The Nonprofit Challenge Doug White, 2010-10-15 Nonprofit organizations hold a special place in society as the nation's ethical sector. They promote service, goodwill, and kindness and serve to better humanity. Like any business, however, they can also experience ethical indiscretions. The group of organizations whose sole purpose in this world is to be good and to spread that good has yet to fully form an operational code of ethics, a code that promotes humanity as only the nonprofit sector can. Describing the challenges facing today's charities, Doug White explains how nonprofits must reassess their commitment to their role in society. This corrective journey can serve as a role model for all the for-profit businesses as well as the government sector. By reexamining the business of philanthropy with a new and ethics-based mindset, nonprofits can push themselves to be their very best and continue to make the world a better place.

Nonprofit Governance Chris Cornforth, William A. Brown, 2013-07-04 The current fashion for rolling back the state has seen the nonprofit or third sector playing an increasing role in what were previously the heartlands of the public sphere. The growing significance of the sector and its increasing reliance on public funds mean it has also attracted increased scrutiny. From outside the sector, concerns have been raised about the accountability and performance of nonprofit organizations. From within the sector, there has been considerable debate about whether the increased reliance on government contracts is in danger of undermining the sector's independence. As a result, the spotlight has fallen on governance arrangements and whether they are adequate to ensure that nonprofit organizations are effective and accountable for their actions and able to retain their independence. This collection offers a comprehensive assessment of research on the governance of nonprofit organizations. Nonprofit governance research has been dominated by the study of boards of unitary organizations and has paid insufficient attention to the multi-level nature of governance, governance relationships and dynamics, and the contribution of actors other than board members to governance processes. Drawing on the research of leading scholars in the US, UK, Canada, and Australia, this book presents new perspectives on non-profit governance which help to overcome these weaknesses. Written in an accessible manner, the

book will be of value to scholars researchers students reflective practitioners and governance consultants and advisers
