Pool, Lawrence E. Schultze, 1990 *Surfactants Europa* Gordon L. Hollis, 2007-10-31 *Surfactants Europa* 3rd Edition provides easy access to current product information on surface active agents surfactants manufactured and sold in Europe It contains valuable data on approximately 9 000 trade names from more than 80 suppliers including chemical description and composition general property application and manufacturer information The directory contains company and trade name indexes with page references and provides a very useful listing of companies with full contact details including European divisions and agents The products listed in the directory find applications in a wide variety of branches of the chemical manufacturing industry including detergent and cleaning products

agrochemicals construction cosmetics food oil paint paper pharmaceuticals plastics and textiles The directory is edited by Dr Gordon Hollis an established consultant in the surfactants field and author of four respected surfactants directories Surfactants Europa 3rd Edition will be an essential reference directory for research and development personnel and laboratory staff in general It will also be useful for technical departments and purchasing sales departments not only in the detergent industry but in many industries where surfactants are used **Detergents and the Environment** Milan Johann Schwuger,1996-09-12 Offers coverage of the environmental behaviour of detergent additives focusing on physiochemical interactions with soil and sediments This text presents the current state of knowledge on recently introduced detergent additives including zeolites polycarboxylate compounds ethylene dinitrilotetraacetic acid EDTA and nitrilotriacetic acid NTA

Environmental and Human Safety of Major Surfactants Sylvia S. Talmage,2020-04-08 The book summarizes and reviews the environmental and human safety of two classes of nonionic surfactants alcohol ethoxylates AE and alkylphenol ethoxylates APE This unique resource contains critical data from published sources as well as from unpublished studies submitted by Soap and Detergent Association member companies It reviews information on product chemistry and analysis biodegradation environmental levels including fate and distribution aquatic toxicity and human safety Recently developed analytical techniques for the extraction separation detection and measurement of nonionic surfactants and their metabolites in environmental samples are described Results of biodegradation studies performed with a variety of test systems are tabulated as are results of field studies at wastewater treatment plants Reported comparisons of environmental levels with results of acute and chronic aquatic toxicity tests are provided The information on the toxicity and irritation potential of AE and APE surfactants includes data from in vitro mammalian and human studies Mixed Surfactant Systems Keizo Ogino,Masahiko Abe,1992-12-22 This work describes the solubility solution properties thermodynamics miscibility solubilization mesomorphic character and other physical properties of mixed surfactant systems presenting both theoretical analysis and a wide range of practical applications Equations clarify complex and abstract constructs The book also treats mixed critical micelle concentrations surface tension flotation and absorption in terms of thermodynamic models explores the miscibility of fluorocarbon and hydrocarbon surfactants in the micelles covering micelle formation liquid liquid solubility and thermodynamics of mixed micellization determines the mean aggregation number by steady state quenching methods and analyzes the composition of mixed micelles discusses the mechanisms and experimental studies of adsorption from mixed surfactant systems examines surface activity of surfactant mixtures mixing phenomena and liquid crystal phase behaviour and reviews means of investigation that use ion specific electrodes light scattering and NMR and fluorescence probing
