Nonzero History Evolution And Human Cooperation:

Nonzero Robert Wright, 2001 In a book sure to stir argument for years to come Robert Wright challenges the conventional view that biological evolution and human history are aimless Ingeniously employing game theory the logic of zero sum and non zero sum games Wright isolates the impetus behind life's basic direction the impetus that via biological evolution created complex intelligent animals and then via cultural evolution pushed the human species towards deeper and vaster social complexity In this view the coming of today's independent global society was in the cards not quite inevitable but as Wright puts it so probable as to inspire wonder In a narrative of breathtaking scope and erudition yet pungent wit Wright takes on some of the past century's most prominent thinkers including Isaiah Berlin Karl Popper Stephen Jay Gould and Richard Dawkins Wright argues that a coolly specific appraisal of humanity's three billion year past can give new spiritual meaning to the present and even offer political guidance for the future This book will change the way people think about the human prospect

Nonzero Robert Wright, 2001-04-20 In his bestselling *The Moral Animal* Robert Wright applied the principles of evolutionary biology to the study of the human mind Now Wright attempts something even more ambitious explaining the direction of evolution and human history and discerning where history will lead us next In *Nonzero: The Logic of Human Destiny* Wright asserts that ever since the primordial ooze life has followed a basic pattern Organisms and human societies alike have grown more complex by mastering the challenges of internal cooperation Wright's narrative ranges from fossilized bacteria to vampire bats from stone age villages to the World Trade Organization uncovering such surprises as the benefits of barbarian hordes and the useful stability of feudalism Here is history endowed with moral significance a way of looking at our biological and cultural evolution that suggests refreshingly that human morality has improved over time and that our instinct to discover meaning may itself serve a higher purpose Insightful witty profound *Nonzero* offers breathtaking implications for what we believe and how we adapt to technology's ongoing transformation of the world

We Alone David Western, 2020-11-24 A thoughtful exploration of how humans have endangered the Earth but can pull it back from the brink as told by a renowned conservationist This personal and thoughtful book by renowned Kenya conservationist David Western traces our global conquest from Maasai herders battling droughts in Africa to the technological frontiers of California Western draws on a half century of research in the savannas and his own life's journey to argue that conservation is not a modern invention The success of all societies past and present lies in conservation practices breaking biological barriers and learning to live in large cooperative groups able to sustain a healthy environment Our ecological emancipation from nature enabled us to expand our horizons from conserving food and water for survival to saving whales elephants and our cultural heritage In the Anthropocene our scientific knowledge and modern sensibilities offer hope for combating global warming and creating a planet able to sustain the wealth of life but only if we use our unique cultural capacity of cooperation to plan our future

The European Union and Emerging Powers in the 21st Century Sven Biscop, 2016-02-11 The emergence of new

powers fundamentally questions the traditional views on international relations multilateralism or security as a range of countries now competes for regional and global leadership economically politically technologically and militarily As the focus of international attention shifts from the Atlantic to the Pacific the European states in particular are seen to lose influence relative to the emerging economic powerhouses of China Russia India and Brazil European nations find themselves too small to engage meaningfully with these continent sized powers and in an increasingly multipolar world are concerned their influence can only continue to decline This book analyses the shifts in the structure of global power and examines the threats and opportunities they bring to Europe Leading European Contributors reflect on how the EU can utilise collective strength to engage and compete with rapidly developing nations They examine perceptions of the EU among the emerging powers and the true meaning and nature of any strategic partnerships negotiated Finally they explore the shape and structure of the international system in the 21st century and how the EU can contribute to and shape it *The Myth Gap* Alex

Evans, 2017-01-12 Why with absolutely no idea what Brexit actually meant did the UK vote for Brexit Why rather than vote for the best qualified candidate ever to stand as US President did voters opt for a reality TV star with no political experience In both cases the winning side promised change and offered hope They told a story voters longed to hear And in the absence of greater more unifying narratives then true or not voters plumped for the best story available Once upon a time our society was rich in stories They brought us together and helped us to understand the world and ourselves We called them myths Today we have a myth gap a vacuum that Alex Evans argues powerfully and persuasively is both dangerous and an opportunity In this time of global crisis and transition mass migration inequality resource scarcity and climate change It is stories rather than facts and pie charts that will animate us and bring us together It is by finding new myths those that speak to us of renewal and restoration that we will navigate our way to a better future Drawing on his first hand experience as a political adviser within British government and at the United Nations and examining the history of climate change campaigning and recent contests such as Brexit and the US presidential election Alex Evans explores how tomorrow s

activists are using narratives for change how modern stories have been used and abused where we might find the right myths that will take us forward *Open* Johan Norberg, 2020-09-03 AN ECONOMIST BOOK OF THE YEAR Humanity s embrace of openness is the key to our success The freedom to explore and exchange whether it s goods ideas or people has led to stunning achievements in science technology and culture As a result we live at a time of unprecedented wealth and opportunity So why are we so intent on ruining it From Stone Age hunter gatherers to contemporary Chinese American relations *Open* explores how across time and cultures we have struggled with a constant tension between our yearning for co operation and our profound need for belonging Providing a bold new framework for understanding human history bestselling author and thinker Johan Norberg examines why we re often uncomfortable with openness but also why it is essential for progress Part sweeping history and part polemic this urgent book makes a compelling case for why an open world with an

open economy is worth fighting for more than ever

Human Frontiers Michael Bhaskar, 2022-08-02

Why has the flow of big world changing ideas slowed down A provocative look at what happens next at the frontiers of human knowledge The history of humanity is the history of big ideas that expand our frontiers from the wheel to space flight cave painting to the massively multiplayer game monotheistic religion to quantum theory And yet for the past few decades apart from a rush of new gadgets and the explosion of digital technology world changing ideas have been harder to come by Since the 1970s big ideas have happened incrementally recycled focused in narrow bands of innovation In this provocative book Michael Bhaskar looks at why the flow of big world changing ideas has slowed and what this means for the future Bhaskar argues that the challenge at the frontiers of knowledge has arisen not because we are unimaginative and bad at realizing big ideas but because we have already pushed so far If we compare the world of our great great great grandparents to ours today we can see how a series of transformative ideas revolutionized almost everything in just a century and a half But recently because of short termism risk aversion and fractious decision making we have built a cautious unimaginative world Bhaskar shows how we can start to expand the frontier again by thinking big embarking on the next Universal Declaration of Human Rights or Apollo mission and embracing change

The Arrogance of Distance

Stan Haski, 2005-11

The Arrogance of Distance outlines major stages of humanity's exertions to advance from a simple tribe to the modern state based on the rule of law and individual freedom It traces the main stages of the rise of the West from tribalism through ancient Israel Greek city states Rome Christianity European feudalism the Renaissance the Reformation and Counter reformation the Enlightenment capitalism to modernity The book resonates those features of the West that are considered decisive in the West's success in the competition among civilizations It recalls the values customs laws and institutions that have contributed to the emergence of the long economic scientific and in many cases cultural distance between the West and the Rest However that very distance made the West arrogant as it has more recently been eroding the very principle of balance among human values and institutions Nothing too much warned the ancient Greeks It adumbrates the main symptoms and mechanisms of its XX

century decadence reflected among other things in the rise of totalitarian states in the I half of the XX century and the establishment of counter cultures extreme individualism multiculturalism and affirmative actions of unlimited duration in the II half of the last century Finally it outlines the possible measures that could check the progress of moral hazard recover West s self confidence and help restore the culture of freedom individual responsibility and economic prosperity as well as to better equip the West in its fight against the scourge of terrorism Paradox in the Contrivance of Human Development

Robert Kowalski,2014-10-25 Paradox in the Contrivance of Human Development This book crosses disciplinary boundaries in a way that few books on human development do Its strengths come from the fresh perspectives which emerge from the diverse fields that the author draws upon e g Central Banking Child Protection Environment Extension Food Security SMEs Water and Sanitation to name a few It is an anthology of the author s recently published works with a leavening of contemporary material The objective is to draw this rich material into a coherent whole that will meet the needs and interests of professionals students and lay enthusiasts alike The author s insights come from his extensive experience juxtaposed with an academic perspective and educative engagement This experience has been gained over many years working with various international development agencies from multilateral and bilateral donors to International Financial Institutions UN agencies non government organisations national and local institutions The supportive underpinning scholarship is both eclectic and thoroughgoing augmenting essays on anthropology economics environment management philosophy psychology and sociology The end result is a unique exploration of the issues that confront the theory and practice of human development **The Dawn of Agriculture and the Earliest States in Genesis 1-11** Natan

Levy,2023-11-29 This book invites a close textual encounter with the first 11 chapters of Genesis as an intimate drama of marginalised peoples wrestling with the rise of the world s first grain states in the Mesopotamian alluvium The initial 11 chapters of Genesis are often considered discordant and fragmentary despite being a story of beginnings within the context of the Bible Readers discover how these formative chapters cohere as a cross generational account of peoples grappling with the hegemonic spread of domesticated grain production and the concomitant rise of the pristine states of Mesopotamia The book reveals how key episodes from the Genesis narrative reflect major societal revolutions of the Neolithic period in Mesopotamia through a three fold hermeneutical method literary analysis of the Bible and contemporary cuneiform texts modern scholarship from archaeological anthropological ecological and historical sources and relevant exegesis from the Second Temple and rabbinical era These three strands entwine to recount a generally sequential story of the earliest archaic states as narrated by non elites at the margins of these emerging state spaces The Dawn of Agriculture and the Earliest States in Genesis 1 11 provides a fascinating reading of the first 11 chapters of Genesis appealing to students and scholars of the Hebrew Bible and the Near East as well as those working on ecological injustice from a religious vantage point

Foreign Policy in Iran and Saudi Arabia Robert Mason,2014-12-22 Saudi Arabia with its US alliance and abundance

of oil dollars has a very different economic story to that of Iran which despite enormous natural gas reserves has been hit hard by economic trade scientific and military sanctions since its 1979 revolution Robert Mason looks at the effect that economic considerations such as oil gas sanctions trade and investment have on foreign policy decision making processes and diplomatic activities By examining the foreign policies of Saudi Arabia and Iran towards each other and towards the wider Middle East and beyond Mason seeks to highlight how oil policy including oil production pricing and security of supply and demand is the paramount economic factor which drives the diplomacy and rivalry of these two pivotal regional powers By comparing the foreign policy of Saudi Arabia and Iran towards the international community and the US in particular Mason presents the very different economic and political trajectories of these two countries In the case of Saudi Arabia it has long been oil which has given the country importance both within the region and on an international scale This has made it a vital ally for the West which culminated in the stationing of US troops on Saudi soil in the run up to the Gulf War of 1991 In contrast Iran's resistance strategy has rather than concentrating on relationships with the West instead looked to a number of other players such as those in Central Asia and Latin America Mason uses the Saudi and Iranian cases to illustrate the combination of ideological geo strategy and economic resources that have insulated these two regimes against internal and external pressures and resulted in their dominance in the regional system By concentrating on the economic factors in alliance building and alliance deconstruction Mason offers vital analysis for researchers of international relations in the Middle East and the processes involved in the formation of foreign policy

Nomads, Empires, States Kees van der Pijl, 2007-10-20 Shortlisted for the Deutscher Memorial Prize 2008 How we think about international relations theory needs to change Kees van der Pijl argues that by making the nation state the focus of international relations the discipline has become Euro centric and a historical and that theories of imperialism and historic civilisations and their relation to world order have been discarded With more than half the world's population living in cities with unprecedented levels of migration global politics is present on every street corner The international is no longer only a balance of power among states but includes tribal relations making a comeback in various ways Outlining a new approach to IR theory the book makes a case for a re reading of world history in terms of foreign relations and shows what it reveals about both our past and our future

The Manifesto for Teaching Online Sian Bayne, Peter Evans, Rory Ewins, Jeremy Knox, James Lamb, 2020-09-15 An update to a provocative manifesto intended to serve as a platform for debate and as a resource and inspiration for those teaching in online environments In 2011 a group of scholars associated with the Centre for Research in Digital Education at the University of Edinburgh released The Manifesto for Teaching Online a series of provocative statements intended to articulate their pedagogical philosophy In the original manifesto and a 2016 update the authors counter both the impoverished vision of education being advanced by corporate and governmental edtech and higher education's traditional view of online students and teachers as second class citizens The two versions of the manifesto were much discussed shared

and debated In this book Si n Bayne Peter Evans Rory Ewins Jeremy Knox James Lamb Hamish Macleod Clara O Shea Jen Ross Philippa Sheail and Christine Sinclair have expanded the text of the 2016 manifesto revealing the sources and larger arguments behind the abbreviated provocations The book groups the twenty one statements Openness is neither neutral nor natural it creates and depends on closures Don t succumb to campus envy we are the campus into five thematic sections examining place and identity politics and instrumentality the primacy of text and the ethics of remixing the way algorithms and analytics recode educational intent and how surveillance culture can be resisted Much like the original manifestos this book is intended as a platform for debate as a resource and inspiration for those teaching in online environments and as a challenge to the techno instrumentalism of current edtech approaches In a teaching environment shaped by COVID 19 individuals and institutions will need to do some bold thinking in relation to resilience access teaching quality and inclusion
