book is divided in three sections Theoretical and Methodological Overview Cornelis H van Schooneveld Anatoly Liberman Petr Sgall Alla Bemova and Eva Hajicova Robert Kirsner Studies in Russian and Slavic Languages Edna Andrews Lawrence E Feinberg Annie Joly Sperling Ronald E Feldstein Irina Dologova and Elena Maksimova Stefan M Pugh Applications to Other Languages Language Families and Aphasia Ellen Contini Morava Barbara A Fennell Victor A Friedman Robert Fradkin Yishai Tobin Mark Leikin *Anaphoric Relations in English and French* Francis Cornish, 2015-07-03 First published in 1986 this book focuses on Anaphoric relations in the English and French languages a phenomenon that involves a complex interaction between grammar and discourse Studies of anaphora taking a largely textual approach to the subject have tended to underestimate the effect upon its formation of referential and discourse factors while studies framed within a psycholinguistic and computational perspective have been inclined to minimise the importance of the purely linguistic features connected with anaphora This volume places the study of anaphora upon a firmer foundation by examining both its nature and functions in discourse by pinpointing the range of factors relevant to its operation in the two languages under study and by attempting to relate the textual and interactional perspectives within a more comprehensive framework

Routledge Library Editions: The English Language Various, 2021-07-28 This set reissues 29 books on the English language originally published between 1932 and 2003 Together the volumes cover key topics within the larger subject of the English Language including grammar dialect and the history of English Written and edited by an international set of scholars particular volumes employ comparisons with other languages such as French and German whilst other volumes are devoted to specific English dialects such as Cockney and Canadian English or English in general This collection provides insight and perspective on various elements of the English language over a period of 70 years and demonstrates its enduring importance as a field of research

Linguistic Theory and Empirical Evidence Bob de Jonge, Yishai Tobin, 2011 This volume further elaborates the empirical tradition of Columbia School CS Linguistics by offering diverse empirical analyses for a wide variety of languages These studies open a much needed debate advocating the necessity of the independent validation of linguistic hypotheses This research exemplifies how such a validation should be conducted by determining which forms underlie the analyses and extracting those observations that are considered to be objective The volume consists of two parts a section on synchronic and diachronic grammatical problems and a section on Phonology as Human Behavior PHB the Columbia School version of phonology applied to evolutionary developmental and clinical issues and the phonotactics of the selected lexicon of a literary text It provides a wealth of useful empirical data and in depth and sophisticated qualitative and quantitative analyses of a broad range of languages from diverse families French Spanish Afrikaans Dutch English Polish Russian Japanese and Hebrew

English Adjectives of Comparison Tine Breban, 2010-07-19 The book is concerned with a hitherto underresearched grammaticalization process the development from quality attributing adjective to determiner in the English noun phrase It takes a bottom up approach based on extensive synchronic and diachronic corpus studies of six English adjectives of comparison other different same identical similar and comparable Their functional diversity in current English is proposed to constitute a case of layering representing the original descriptive use which expresses how like unlike each other entities are and a range of grammaticalized referential uses which contribute to the identification and or quantification of the entities denoted by the NP Diachronic and comparative data material is invoked to verify and further develop the grammaticalization hypothesis The development of adjectives of comparison involves several key concepts identified in the literature Crucially it is described as a case of textual intersubjectification driven by the optimization of recipient design The actual grammaticalization paths are diverse and are characterized by lexical as well as structural persistence i e the same lexical meaning develops into different grammatical functions in different syntagmatic configurations In order to define the NP as a locus of diachronic change this study offers a new angle on the description of adjectives and the modelling of NP structure It advocates the abandonment of the traditional class based model in favour of a radically functional one in which functions are defined in terms of prototypicality so as to allow for gradience between and within them The described grammaticalization processes involve developments from prototypical lexical to grammatical

reference related use within the adjectival category which can be the starting point of further gradual change to determiners The traditional relation between classes and positions is envisaged as a correspondence between functional and syntactic zones The change in form concomitant with grammaticalization in the NP is argued to consist of the reconfiguration of structural combinatorics and progressive leftward movement The book is of interest to linguistic researchers and graduate students in linguistics who focus their attention on grammaticalization and subjectification the functional description of adjectives questions of deixis and theoretical issues relating to nominal reference Theory and Typology of Proper Names Willy Van Langendonck, 2008-08-22 This book proposes a new synthesis of the functions of proper names from a semantic pragmatic and syntactic perspective Proper names are approached constructionally distinguishing prototypical uses from more marked ones such as those in which names are used as common nouns Since what is traditionally regarded as the class of names turns out to be only one possible function of name forms though a prototypical one the notion of proprial lemma is introduced as the concept behind both proprial and appellative uses of such categories as place names and personal names New formal arguments are adduced to distinguish proper name function from common noun or pronoun function The special status of proper names is captured in a unified pragmatic semantic syntactic theory a proper name denotes a unique entity at the level of langue to make it psychosocially salient within a given basic level category The meaning of the name if any does not determine its denotation An important formal reflection of this characterization of names is their ability to appear in such close appositional constructions as the poet Burns or Fido the dog The neurolinguistic finding that proper names constitute a separate category is introduced and interpreted within a general linguistic frame of reference The different kinds of meanings associated with names categorical associative emotive and grammatical are shown to be presuppositional in nature In addition the book proposes an entirely new classification of proper names as forming a continuum ranging from prototypical personal and place names to nonprototypical categories brand and language names to citations and autonyms and a new diachronic classification of family names and nicknames This book fills an important gap in the current literature because the most recent linguistic book in English on name theory dates back to 1973 It is explicitly interdisciplinary taking into account linguistic philosophical neurolinguistic sociolinguistic and dialect geographical aspects of proper names

Narrative Development in a Multilingual Context Ludo Verhoeven, Sven Strömquist, 2001-12-31 In this volume the results of a number of empirical studies of the development of narrative construction within a multilingual context are presented and discussed It is explored what operating principles underlie the process of narrative production in L1 and L2 Developmental relations between form and function will be studied across a broad range of functional categories such as temporality perspective connectivity and narrative coherence Moreover a variety of language contact situations is considered with broad variation in the typological distances between the languages in order to enable cross linguistic comparison The analysis of learner data in various cross linguistic settings may thus offer new information on the role of the structural

properties of unrelated languages on the process of narrative acquisition In the present volume an attempt is also made to find out how transfer from one language to the other is facilitated Finally the effects of input on narrative construction in children's first and second language are examined in several studies

A New Architecture for Functional Grammar J. Lachlan Mackenzie, María de los Ángeles Gómez-González, 2008-08-22 This volume which represents a major advance on Simon Dik's final statement of the theory 1997 lays the foundation for the future evolution of FG towards a Functional Discourse Grammar It rises to the double challenge of specifying the interface between discourse and grammar and of detailing the expression rules that link semantic representation and morphosyntactic form The opening chapter by Kees Hengeveld sets out in programmatic form a new architecture for FG which both preserves the best of the traditional model and offers a place for numerous recent insights The remaining chapters are devoted to refining and developing the programme laid down by Hengeveld bringing in data from a range of languages as well as theoretical insights inspired by adjoining frameworks Of special interest are an account by Matthew Anstey of how current proposals arise from the history of FG and various chapters in which the model is brought much closer to an account of real time language production notably including the first ever detailed account of the workings of expression rules by Dik Bakker and Anna Siewierska The final chapter also by Hengeveld draws together the findings of the various chapters culminating in an elaborated model that represents the most sophisticated statement of Functional Grammar currently available The volume thus gives a coherent account of FG as a theory which combines formal explicitness with a broad account of language functions

Preformulating the News Geert Jacobs, 1999-05-15 Preformulating the News is a study of press releases and of how they anticipate the requirements of journalistic writing Drawing from a large corpus Dutch and English it is argued that the genre's peculiar audience directedness can be related to a number of metapragmatic textual features and that this sheds light on the asymmetries of what can be termed the newsmaking and news management processes In the first chapter the study of press releases is put in the context of institutional discourse and the details of a linguistic pragmatic research method are proposed Chapter 2 looks at the complex receiver roles in press releases which are characterized as indirectly targeted i.e. projected discourse In chapters 3 to 6 a data analysis of the metapragmatics of press releases is presented in particular it is shown that self-reference pseudo quotation and explicit semi performative play a preformulating role in press releases Chapter 7 offers a case study of the press releases that the American multinational Exxon issued in the wake of the 1989 Alaska oil spill In the eighth and final chapter it is suggested that the study's findings support a hegemonic view of the media In analysing the much neglected genre of press releases the book aims to contribute to the study of the language of the news At the same time it explores more general issues of participation and footing as well as reflexive language including deixis reported speech and performativity

Form and Function in Greek Grammar Albert Rijksbaron, 2018-11-26 Albert Rijksbaron is internationally known as one of the leading scholars of the Ancient Greek language whose work has exerted a

strong and lasting influence on the scholarly debate concerning many aspects of Greek linguistics This volume brings together twenty of his papers two of which have been translated into English and some which are not easily accessible elsewhere The selection represents the full range of Rijksbaron s research including papers on central topics in Greek linguistics such as tense aspect mood voice particles negation the article questions discourse analysis as well as on the views of ancient grammarians and modern commentators As a whole the volume shows how much linguistic analysis can contribute to our understanding of Greek literary texts

**THE GENERATION OF BRIDGING ANAPHORA IN
STREAM-OF-CONSCIOUSNESS DISCOURSE** WEI ZHAO,2021-10-22 This study mainly focuses on the revision and extension of two Rules of Standard Centering Theory Pronoun Rule and Transition Rule to develop the constraints on the generation algorithm of bridging anaphora BA in stream of consciousness SOC discourse from a revised Centering perspective by incorporating the revised neo Gricean pragmatic M principle into the standard Centering The Centering Theory combined with the revised neo Gricean pragmatic M principle is supposed to impose some grammatical and pragmatic constraints on backward looking center realization and movement It provides theoretical rationale for an account of constraints on full noun phrase and elliptical zero pronoun bridging anaphora generation in terms of the interaction and the division of labor between syntax and pragmatics As to both one cannot alone handle bridging anaphora without the other Even though syntax and pragmatics operate at distinct levels of linguistic explanation they appear to interact systematically in the case of bridging anaphora generation On the one hand syntax sets certain restrictions on salience and distributions of bridging anaphora and regulates the part of interpretation which is related to grammatical structure On the other hand the choice of bridging anaphoric expressions by writers and their interpretation by readers heavily depends on preference which is regulated by the M principle of language use and communication Hence the bridging anaphora generation algorithm based on the incorporation of the revised neo Gricean pragmatic M principle of communication into Centering provides a neat and reasonable explanation for bridging full noun phrase and elliptical zero pronoun generation

Qualitative-Quantitative Analyses of Dutch and Afrikaans Grammar and Lexicon Robert S. Kirsner, 2014-02-15 Sharing certain assumptions but differing in theory and practice both Columbia School linguistics CS and Cognitive Grammar CG have increasingly supported their analyses with quantitative evidence Citation of individual sentences in isolation or in context has been supplemented with counts of linguistic forms in texts informant questionnaires and perception tests The present volume continuing a dialogue between CS and CG offers six such qualitative quantitative studies one on Afrikaans and five on Dutch Topics include a demonstratives b pragmatic particles and imperatives c a puzzling dismissive idiom d progressive aspect and e indirect objects While CS is better suited for analyzing relatively closed systems e g tense pronouns CG provides more insight into the vagaries of the amorphous lexicon The author also offers personal remarks on linguistics as a path and discusses how in one case a wrong prediction reflects his dual role as both linguist and student of Dutch as a foreign language

New Directions in Cognitive Linguistics Vyvyan Evans, Stephanie Pourcel, 2009 Nearly three decades since the publication of the seminal *Metaphors We Live By* Cognitive Linguistics is now a mature theoretical and empirical enterprise with a voluminous associated literature It is arguably the most rapidly expanding school in modern linguistics and one of the most exciting areas of research within the interdisciplinary project known as cognitive science As such Cognitive Linguistics is increasingly attracting a broad readership both within linguistics as well as from neighbouring disciplines including other cognitive and social sciences and from disciplines within the humanities This volume contains over 20 papers by leading experts in cognitive linguistics which survey the state of the art and new directions in cognitive linguistics The volume is divided into 5 sections covering all the traditional areas of study in cognitive linguistics as well as newer areas including applications and extensions Sections include Approaches to semantics Approaches to metaphor and blending Approaches to grammar Language embodiment and cognition Extensions and applications of cognitive linguistics
