Gottlieb, 2006-06-15 In a time of darkening environmental prospects frightening religious fundamentalism and moribund liberalism the remarkable and historically unprecedented rise of religious environmentalism is a profound source of hope In *A Greener Faith* Roger S. Gottlieb chronicles the promises of this critically important movement illuminating its principal ideas leading personalities and ways of connecting care for the earth with justice for human beings He also shows how religious environmentalism breaks the customary boundaries of religious issues in political life Asserting that environmental degradation is sacrilegious sinful and an offense against God catapults religions directly into questions of social policy economic and moral priorities and the overall direction of secular society Gottlieb contends that a spiritual perspective applied to the Earth provides the environmental movement with a uniquely appropriate way to voice its dream of a sustainable and just world Equally important it helps develop a world making political agenda that far exceeds interest group politics applied to forests and toxic incinerators Rather religious environmentalism offers an all inclusive vision of what human beings are and how we should treat each other and the rest of life Gottlieb deftly analyzes the growing synthesis of the movement's religious social and political aspects as well as the challenges it faces in consumerism fundamentalism and globalization Highly engaging and passionately argued this book is an indispensable resource for people of faith environmentalists scholars and anyone who is concerned about our planet's future **Pollution and the Death of Man** Francis August Schaeffer, 1970 This book addresses the environmental problem which presses in upon all of us As in other problem areas confronting mankind the author points out biblical Christian guidelines which if followed would bring about substantial healing and restoration **The Earth in God's Economy** E. Bauman, Richard R. Bohannon II, Kevin J. O'Brien, 2011-08-04 Religion and ecology has arrived What was once a niche interest for a few academics concerned with environmental issues and a few environmentalists interested in religion has become an established academic field with classic texts graduate programs regular meetings at academic conferences and growing interest from other academics and the mass media Theologians ethicists sociologists and other scholars are engaged in a broad dialogue about the ways religious studies can help understand and address environmental problems including the sorts of methodological terminological and substantive debates that characterize any academic discourse This book recognizes the field that has taken shape reflects on the ways it is changing and anticipates its development in the future The essays offer analyses and reflections from emerging scholars of religion and ecology each addressing her or his own specialty in light of

two questions 1 What have we inherited from the work that has come before us and 2 What inquiries concerns and conversation partners should be central to the next generation of scholarship The aim of this volume is not to lay out a single and clear path forward for the field Rather the authors critically reflect on the field from within outline some of the major issues we face in the academy and offer perspectives that will nurture continued dialogue

Ecology and Religion John Grim, Mary Evelyn Tucker, 2014-01-02 From the Psalms in the Bible to the sacred rivers in Hinduism the natural world has been integral to the world's religions John Grim and Mary Evelyn Tucker contend that today's growing environmental challenges make the relationship ever more vital This primer explores the history of religious traditions and the environment illustrating how religious teachings and practices both promoted and at times subverted sustainability Subsequent chapters examine the emergence of religious ecology as views of nature changed in religious traditions and the ecological sciences Yet the authors argue that religion and ecology are not the province of institutions or disciplines alone They describe four fundamental aspects of religious life orienting grounding nurturing and transforming Readers then see how these phenomena are experienced in a Native American religion Orthodox Christianity Confucianism and Hinduism Ultimately Grim and Tucker argue that the engagement of religious communities is necessary if humanity is to sustain itself and the planet Students of environmental ethics theology and ecology world religions and environmental studies will receive a solid grounding in the burgeoning field of religious ecology
