

The background of the cover is a photograph of a desert landscape at dusk or dawn. The sky is a deep, dark red. In the foreground, the silhouettes of several soldiers are visible. On the left, three soldiers are walking in a line, carrying equipment. On the right, another soldier is walking, also carrying equipment. The ground is uneven and sandy, with some small rocks or mounds visible in the distance.

How nonstate military strategies overturn traditional perspectives on warfare Since September 11th 2001 armed nonstate actors have received increased attention and discussion from scholars policymakers and the military Underlying debates about nonstate warfare and how it should be countered is one crucial assumption that state and nonstate actors fight very differently In *Nonstate Warfare* Stephen Biddle upturns this distinction arguing that there is actually nothing intrinsic separating state or nonstate military behavior Through an in depth look at nonstate military conduct Biddle shows that many nonstate armies now fight more conventionally than many state armies and that the internal politics of nonstate actors their institutional maturity and wartime stakes rather than their material weapons or equipment determines tactics and strategies Biddle frames nonstate and state methods along a continuum spanning Fabian style irregular warfare to Napoleonic style warfare involving massed armies and he presents a systematic theory to explain any given nonstate actor's position on this spectrum Showing that most warfare for at least a century has kept to the blended middle of the spectrum Biddle argues that material and tribal culture explanations for nonstate warfare methods do not adequately explain observed patterns of

warmaking Investigating a range of historical examples from Lebanon and Iraq to Somalia Croatia and the Vietcong Biddle demonstrates that viewing state and nonstate warfighting as mutually exclusive can lead to errors in policy and scholarship A comprehensive account of combat methods and military rationale Nonstate Warfare offers a new understanding for wartime military behavior *Special Warfare* ,2009 **Military Review** ,2004 **Parameters** ,2003 Future Trends and New Approaches in Defeating the Terrorism Threat IOS Press,2013-07-17 The threat of terrorism has become an ever present preoccupation necessitating the constant review and updating of defensive strategies to counter it from national governments and policymakers This book presents selected articles based on some of the lectures delivered at the NATO Centre of Excellence Defence against Terrorism COE DAT Advanced Training Course ATC Future Trends and New Approaches in Defeating the Terrorism Threat held in Algiers Algeria in October 2011 Subjects covered by these articles include an overview of terrorism respecting human rights in the countering of terrorism suicide terrorism terrorism involving weapons of mass destruction bioterrorism terrorism media and public information strategic communications in the defence against terrorism the challenges posed by non state armed groups and sources of instability This collection of articles will be of interest to all those involved in countering the threat of terrorism worldwide **Networks, Terrorism and Global Insurgency** Robert J. Bunker,2014-01-14 This new book brings together leading terrorism scholars and defence professionals to discuss the impact of networks on conflict and war Post modern terrorism and topics of global insurgency are also comprehensively covered The text is divided into four sections to cover the key areas introductory overview theory terrorism and global insurgency Al Qaeda focus and networks Eminent contributors include John Arquilla and David Ronfeldt Brian Jenkins Stephen Sloan Graham Turbiville and Max Manwaring This book was previously published as a special issue of the leading journal Low Intensity Conflict and Law Enforcement **Studies in Gangs and Cartels** RobertJ. Bunker,2017-07-05 Concerns over the changing nature of gangs and cartels and their relationships to states in the late 20th and early 21st centuries has resulted in the emergence of a scholarly body of work focused on their national security threat potentials This body of work utilizing the third generation gangs and third phase cartel typologies represents an alternative to traditional gang and organized crime research and one that is increasingly influencing the US defense community Rather than being viewed only as misguided youth and opportunistic criminals or in their mature forms as criminal organizations with no broader social or political agendas more evolved gangs and cartels are instead seen as developing political mercenary and state challenging capacities This evolutionary process has emerged due to the growing illicit economy and other unintended consequences of globalization This important anthology of writings by Robert J Bunker and John P Sullivan draws upon a collection of their works from the mid 1990s to the present with the addition of new essays written specifically for this publication The work will be of great interest to academics and students in the fields of political science and criminal justice and to military law enforcement and governmental professionals and policy makers This book is a collection of new

and previously published works from a variety of publications a full list of which is on the Citation Information page

Routledge Handbook of the Future of Warfare Artur Gruszczak, Sebastian Kaempf, 2023-09-19 This handbook provides a comprehensive problem driven and dynamic overview of the future of warfare The volatilities and uncertainties of the global security environment raise timely and important questions about the future of humanity's oldest occupation war This volume addresses these questions through a collection of cutting edge contributions by leading scholars in the field Its overall focus is prognostic rather than futuristic highlighting discernible trends key developments and themes without downplaying the lessons from the past By making the past meet the present in order to envision the future the handbook offers a diversified outlook on the future of warfare which will be indispensable for researchers students and military practitioners alike The volume is divided into six thematic sections Section I draws out general trends in the phenomenon of war and sketches the most significant developments from the past to the present and into the future Section II looks at the areas and domains which actively shape the future of warfare Section III engages with the main theories and conceptions of warfare capturing those attributes of contemporary conflicts which will most likely persist and determine the dynamics and directions of their transformations The fourth section addresses differentiation and complexity in the domain of warfare pointing to those factors which will exert a strong impact on the structure and properties of that domain Section V focuses on technology as the principal trigger of changes and alterations in the essence of warfare The final section draws on the general trends identified in Section I and sheds light on how those trends have manifested in specific local contexts This section zooms in on particular geographies which are seen and anticipated as hotbeds where future warfare will most likely assume its shape and reveal its true colours This book will be of great interest to students of strategic studies defence studies war and technology and International Relations

The Global Arms Trade Andrew T. H. Tan, 2014-05-22 The Global Arms Trade is a timely comprehensive and in depth study of this topic a phenomenon which has continued to flourish despite the end of the Cold War and the preoccupation with global terrorism after 11 September 2001 It provides a clear description and analysis of the demand for and supply of modern weapons systems and assess key issues of concern This book will be especially useful to scholars policy analysts those in the arms industry defence professionals students of international relations and security studies media professionals government officials and those generally interested in the arms trade

All Possible Wars? Sam J. Tangredi, 2000 This survey is a product of the Quadrennial Defense Review QDR 2001 Working Group a project of the Institute for National Strategic Studies at the National Defense University Sponsored by the Chairman of the Joint Chiefs of Staff the working group is an independent honest broker effort intended to build intellectual capital for the upcoming QDR More specifically it aims to frame issues develop options and provide insights for the Chairman the services and the next administration in three areas defense strategy criteria for sizing conventional forces and force structure for 2005 2010 One of the group's initial tasks was to assess the future security environment to the year 2025 This

was pursued by surveying the available literature to identify areas of consensus and debate. The goal was to conduct an assessment that would be far more comprehensive than any single research project or group effort could possibly produce. This survey documents major areas of agreement and disagreement across a range of studies completed since the last QDR in 1997. Because it distills a variety of sources and organizes and compares divergent views, this volume makes a unique contribution to the literature. It also provides a particularly strong set of insights and assumptions on which both strategists and force planners can draw in the next Quadrennial Defense Review. This survey does not claim to predict or illustrate all possible wars that America might face between now and the year 2025. Rather, it attempts through analysis of representative and reputable sources to incorporate the most likely characteristics of the future security environment into a single scenario while heightening our awareness of dissenting viewpoints and plausible wild cards.

Unfolding the Future of the Long War
Christopher G. Pernin, Brian Nichiporuk, Dale Stahl, Justin Beck, Ricky Radaelli-Sanchez, 2008-12-16. The United States is currently engaged in a military effort that has been characterized as the long war. This study explores the concept of long war and identifies ways in which it might unfold as well as the implications for the Army and the U.S. military more generally. This report uses the generation of either trajectories or alternative paths in which the long war might unfold to explore the implications for the U.S. military.

American Defense Policy Paul J. Bolt, Damon V. Coletta, Collins G. Shackelford, Jr., 2005-06-24. American Defense Policy has been a mainstay for instructors of courses in political science, international relations, military affairs, and American national security for over 25 years. The updated and thoroughly revised eighth edition considers questions of continuity and change in America's defense policy in the face of a global climate beset by geopolitical tensions, rapid technological change, and terrorist violence. On September 11, 2001, the seemingly impervious United States was handed a very sharp reality check. In this new atmosphere of fear and vulnerability, policy makers were forced to make national security their highest priority, implementing laws and military spending initiatives to combat the threat of international terrorism. In this volume, experts examine the many factors that shape today's security landscape: America's values, the preparation of future defense leaders, the efforts to apply what we have learned from Afghanistan and Iraq to the transformation of America's military, reflection on America's nuclear weapons programs and missile defense, the threat of terrorism, and the challenges of homeland security, which are applied to widely varied approaches to national defense strategy. This invaluable and prudent text remains a classic introduction to the vital security issues facing the United States throughout its history and breaks new ground as a thoughtful and comprehensive starting point in understanding American defense policy and its role in the world today.

Short of General War Harry Richard Yarger, Army War College (U.S.). Strategic Studies Institute, 2010. At the end of the first decade of the 21st century, the United States is involved in two ongoing wars, faces a significant international terrorist threat, and is witnessing an escalation of international resistance to its leadership of the global world order. Looking out to 2025, many see the potential for a prolonged period of instability as a

result of competing economic models demographics the rise of new international actors and the resurgence old ones climate change and the scarcity of resources The range of stability challenges will stretch the capabilities of any military force structure and require innovative thinking on the part of policymakers and military professionals alike on the appropriate development and use of the military element of power In this anthology 16 students of the U S Army War College Class of 2008 offer their perspectives on the use of military power across the spectrum of conflict in the 21st century short of or following general war and provide insights into the necessary force structure policy strategy and doctrinal approaches for future success Beyond a focus on operations short of general war these writings share in common a worthwhile idea or set of ideas that can materially contribute to how the U S military can best conduct full spectrum operations Collectively these essays reveal the innovative thinking and diversity and depth of thought of the U S and foreign military and civilian agency personnel that comprise each student body at the U S Army War College as they prepare themselves to become senior leaders and fulfill their roles in their militaries or agencies This resource offers 16 students of the U S Army War College Class of 2008 perspectives and forecasts for the use of military power through year 2025 Scholars and policymakers alike may find these essays beneficial for long term strategy planning Related products Navies and Soft Power Historical Case Studies of Naval Power and the Nonuse of Military Force can be found here <https://bookstore.gpo.gov/products/sku/008/046002908> Lessons Encountered Learning From the Long War can be found here <https://bookstore.gpo.gov/products/sku/008/029006197> The Asia Pacific Century Challenges and Opportunities can be found here <https://bookstore.gpo.gov/products/sku/008/070008688> Other products produced by the U S Army Strategic Studies Institute are available here <https://bookstore.gpo.gov> agency 1609
