## **Non State Actors And Human Rights:**

**Non-state Actors and Human Rights** Philip Alston, 2005 Can transnational corporations ignore human rights as long as governments don't hold them accountable If the UN is put in charge of a territory is it bound by human rights law Does that body of law apply to private security contractors who use torture to achieve their goals Does the right to freedom of speech apply in a private shopping mall which has become the modern day town centre Under traditional approaches to human rights non State actors are beyond the direct reach of international human rights law They cannot be parties to the relevant treaties and so they are only bound to the extent that obligations accepted by States can be applied to them by governments The result is that entities including Non Governmental Organizations international organizations such as the UN and the IMF private security contractors and transnational corporations along with many others are generally considered not to be bound directly by human rights law This situation threatens to make a mockery of much of the international system of accountability for human rights violations As privatization outsourcing and downsizing place ever more public or governmental functions into the hands of private actors the human rights regime must adapt if it is to maintain its relevance The contributors to this volume examine the different approaches that might be taken in order to ensure some degree of accountability Making space in the legal regime to take account of the role of non State actors is one of the biggest and most critical challenges facing international law today

*Non-State Actors and International Obligations* James Summers, Alex Gough, 2018-10-02 Non State Actors and International Obligations examines the contribution and relevance of non state actors in the creation and implementation of international obligations These actors have traditionally been marginalised within international law and ambiguities remain over their precise role Nonetheless they have become increasingly important in legal regimes as participants in their implementation and enforcement and as potential holders of duties themselves Chapters from academics and practitioners investigate different aspects of this relationship including the sources of obligations their implementation human rights aspects dispute settlement responsibility and legal accountability

**Human Rights Obligations of Non-State Actors** Andrew Clapham, 2006-03-02 The threats to human rights posed by non state actors are of increasing concern Human rights activists increasingly address the activity of multinational corporations the policies of international organizations such as the World Bank and the World Trade Organization and international crimes committed by entities such as armed opposition groups and terrorists This book presents an approach to human rights that goes beyond the traditional focus on states and outlines the human rights obligations of non state actors Furthermore it addresses some of the ways in which these entities can be held legally accountable for their actions in various jurisdictions The political debate concerning the appropriateness of expanding human rights scrutiny to non state actors is discussed and dissected For some extending human rights into these spheres trivializes human rights and allows abusive governments to distract us from ongoing violations For others such an extension is essential if human rights are properly to address the

current concerns of women and workers The main focus of the book however is on the legal obligations of non state actors The book discusses how developments in the fields of international responsibility and international criminal law have implications for building a framework for the human rights obligations of non state actors in international law In turn these international developments have drawn on the changing ways in which human rights are implemented in national law A selection of national jurisdictions including the United States South Africa and the United Kingdom are examined with regard to the application of human rights law to non state actors The book s final part includes suggestions with regard to understanding the parameters of the human rights obligations of non state actors Key to understanding the legal obligations of non state actors are concepts such as dignity and democracy While neither concept can unravel the dilemmas involved in the application of human rights law to non state actors a better understanding of the tensions surrounding these concepts can help us to understand what is at stake      *Non-State Actors in International Law* Math Noortmann, August

Reinisch, Cedric Ryngaert, 2015-08-27 The role and position of non state actors in international law is the subject of a long standing and intensive scholarly debate This book explores the participation of this new category of actors in an international legal system that has historically been dominated by states It explores the most important issues actors and theoretical approaches with respect to these new participants in international law It provides the reader with a comprehensive and state of the art overview of the most important legal and political developments and perspectives Relevant non state actors discussed in this volume include in particular international governmental organisations international non governmental organisations multinational companies investors and armed opposition groups Their legal position is considered in relation to specific issue areas such as humanitarian law human rights the use of force and international responsibility The main legal theories on non state actors position in international law neo positivism the policy oriented approach and transnational law are covered at the beginning of the book and the essential political science perspectives on non state actors role in international politics and globalisation as well as their soft power are presented at the end      *Legal Sources in Business and Human Rights* Martina Buscemi, Nicole Lazzerini, Laura Magi, Deborah Russo, 2020-06-02 Legal Sources in Business and Human Rights engages with some evolving trends that are currently affecting the international and EU law sources in the field of Business and Human Rights Three main dynamics are detected and explored the emergence of international legal obligations that are also binding on corporations Part I the growing participation of corporations in traditional international standard setting and law making processes and in parallel the emergence of atypical and heterogeneous law making processes Part II the formal or substantive hardening of originally soft normative standards through a multi layered and multi player law making process Part III Interestingly these trends concur to mitigate States reluctance to accept binding rules in this field and to strengthen the effectiveness of soft international regulation      **International Human Rights Law** Daniel Moeckli, Sangeeta Shah, Sandesh Sivakumaran, David Harris, 2014 International Human Rights Law offers a thought provoking

Constitutionalism 2030 Christoph Bezemek, 2022-08-25 Constitutionalism is in crisis And the crisis unfolds not only on a national or a regional level It is a global phenomenon Democracy is no longer on the rise the Rule of Law appears weakened political cohesion seems to erode Human Rights Protection finds itself questioned International Criminal Law struggles for broad recognition international trade may have lost some of its appeal Institutional actors find their authority questioned established political parties are threatened by ever changing popular movements But where to does the charted road lead How will the Crisis of Constitutionalism unfold in the years to come Nobody knows of course But at the same time Nobody is too keen to make an educated guess either This volume remedies that By giving nine eminent scholars in law and political science the opportunity to make their predictions where the constitutionalist project will stand ten years from now it creates a forum of deliberation that will not only aim at anticipating the developments in question but at the same time shape academic discourse on constitutionalism alongside it

*The Treatment of Combatants and Insurgents Under the Law of Armed Conflict* Emily Crawford, 2010-01-14 This book looks at why international law continues to make the legal distinction between persons who participate in an international or an internal armed conflict and drawing on considerable legal precedent legal theory and the situation in Guantanamo Bay it argues that it is time for the law of armed conflict to be applied more uniformly
