Religion And The Ambiguities Of Capitalism:

Religion and the Ambiguities of Capitalism Ronald H. Preston, 1991 Divine Economy D. Stephen Long, 2000 What has theology to do with economics They are both sciences of human action but have traditionally been treated as very separate disciplines Divine Economy is the first book to address the need for an active dialogue between the two D Stephen Long traces three strategies which have been used to bring theology to bear on economic questions the dominant twentieth century tradition of Weber's fact value distinction an emergent tradition based on Marxist social analysis and a residual tradition that draws on an ancient understanding of a functional economy He concludes that the latter approach shows the greatest promise because it refuses to subordinate theological knowledge to autonomous social scientific research Divine Economy will be welcomed by those with an interest in how theology can inform economic debate **The Oxford Handbook of Christianity and Economics** Paul Oslington, 2014-01-31 Many important contemporary debates cross economics and religion in turn raising questions about the relationship between the two fields This book edited by a leader in the new interdisciplinary field of economics and religion and with contributions by experts on different aspects of the relationship between economics and Christianity maps the current state of scholarship and points to new directions for the field It covers the history of the relationship between economics and Christianity economic thinking in the main Christian traditions and the role of religion in economic development as well as new work on the economics of religious behavior and religious markets and topics of debate between economists and theologians It is essential reading for economists concerned with the foundations of their discipline historians moral philosophers theologians seeking to engage with economics and public policy researchers and practitioners **SCM Studyguide: Christian Ethics** Messer Neil, 2015-04-21 Providing the level one student with all they will need to know to understand their course fully the textbook covers the major areas of ethical theory and methodology that are key to the use of the Bible in Christian ethics natural law conscience various philosophical approaches to ethics and the influence of liberation theologies **The Right to Development and International Economic Law** Isabella D Bunn, 2012-03-01 The United Nations is commemorating the 25th anniversary of the 1986 Declaration on the Right to Development which proclaimed the right to be an inalienable human right by virtue of which every human person and all peoples are entitled to participate in contribute to and enjoy economic social cultural and political development in which all human rights and fundamental freedoms can be realized The UN now aims to mainstream the right into its policies and operational activities and is reviewing prospects for an internationally binding legal instrument The evolution of the right to development however has been dominated by debates about its conceptual validity and practical ramifications It has been hailed as the cornerstone of the entire human rights system and criticized as a distracting ideological initiative Questions also persist about the role of the right in reforming the international economic order This book examines the legal and moral foundations of the right to development addressing the major issues It then considers the

right to development in the global economy noting the challenges of globalization and identifying key principles such as differential treatment of developing countries participation and accountability It relates the right to broad objectives such as the Millennium Development Goals the human rights based approach to development and environmental sustainability Implications for international economic law and policy in the areas of trade development finance and corporate responsibility are assessed The conclusion looks to the legal and ethical contributions and limitations of the right to development in this new context With an academic and professional background in international law human rights and moral theology the author brings a unique interdisciplinary focus to this timely project
