Sustainable Construction Materials and Technologies Yoon-Moon Chun,Peter Claisse,Tarun R. Naik,Eshmaiel Ganjian,2007-05-31 The construction materials industry is a major user of the world's resources While enormous progress has been made towards sustainability the scope and opportunities for improvements are significant To further the effort for sustainable development a conference on Sustainable Construction Materials and Technologies was held at Coventry University Coventry U K from June 11th 13th 2007 to highlight case studies and research on new and innovative ways of achieving sustainability of construction materials and technologies This book presents selected important contributions made at the conference Over 190 papers from over 45 countries were accepted for presentation at the conference of which approximately 100 selected papers are published in this book The rest of the papers are published in two supplementary books Topics covered in this book include sustainable alternatives to natural sand stone and Portland cement in concrete sustainable use of recyclable resources such as fly ash ground municipal waste slag pozzolan rice husk ash silica fume gypsum plasterboard drywall and lime in construction sustainable mortar concrete bricks blocks and backfill the economics and environmental impact of sustainable materials and structures use of construction and demolition wastes and organic materials straw bale hemp etc in construction sustainable use of soil timber and wood products and related sustainable

not be totally avoided in the future Therefore understanding the processes of groundwater contamination recommending the proper measures for preventing it and determining the best means for reclamation once pollution has occurred are of great practical importance Non aqueous phase liquids NAPLs are among the most significant contaminants Development of a data evaluation/decision support system for remediation of subsurface contamination , **Handbook of Chemical Mass Transport in the Environment** Louis J.
