moral aims of liberal education      Philosophy and Education: Paul Smeyers, J.D. Marshall, 2013-03-14 Many books have been written about Wittgenstein's philosophy but this collection of articles on Wittgenstein and education is the first study in book form in this area. There have been several articles in scholarly education journals but the special cachet of this collection is that the contributors come from six countries. The collection has been edited by Paul Smeyers and Jim Marshall, philosophers of education who live in Belgium and New Zealand respectively. Each of the chapters represents an original study of Wittgenstein commissioned by the editors from colleagues they know to have written well on Wittgenstein and the implications of his ideas for education. Audience: Teachers, students and academics in the field of philosophy and education. Especially interesting to advanced students in these areas.

**Religious Education and the Public Sphere** Patricia Hannam, 2018-08-06 Religious Education and the Public Sphere reveals through an analysis of theory and practice that religious education is resting on historic and persistent assumptions about both religion and education. Drawing on work from Arendt and Weil, new ideas emerge regarding religious education's constituent elements: education and religion. It offers a new and timely proposal for religious education and argues for a broader understanding of religion, bringing a fresh contribution to current discussions regarding the relationship between religion and education in the public sphere. Some practical considerations emerging from theory developed through the earlier parts of the book are presented in the final section, including the teacher's role and what should guide religious education curriculum. At a time when there is raised interest in the role of religion in the public sphere internationally, this book aims to contribute something new, both theoretically and practically, to discussions regarding the role of religion in education, and is relevant to educational contexts worldwide. This book will be vital reading for academics and researchers in the fields of religion and religious studies, education philosophy, philosophy of education, and religious education, and will also be of great interest to teachers and policy makers working in the field of religious education in the public sphere.

Eugene O. Iheoma, 1997 The author is an academic educationist and this book clearly distinguishes between religious education and religious indoctrination. It is concerned with the philosophy of religious education and is designed to acquaint the reader with the main issues involved in the debate that surrounds the place of religious education in the curriculum of the public school system in Nigeria. His contention is that religious educators, as with other disciplines, should present the subject matter as a legitimate object of enquiry capable of yielding knowledge and understanding. Amongst topics covered are knowledge and truth, justification of religious education, its aims, the role of the bible, modern educational methods, indoctrination and commitment, and religious education in a pluralist society. **Teaching Religious Education** Julian Stern, 2018-01-25 An updated expanded edition of the popular textbook for student and practising teachers of religious education. It is a book for and about teaching and learning religious education in schools which is a lively and open ended subject ideal for those wanting to explore how people understand the world and how they live their lives. A wide range of religious and non religious ways of life are explored. New to this edition are descriptions of more recent research on teaching and learning religious education from the UK, Europe, America, Asia, Africa and Australia. Also included are personal accounts written by pupils, teachers and researchers giving voice to those learning and researching religious education in practice. As well as revising and extending every chapter of the first edition, there are brand new chapters on the real lives of teachers and pupils in religious education, religious education around the world, spirituality, thinking about philosophy, truth and religious education, ethics, rights, values and virtues, creativity and religious education. A key feature of the book is the 33 classroom activities for learners aged 7 to 18 which are also designed for use by student and practising teachers. The volumes examine the teaching of world faiths in schools, religious education in both primary and secondary schools and the teaching of morality. This set will be of particular interest to students of Education and Religious Studies. *Virtuous Cycles in Humanistic Management* Ricardo Aguado, Almudena Eizaguirre, 2019-11-16 This volume is divided into three major parts, each of which symbolizes a new virtuous circle that is added to the previous one in order to foster the dissemination of humanistic management (HM) among corporations and social institutions. After an introductory chapter explaining the concept of humanistic management and the plan behind this research project, the first part of the book is devoted to education. The authors address pedagogical strategies that can be used in higher education to introduce students to HM. In turn, the second part of the book focuses on the implementation of HM in corporations, while the third presents an approach for measuring and monetizing the social value generated by corporations through their economic activities. In the closing chapter, the editors illustrate how the three parts of the book can be combined to generate virtuous cycles in corporations. **Global**
