History of Neurology Stanley Finger, Francois Boller, Kenneth L. Tyler, 2009-12-08 Handbook of Clinical Neurology Volume 95 is the first of over 90 volumes of the handbook to be entirely devoted to the history of neurology. The book is a collection of historical materials from different neurology professionals. The book is divided into 6 sections and composed of 55 chapters organized around different aspects of the history of neurology. The first section presents the beginnings of neurology: ancient trepanation, its birth in Mesopotamia, ancient Egypt, the emergence of neurology in the biblical text and the Talmud, neurology in the Greco-Roman world and the period following Galen, neurological conditions in the European Middle Ages and the development of neurology in the 17th and 18th centuries. The second section narrates the birth of localization theory, the beginning of neurology and histological applications, neuroanatomy, neurophysiology, surgical neurology and other anatomical clinical methods. The third section covers further development of the discipline including methods of neurological illustration and hospitals in neurology and neurosurgery. This section also narrates the history of child neurology, neurodisability and neuroendocrinology. It also features the application of molecular biology on clinical neurology. The fourth section describes the dysfunctions of the nervous system and their history. The fifth and last section covers the regional landmarks of neurology and the different treatments and recovery. The text is informative and useful for neuroscience or neurology professional researchers, clinical practitioners, mental health experts, psychiatrists and academic students and scholars in neurology. A comprehensive accounting of historical developments and modern day advancements in the field of neurology. State of the art information on topics including brain damage and dysfunctions of the nervous system. New treatments and recovery methods from redundancy to vicariation and neural transplantation amongst others.

Clinical Approach To Medicine, A (2nd Edition) Yong Yau Ong, 2004-12-22 In this new edition of A Clinical Approach to Medicine the editor has assembled a panel of leading clinicians and researchers and reorganized the material in the key areas of medicine: cardiology, endocrinology, gastroenterology, hematology, neurology, oncology, rheumatology, renal medicine and respiratory medicine. This book is unique; it reflects the experience of leading experts on patterns of disease in the Asia Pacific region. There are several other similar books but those are by authors from the West and therefore offer a different perspective. The book also includes discussions on genetic diseases, infection and antimicrobial resistance to antibiotics, highlighting local incidences and statistics. Each

chapter starts with the basic concepts of a particular topic and gradually develops the theme to present the state of the art in the topic With its focus on practices unique to Asia Pacific this book is a must for the student practicing clinician and research scientist interested in the latest developments in this part of the world

Parenting with Reason Esther Yoder Strahan,Wallace E. Dixon, Jr.,J. Burton Banks,2009-12-04 Sometimes it feels as though everybody has an opinion on how you should bring up your child and no two people seem to agree on how it should be done for the best Parenting with Reason cuts through the masses of confusing and often contradictory advice about parenting by providing hard evidence to back up the tough decisions all parents face Unlike many self help guides to parenting which are based on the opinion of one author this book is based on many findings from scientific research giving you a trustworthy evidence based guide to help see your way through parenting dilemmas Written by a clinical psychologist a developmental psychologist and a doctor of family medicine the book looks at pressing questions such as What should I do when my child acts up How can I get my baby to sleep through the night and How do I begin to toilet train my child The authors who are also parents themselves debunk common myths about parenting such as the notion that a healthy baby needs to be able to breastfeed at will throughout the night or the idea that children who are adopted need specialized counselling They also cover issues such as how children might be affected by seeing violence on television how a parent s psychological health can affect their child what the scientific evidence is for and against circumcision and how divorce and adoption affect a child s development The end of each chapter gives you The Bottom Line a handy summary of the key points of each issue This book is ideal for new or prospective parents and paediatricians family health providers and anyone who works with children and their parents will also find the book s objective scientific approach useful in their work
