In the vast majority of patients if treated for cell cycle studies and oncogene anti appropriately it is associated with a benign oncogene regulation because they are unaware clinical course. Why then does it hold a con of the often fundamental dichotomy between continuing fascination for so many physicians thyroid malignancy and prognosis? Third the answer is probably directly dependent very nature of the benign clinical course has suggested to the major health research fund on the very benign nature of most thyroid malignancies that thyroid cancer is not worthy malignancies. While there are terrible exceptions of study in a time of scarce resources the follicular and papillary thyroid cancer. Nothing could be further from the truth. Cells behave in a way quite alien to common. This gratifying clinical course is the very reason neoplasia since they grow and metastasize why the study of human thyroid cancer has the slowly. We believe that if only we could understand potential for contributing further to our fund stand such a transformed state we would be able to learn a great deal about the normal and abnormal understanding of malignancy and abnormal regulation of the cell cycle and perhaps more importantly the mechanisms by which the human body can resist neoplastic.
