African Perspectives on Religion and Climate Change Ezra Chitando, Ernst M. Conradie, Susan M.

Kilonzo, 2022-05-12 This book interrogates the contributions that religious traditions have made to climate change discussions within Africa whether positive or negative Drawing on a range of African contexts and religious traditions the book provides concrete suggestions on how individuals and communities of faith must act in order to address the challenge of climate change Despite the fact that Africa has contributed relatively little to historic carbon emissions the continent will be affected disproportionately by the increasing impact of anthropogenic climate change Contributors to this book provide a range of rich case studies to investigate how religious traditions such as Christianity Hinduism Islam and indigenous faiths influence the worldviews and actions of their adherents The chapters also interrogate how the moral authority and leadership provided by religion can be used to respond and adapt to the challenges posed by climate change Topics covered include risk reduction and resilience youth movements indigenous knowledge systems environmental degradation gender perspectives ecological theories and climate change financing This book will be of interest to scholars in diverse fields including religious studies sociology political science climate change and environmental humanities It may also benefit practitioners involved in solving community challenges related to climate change The Open Access version of this book available at <http://www.taylorfrancis.com> has been made available under a Creative Commons Attribution Non Commercial No Derivatives 4.0

license *Faith Movements and Social Transformation* Samta P. Pandya, 2018-12-11 This book examines the role of Hindu inspired faith movements HIFMs in contemporary India as actors in social transformation It further situates these movements in the context of the global political economy where such movements cross national boundaries to locate believers among the Hindu diaspora and others In contemporary neoliberal India HIFMs have become important actors and they realize themselves by making public assertions through service The four pillars of the contemporary presence of such movements are gurus sociality hegemony and social transformation Gurus who spearhead these movements create a matrix of possible meanings in their public discourses which their followers pick up to create messages of personal and social change Sociality is a core strategy of proliferation across such movements and implies social service which is qualified by memories of the guru and what they are believed to embody Hegemony is reflected in the fact that social service in such movements often ominously imbibes right wing or far right Hinduism They propose a model of Hindu inspired social transformation involving faith building into and transforming the civil society The book discusses in a nuanced way several Hindu inspired faith movements of various hues which have made national and international impact This topical book is of

interest to students and researchers in the fields of sociology anthropology social work and social psychology with a special interest in the study of religious movements

How the World's Religions are Responding to Climate Change Robin Globus Veldman, Andrew Szasz, Randolph Haluza-DeLay, 2013-09-11 A growing chorus of voices has suggested that the world's religions may become critical actors as the climate crisis unfolds particularly in light of international paralysis on the issue. In recent years many faiths have begun to address climate change and its consequences for human societies especially the world's poor. This is the first volume to use social science to examine how religions are helping to address one of the most significant and far reaching challenges of our time. While there is a growing literature in theology and ethics about climate change and religion little research has been previously published about the ways in which religious institutions groups and individuals are responding to the problem of climate change. Seventeen research driven chapters are written by sociologists anthropologists geographers and other social scientists. This book explores what effects religions are having what barriers they are running into or creating and what this means for the global struggle to address climate change.

Materialities of Religion Niall Finneran, Christina Welch, 2023-09-22 This book offers an overview of the material expressions of Caribbean religious expressions including those that have been imported through the vehicle of colonialism and which subsequently changed and adapted within the Caribbean Islands and those religious expressions which developed through the contact of African indigenous and imported world views. This book takes a multi disciplinary perspective drawing from subjects as diverse as archaeology religious studies history human geography and anthropology. It introduces current topical debates around the role of colonialism and religion in the Caribbean and also considers theoretical approaches to the study of Caribbean religions set within a wider global context. This approach introduces the reader to a number of important and topical concepts around the wider study of Caribbean religions and illuminates the complex cultural history and interplay of these religions in the Caribbean Islands. Richly illustrated and drawing upon a range of different cultural approaches it offers new and challenging perspectives on the development and cultural history of Caribbean spiritual and religious expression through the lens of the material world. The book is for anyone interested in the Caribbean as a region and the role of religious behaviour in human society. Students of religions archaeology and anthropology will find a number of thought provoking and important case studies which relate complex theories to real world case studies. Any profits from this book will be donated to UNICEF Eastern Caribbean projects supporting vulnerable children in the region. <https://www.unicef.org/easterncaribbean>

Psychology, Religion, and Spirituality James M. Nelson, 2009-02-17 Over a century ago psychologists who were fascinated with religion began to study and write about it. Theologians and religious practitioners have responded to this literature producing a fascinating dialogue that deals with our fundamental understandings about the human person and our place in the world. This book provides an introduction to the important conversations that have developed out of these interchanges. The dialogue between psychology and religion is difficult to study for a number of reasons. First it requires knowledge of both

psychology and religion People with a background in psychology often lack a solid understanding of the religious traditions they wish to study and theologians may not be up to date on the latest developments in psychology Second it requires conceptual tools to organize the material and understand the basic problems involved in any attempt to connect the science of psychology with religion These concepts can be found in many places for instance in the writings of philosophers of science but they are complex and often hard to follow for those without a proper theological and philosophical background Finally authors who write on the topic come to the study of psychology and religion from a variety of academic and personal backgrounds This makes for wonderful diversity in conversations but it makes understanding and mastery of the material quite difficult
