

## State (4) – 2001

- Success follows more broadly-based campaign by academics, faith groups (including Jews and Muslims) and some Government departments from 1994
- Success achieved in face of significant scepticism about utility of including religious affiliation on part of ONS
- Government rationale for including religious affiliation as supplement to ethnicity – reflected in ordering of questions in census schedule
- No differentiation within Christian category in England and Wales, while all but major religions had to be written in
- Question revised to 'what is your religion?' following testing, which some regarded as 'leading'
- Question was voluntary
- Significant element of proxy responses

Suksi, 2011-07-17 This study focuses on territorial autonomy which is often used in different conflict resolution and minority situations Four typical elements are identified on the basis of the historical example of the Memel Territory and the so called Memel case of the PCIJ distribution of powers participation through elections and referendums executive power of territorial autonomy and international relations These elements are used for a comparative analysis of the constitutional law that regulates the position of six currently existing special jurisdictions the land Islands in Finland Scotland in the United Kingdom Puerto Rico in the United States of America Hong Kong in China Aceh in Indonesia and Zanzibar in Tanzania The current sub state entities examined can be arranged in relation to Memel in a manner that indicates that Hong Kong and the land conform to the typical territorial autonomy while Puerto Rico and Aceh should probably not be understood as territorial autonomies proper At the same time the territorial autonomies can be distinguished from federally organized sub state entities      **Rights, Religious Pluralism and the Recognition of Difference** Dorota Anna Gozdecka, 2015-08-27 Human

Committee on the Budget,2002      *State-Religion Relationships and Human Rights Law* Jeroen Temperman,2010 This book presents a human rights based assessment of the various modes of state religion identification and of the various forms of state practice that characterize these different state religion models This book makes a case for the recognition of a state duty to remain impartial with respect to religion or belief in all regards so as to comply with people s fundamental right to be governed at all times in a religiously neutral manner As this book demonstrates through the various case studies there is increasing interest and concern at the manner in which questions concerning the enjoyment of the right to the freedom of religion or belief bear upon key questions concerning the governance of democratic society Issues raised involve matters concerning employment education expression association and more generally the interface between religion and political life The existing literature often traces these concerns back to the need to consider the place of religion in contemporary society but leaves matters there Another body of academic literature explores the theoretical dimensions of that relationship but fails to connect it to the practice of states in order to test out the propositions which are the product of these reflections The great virtue of this work is that it seeks to unite these various enterprises and engages head on with the challenges which this produces The aim is to demonstrate and illustrate the key contention that there is an emergent right to religiously neutral governance and that this is incompatible with the continuation of systems which offer preference to particular forms of belief system religious or otherwise A chief virtue of this book is that it works through the consequences of this claim in a fearless fashion posing challenges for those states which continue to use their legal frameworks to offer support directly or indirectly for historical dominant or favoured forms of religion or belief It challenges received assumptions and by driving the logic of contemporary human rights thinking to the foundations of state religion relationships performs a valuable service for those engaging with this most difficult and timely of questions Malcolm D Evans Professor of Public International Law University of Bristol

**On Rowan Williams**  
Matheson Russell, 2009-01-01 Theologian, poet, public intellectual and clergyman Rowan Williams is one of the leading lights of contemporary British theology. He has published over twenty books and one hundred scholarly essays in a distinguished career as an academic theologian that culminated in his appointment as Lady Margaret Professor of Divinity at Oxford University. Williams left this post to serve in the Anglican Church, first as Bishop of Monmouth, then Archbishop of Wales, before finally being enthroned in 2003 as the 104th Archbishop of Canterbury. In this collection of essays, a talented younger generation of Australian theologians critically analyzes the themes that bind together Williams's theology. These sympathetic yet probing essays traverse the full breadth of Williams's work, from his studies on Arius, the Desert Fathers, Hegel and Trinitarian theology to his more pastoral writings on spirituality, sexuality, politics and the Anglican Church.
