Normativity And Empirical Research In Theology Empirical Studies In Theology:

Normativity And Empirical Research In Theology Johannes Antonius van der Ven, Michael Scherer-Rath, 2004 In this publication researchers and academics from South Africa Great Britain Switzerland Germany and the Netherlands provide theoretical explanations and examples of empirical research with regard to the fundamental question of the role of theological normativity in empirical research in theological fields *Empirical Theology in Texts and Tables* Leslie J. Francis, Mandy Robbins, Jeff Astley, 2009 Empirical theology offers fresh and stimulating insights into the concerns of both the Church and the Academy It does this by accessing relevant empirical evidence using the tools of the social sciences and placing this evidence in the context of theological critique and contemporary debate In this pioneering collection of focused essays leading experts of empirical theology illustrate key perspectives within this rapidly expanding discipline The first section of the book explores theoretical issues underpinning the main methods of obtaining empirical data and the use of these data within theology The other two sections display the role both of qualitative studies and of the analysis of quantitative data in exploring a range of theological beliefs and religious social and educational concerns The Preacher as 'First Listener' Filip De Cavel, 2020-07-15 The preacher's weekly assignment is brutally repetitive Fill the blank page by Sunday at least twice a month if not even more This book offers a biblical theological and empirical grounding to support the preacher's self-reflective listening and sermonizing practices in order for the preacher to be aware of his/her spirituality of listening and discernment **Hermeneutics and Empirical Research in Practical Theology** Chris Hermans, Mary Moore, 2021-09-20 There is a growing consensus among scholars in different countries about the object of practical theology Hans van der Ven has contributed much to this consensus through his writings on the foundations of practical theology the empirical paradigm within practical theology and specific subdisciplines within practical theology especially religious education moral education church development and ministry At the center of this growing consensus is an understanding of the independent hermeneutical role of religious experiences and practices of people in the process of theological theory building If contemporary religious experiences and practices have a critical role with regard to religious tradition and the ministry of this tradition then practical theology cannot just be a form of applied theology The contributors of this volume focus on this hermeneutical core foundations of practical theology and on empirical research as a research method within practical theology in the work of Van der Ven **Shalom, the Spirit and Pentecostal Conversion** Grace Milton, 2015-08-17 In *Shalom the Spirit and Pentecostal Conversion* Grace Milton presents a uniquely practical theological model of Pentecostal conversion centered on empirical data from a congregational case study Pentecostal Charismatic conversion is commonly equated with a dramatic Damascus road type event which directly opposes prevailing theories within the social sciences that conversion is a more gradual process over time This raises the question how far do these Pentecostal stereotypes reflect lived experience In this book for the first time the experiences and beliefs of ordinary Pentecostal

believers are drawn into conversation with conversion theories from the human sciences sociology psychology and anthropology and theology The result is a distinctly Pentecostal model of conversion which interprets religious transformation through the theological lens of Shalom

What Really Matters Jonas Idestrom, Tone Stangeland Kaufman, 2018-06-11 This volume is about ecclesiology and ethnography and what really matters in such academic work How does material from field studies matter in a theological conversation How does theology in various forms matter in analysis and interpretation of field work material How does method matter The authors draw on their research experiences and engage in conversations concerning reflexivity normativity and representation in qualitative theological work The role and responsibility of the researcher is addressed from various perspectives in the first part of the book In the next section the authors discuss ways in which empirical studies are able to disrupt the implicit and explicit normativity of ecclesial traditions and also how theological traditions and perspectives can inform the interpretation of empirical data The final part of the book focuses on the process of creating the stuff that represents the ecclesial context under study What Really Matters is written to serve students and researchers in the field of ecclesiology and ethnography systematic and practical theology and especially those who work empirically or ethnographically broadly speaking The book might be particularly helpful to those who deal with questions of methodology in these academic disciplines This volume offers perspectives that grow out of the Scandinavian context yet it seeks to participate in and contribute to a scholarly conversation that goes beyond this particular location **Doing**

Multidisciplinary Research on Religion, 2024-03-04 Religion is increasingly visible in the contemporary world as a complex phenomenon requiring multidisciplinary research to do justice to the complexity Multidisciplinary research is however though lauded by many notoriously difficult to bring to fruition This volume takes on the challenge to bridge the gap Contributions formulate the challenges many have faced but few yet analysed and put into the hands of researchers concrete tools with which to set about designing and executing multidisciplinary research on religions beliefs and religious behaviour In an era where research funding increasingly expects interdisciplinary collaboration it provides guidance on constructive pathways and pitfalls to avoid Contributors are Riho Altnurme Anders B ckstr m Lori G Beaman Karin Borevi Leon van den Broeke Valerie DeMarinis Victoria Enkvist Jonny L ngstedt Annette Leis Peters Anna Sara Lind Martha Middlemiss L Mon Cecilia Nahnfeldt Per Erik Nilsson Peter Nyn s Margit Warburg and Anne Laure Zwilling **The Chaplain-Researcher**

Niels den Toom, 2022-10-07 In March 2016 the Dutch Case Studies Project began in which about fifty chaplains participated as co researchers in collecting practice based evidence on what chaplains aim for how they pursue it and with what results The chaplain researchers produced case studies which were discussed collaboratively in research communities which were chaired by academic researchers The engagement of chaplains in research can be understood from the development in the profession of integrating research into chaplaincy While it is presumed that research benefits chaplains practices so far the

impact of research on chaplains practice had not been studied Based on mixed methods observation interviews survey focus groups this dissertation describes analyzes and reflects on the perceived change of chaplains professionalism as a result of their participation in the Case Studies Project This practical theological research provides insight in the value of the double role of chaplain researcher for chaplains professionalism The Concept of Religion ,2015-06-02 In The Concept of Religion Hans Schilderman edits a volume on the definition and empirical study of religion within the changing landscape of modern society Now that we can no longer assume a simple harmony between the scientific concept of religion church doctrine and practiced belief issues concerning the definition and measurement of religion are becoming crucial issues to academic institutions The contributing authors present empirical studies studying issues of lifespan and socialisation at school settings of vocation and profession at church and hospital settings and culture and nation of society at large The volume offers a beautiful sample of the empirical study of religion a conceptual and illustrative overview of the academic field for students and scholars in religion Before the Face of God Hanneke Schaap-Jonker,2008 All over the world millions of people attend services every week and most of them will hear sermons What happens between the sermon and the listener Does the sermon become meaningful to listeners The present study in the fields of practical theology homiletics and psychology of religion combines quantitative and qualitative methods to offer an empirically based approach to the study of preaching Highlighting the psychological factors influencing how a sermon is heard this study draws theoretical insight from the works of D W Winnicott A M Rizzuto and D Bonhoeffer in its examination of the relationship between the meaning of the sermon and the hearer s God image personality and affective state **Perceiving the Other** Trygve Wyller,Hans-Günter Heimbrock,2010-07-21 Perceiving the Other is a Norwegian German collaboration lead by Trygve Wyller and Hans G nter Heimbrock Case examples introduce a new way of approaching ethics It points out that it is possible to show phenomenological ethics in practise The lived experience praxis is as important as the professional experience The research on the field is the dynamics between these two experiences where the professional experience is taken from the general life experience Perceiving the Other has three sections 1 Introduction emphasizing the ethical paradigm shift and presenting the terms relationality connectedness etc The introduction clarifies past and ongoing research and discusses how to develop research with the new perspectives connectedness phenomenology etc 2 Section two consists of five cases from Norwegian and German doctoral dissertations and thesis within professional ethics and theology It gives five thematic sections presenting phenomena as language space gender and body 3 Section three is the conclusion introducing phronetic ethics that is driven from the relational as source of ethics and connectedness The conclusion also discusses the consequences and implications of introducing these perspectives within the fields of theology professional ethics and work among the marginalized **Why Philosophy Matters for the Study of Religion--and Vice Versa** Thomas A. Lewis,2015-12-17 Work in philosophy of religion is still strongly marked by an excessive focus on Christianity and to a lesser extent Judaism almost to

the exclusion of other religious traditions Moreover in many cases it has been confined to a narrow set of intellectual problems without embedding these in their larger social historical and practical contexts Why Philosophy Matters for the Study of Religion and Vice Versa addresses this situation through a series of interventions intended to work against the gap that exists between much scholarship in philosophy of religion and important recent developments that speak to religious studies as a whole This volume takes up what in recent years has often been seen as a fundamental reason for excluding religious ethics and philosophy of religion from religious studies their explicit normativity Against this presupposition Thomas A Lewis argues that normativity is pervasive not unique to ethics and philosophy of religion and therefore not a reason to exclude them from religious studies Lewis bridges more philosophical and historical subfields by arguing for the importance of history to the philosophy of religion He considers the future of religious ethics explaining that the field as whole should learn from the methodological developments associated with recent work in comparative religious ethics and comparative religious ethics should no longer be conceived as a distinct subfield The concluding chapter engages broader post 9 11 arguments about the importance of studying religion arguing that prominent contemporary notions of religious literacy actually hinder our ability to grasp religion s significance and impact in the world today
