Nordic Security And The Great Powers:

Nordic Security And The Great Powers John C. Ausland, 2019-04-03 This book contains a remarkable amount of information about Soviet intelligence activities It includes a partial list of Soviet agents which the Nordic countries expelled after 1970 and discusses the security policies of these countries *Westview Special Studies in International Security*,

Northern Security and Global Politics Ann-Sofie Dahl, Pauli Järvenpää, 2013-08-15 This book takes a comprehensive approach to security in the Nordic Baltic region studying how this region is affected by developments in the international system The advent of the new millennium coincided with the return of the High North to the world stage A number of factors have contributed to the increased international interest for the northern part of Europe climate change resulting in ice melting in Greenland and the Arctic and new resources and shipping routes opening up across the polar basin foremost among them The world is no longer unipolar and not yet multipolar but perhaps post unipolar indicating a period of flux and of declining US unipolar hegemony Drawing together contributions from key thinkers in the field Northern Security and Global Politics explores how this situation has affected the Nordic Baltic area by addressing two broad sets of questions First it examines what impact declining unipolarity with a geopolitical shift to Asia a reduced role for Europe in United States policy and a more assertive Russia will have on regional Nordic Baltic security Second it takes a closer look at how the regional actors respond to these changes in their strategic environment This book will be of much interest to students of Nordic and Baltic politics international security foreign policy and IR Nordic Security in the 1990s Jan Øberg, 1992 The

Nordic countries have traditionally been seen as peaceful welfare states with egalitarian relations within each and between them This ethos has also influenced the role their governments have played in international affairs However in recent years this role has become increasingly reactive based on an outmoded world view The Nordic countries both individually and as a bloc must now make a choice about future strategy within the European and global framework whether to remain on the periphery of European politics and continue in a reactive fashion or to engage in the broader framework of the post cold war era This study assesses the possibilities for the countries of the region and the contribution they can make to the changing Europe in terms of security and sustainable regional development **Finland's Search for Security through Defence,**

1944-89 Risto E.J. Penttilä, 1991-06-18 Based on the author's doctoral dissertation at Oxford this study examines with a historical perspective the national defence strategy of Finland 1944-1989 The author explores Finland's dilemma with respect to its geographic position and the Cold War politics between the US and the USSR Finland's Relations with the Soviet Union, 1944-84 R. Allison, 1985-02-18 The Oxford Handbook of Swedish Politics Jon Pierre, 2016 The Handbook provides a broad introduction to Swedish politics and how Sweden's political system and policies have evolved over the past few decades **Problems of Communism**, 1989 **Post-Cold War Identity Politics** Marko Lehti, David J

Smith, 2004-11-23 During the past decade northern Europe has started to assume an identity of its own Categories of East

and West have become blurred challenging as well the idea of what it means to be Nordic Post Cold War Identity Politics maps this process in Scandinavia Looking at projects designed to help regional development in the Nordic countries it assesses whether a new way of defining Northernness is emerging The book highlights the existence of co existing and to some extent competing region building projects in northern Europe It demonstrates how they are all efforts by existing nations to redefine their role in Europe at a time of change and points to how they might develop in the future Collision of Empires G. Bruce Strang, 2016-05-23 Italy's invasion of Ethiopia in 1935 marked a turning point in interwar Europe The last great European colonial conquest in Africa the conflict represented an enormous gamble for the Fascist dictator Benito Mussolini He faced a challenge not only from a stout Ethiopian defence but also from difficult logistics made worse by the League of Nations half hearted sanctions Mussolini faced down this opposition and Italian troops aided by air superiority and liberal use of yprite gas conquered Addis Ababa within eight months a victory that shocked many military observers of the time with its speed and suddenness The invasion had enormous repercussions on European international relations In the midst of a national election campaign the British National Government had felt constrained to support the League despite fears that sanctions through the League could lead to war with Italy The concentration of the Royal Navy in the Mediterranean Sea alienated Mussolini and placed the French government on the horns of dilemma should France support its military partner Italy or its more important potential ally Great Britain French attempts to mark out a middle ground did little to placate the Duce and the crisis seemed to develop a deep rift between Fascist Italy and the Anglo French democracies while at the same time creating a crisis in Anglo French relations Mussolini turned towards Nazi Germany in an attempt to end his diplomatic isolation during the sanctions episode although Hitler considered the Duce's friendship a mixed blessing The question of American adherence to sanctions increased ill will between British politicians and the Roosevelt administration in Washington as each tended to blame the other for the failure of oil sanctions and the collapse of collective security The international crisis posed similarly thorny problems for the smaller powers of Europe and for Japan and the Soviet Union The crisis impeded common defence against Fascist expansionism while giving impetus to claims of the revisionist powers Despite the tremendous importance of the international crisis however little new work on the subject has appeared in recent decades In this volume an international cast of contributors take a fresh look at the crisis through the lens of new evidence and new approaches to international relations history to provide the most comprehensive coverage of the crisis currently possible and their work provides new frames of reference for exploring imperialism collective security and genocide **International Society** Cornelia Navari, 2020-12-22 This book provides an introduction to and analysis of the English School's views on International Relations as they developed from the somewhat vague state society distinction to the present focus on foundation institutions regional organisation and the globalization of international society It focuses on key thinkers and texts and turning points and moves our understanding of the English School beyond the past work of the British

Committee to the more recent work of Barry Buzan et al to offer a comprehensive overview and interrogation from the leading lights of this arm of International Relations thought This volume is one of the cornerstones of the EISA sponsored Trends in European IR Theory series complementing the volumes on International Political Theory Liberalism Realism International Political Economy the post positivist tradition and Feminism published for the centenary of IR as a discipline

Nordic Security at the Turn of the Twenty-First Century Ciro Elliott Zoppo, 1992-05-30 High ranking government officials defense analysts and scholars focus on the geopolitics and security of the Nordic region at a time when East West relations in Europe are undergoing momentous changes Experts from Scandinavia Europe and the United States examine the impact of the United States and the Soviet Union on Scandinavian security in terms of defense doctrines and deployment and the evolving technologies of defense paying particular attention to neutral Finland and Sweden This strategic analysis edited by Ciro Zoppo is intended for academicians and policymakers in the fields of military studies political science Nordic and European affairs and East West relations This survey of key problems and prospects in the Northern cap of the globe offers the historical background necessary for understanding the foreign policies and domestic politics of Norway Finland Sweden Iceland and Denmark The study is unique in its detailed examination of military policy and emerging technologies alongside a discussion about their economic consequences for the countries in the region The cross national team of experts also considers the significance of the changing political and technological environment for the future of Swedish and Finnish defense and neutrality

Nuclear Disengagement in Europe Stockholm International Peace Research Institute, 2020-11-19 In the early 1980s there had been an upsurge of public concern over the nuclear threat to Europe Already saturated with nuclear weapons Europe faced controversial new deployments and there was alarm over military strategies for nuclear war in the region It is in this context that the idea of nuclear weapon free zones had captured the popular imagination and became a political issue in Europe Not only would such zones build confidence and raise the nuclear threshold but they would be first steps towards a more comprehensive elimination of nuclear weapons Originally published in 1983 Nuclear Disengagement in Europe probes the question of nuclear weapon free zones in the region Pugwash and SIPRI arranged a meeting at which an international team of lawyers scientists politicians and military experts gave background information and provided an appraisal of problems regarding the zone initiatives as well as benefits that would accrue Possible elements in a European zone arrangement were elaborated on and procedures towards the establishment of such a zone were suggested

The Nordic Countries and the European Union Caroline Grøn, Peter Nedergaard, Anders Wivel, 2015-02-20 In European policy making the Nordic countries are often viewed as a relatively coherent bloc in international and European affairs the Nordic position has traditionally been conditioned on being different from and better than Europe This book offers a coherent original and systematic comparative analysis of the relationship between the Nordic countries and the European Union over the past two decades It looks at the historical frame institutions and policy areas

addressing both traditional EU areas such as agriculture and more nascent areas affecting the domestic and foreign policies of the Nordic countries In doing so it examines how the Nordic approach to European policy making has developed and explains why the Nordic countries are similar in some respects while differing in others when engaging with EU institutions In highlighting the similarities and differences between the Nordic countries it explores what lessons positive and negative may be drawn from this approach for the Nordic countries and other small states This book will be of interest to scholars students and practitioners engaged with the Nordic Countries EU politics and policy making European politics and comparative politics

Navies in Northern Waters Rolf Hobson, TOM KRISTIANSEN, 2004-08-02 *Navies in Northern Waters* is a collection of articles covering the roles played by the secondary navies of northern European powers and the United States within the maritime balance of power The contributions covering the 18th and 19th centuries focus on their relations with each other as they sought to create a counterweight to the dominant naval power of Britain The inter war years are treated from the perspectives of international disarmament efforts within the framework of collective security and the subsequent naval rivalry in the Baltic area in the years leading up to the Second World War For the post 1945 period the contributions concentrate on superpower rivalry in northern waters during the Cold War the changing aspects of security policy since the collapse of the Soviet Union and the particular challenges facing small coastal states policing extensive waters of increasing economic importance

Semialignment and Western Security Nils Ørvik, 2021-01-26 This book first published in 1986 is a major study of semialignment and a review of the individual nations within NATO to which the model could be applied Towards the end of the Cold War there arose within NATO this intermediate category between alignment and nonalignment whereby a member state enjoyed the status and facilities of NATO membership while disassociating itself from certain NATO programmes This book analyses the phenomenon and the possibility that it weakened the credibility of NATO deterrence and the defence posture versus the Soviet Union

Small States and International Security Clive Archer, Alyson Bailes, Anders Wivel, 2014-03-14 This book explains what small states are and explores their current security challenges in general terms and through specific examples It reflects the shift from traditional security definitions emphasizing defence and armaments to new security concerns such as economic societal and environmental security where institutional cooperation looms larger These complex issues linked with traditional power relations and new types of actors need to be tackled with due regard to democracy and good governance Key policy challenges for small states are examined and applied in the regional case studies The book deals mainly with the current experience and recent past of such states but also offers insights for their future policies Although many of the states covered are European the study also includes African Caribbean and Asian small states Their particular interest and relevance is outlined as is the connection between their security challenges and their smallness Policy lessons for other states are then sought The book is the first in depth multi continent study of security as an aspect of small state governance today It is novel in placing the security dilemmas of small

states in the context of wider ideas on international and institutional change and in dealing with non European states and regions State ,1988 **A Nuclear-free Zone and Nordic Security** Ulkopoliittinen Instituutti (Finland),1975 **New Europe in Transition** Peter Anderson,Georg Wiessala,Christopher Williams,2001-01-01 The essays address the key questions currently confronting Europe seeking to provide a broad based introduction to the post millennial politics of this complex continent These questions are addressed on three levels first at the level of the major institutions which straddle large parts of Europe NATO and the OSCE and the E U second from the perspective of a large sample of European countries including parts of the former Soviet Union and third with regard to the economic cultural and social dimensions of European society both East and West
