**The Science of Religion: A Defence** Donald

Wiebe, 2018-10-16 Donald Wiebe Professor of Philosophy of Religion at Trinity College University of Toronto has spent much of his academic career arguing for a clear demarcation between Theology and Religious Studies The Science of Religion A Defence offers a brilliant overview of Professor Wiebe's contributions on methodology in the academic study of religion of the development of his thinking over time and of his intellectual commitment to a science of religion The work is divided into three parts The first part identifies pertinent connections between religion religious studies and science and why reductionism in the academic study of religion when properly applied can bridge the explanatory gap between the sceptic and the devotee The second part treats conceptual debates in the academic study of religion with particular reference to the place of belief understanding and meaning in the modern study of religion The third part addresses the theological resistance to the scientific study of religion and how that resistance can be overcome Finally two new essays are included a critique on The Preconceptions of a Science of Religion by Anthony J Palma and an accompanying reply by Donald Wiebe The Science of Religion A Defence is an essential resource for both scholarly and non scholarly audiences alike and will be of particular interest to both defenders and critics of a scientific study of religion

*The Learned Practice of Religion in the Modern University* Donald Wiebe, 2019-11-14 In these essays Donald Wiebe unveils a significant problem in the academic study of religion in colleges and universities in North America and Europe that studies almost always exhibit a religious bias To explore this issue Wiebe looks at the religious and moral agendas behind the study of religion showing that the boundaries between the objective study of religion and religious education as a tool for bettering society have become blurred As a result he argues religious studies departments have fostered an environment where religion has become a learned or scholarly practice rather than the object of academic scrutiny This book provides a critical history of the failure of 20th and 21st century scholars to follow through on the 19th century ideal of an objective scientific study of religious thought and behaviour Although emancipated from direct ecclesiastical control and to some extent from sectarian theologizing Wiebe argues that research and scholarship in the academic department of religious studies has failed to break free from religious constraints He shows that an objective scientific study of religious thought and practice is not only possible but the only appropriate approach to the study of religious phenomena

**Studies in the History of Religions** Bentley Layton, **Disciplinary at the Fin de Siècle** Amanda Anderson, Joseph Valente, 2021-03-09 Contemporary celebrations of interdisciplinary scholarship in the humanities and social sciences often harbor a distrust of traditional disciplines which are seen as at best narrow and unimaginative and at worst complicit in larger forms of power and policing **Disciplinary at the Fin de Siècle** questions these assumptions by examining for the first time in so sustained a manner the rise of a select number of academic disciplines in a historical perspective This collection of twelve essays focuses on the late Victorian era in Great Britain but also on Germany France and America in the same formative period The contributors James Buzard Lauren M E Goodlad Liah Greenfeld John Guillory Simon Joyce Henrika Kuklick Christopher Lane Jeff Nunokawa Arkady Plotnitsky Ivan Strenski Athena Vrettos and Gauri Viswanathan examine the genealogy of various fields including English sociology economics psychology and quantum physics Together with the editors cogent introduction they challenge the story of disciplinary formation as solely one of consolidation constraint and ideological justification Addressing a broad range of issues disciplinary formations disciplinary and professionalism disciplines of the self discipline and the state and current disciplinary debates the book aims to dislodge what the editors call the comfortable pessimism that too readily assimilates disciplines to techniques of management or control It advances considerably the effort to more fully comprehend the complex legacy of the human sciences **Theology and California** Fred Sanders, Jason S.
