Scientific and Technical Issues in the Management of Spent Fuel of Decommissioned Nuclear Submarines Ashot Sarkisov, Alain Tournyol du Clos, 2006-01-09 This book addresses a very important challenge of the present complex decommissioning of the nuclear powered vessels taken out of service and environmental rehabilitation of the centers of basing and everyday running of different type nuclear vessels The book specifically focuses on the scientific and technical problems of management of naval spent nuclear fuel and radioactive waste

The Future of Nuclear Power John N Lillington, 2004-10-27 During the last century nuclear power has been established as a reliable source of energy in the major industrialised countries It has recently enjoyed a revival in attention and research due to the environmental concerns surrounding current conventional energy sources Issues of regulation and safety are at the forefront of all discussions involving nuclear power and will govern its place in the future The Future of Nuclear Power takes a technical and comprehensive look at the current and future status of nuclear power throughout the world The 17 chapters are divided into two main sections a review of all current generation plants and concepts for new advanced reactor design and safety The broad ranging topics covered by this publication coupled with the current revival of interest in nuclear energy make it a timely reference for all nuclear scientists Reviews the issues surrounding the future operation of existing commercial nuclear plants Several chapters dedicated to the extensive research programs in place concerning safe and reliable operation Compares nuclear and non nuclear options for energy needs in the future evaluating the benefits and risks of both

Geopolitics and Security in the Arctic Rolf Tamnes, Kristine Offerdal, 2014-07-11 Written by a group of leading experts

on Arctic affairs this book offers a historically informed and comprehensive study of the geopolitics and security challenges of the Arctic. The key aim of the work is to identify the conditions for cooperation, stability and peace in the Arctic and to reach beyond simple description and expectation in order to explore in depth some of the main factors that will determine the future of international relations in the region. Furthermore, it addresses key topics such as the geopolitical significance of the Arctic and the importance of oil and gas resources in the Arctic. The book also investigates what the main characteristics of governance in the Arctic are and how institutions and regimes can promote stability and security in the region. The volume maintains two layers of focus. The first relates to the dynamics within the Arctic and the second to developments outside the region, highlighting that we cannot understand the Arctic in isolation from global developments such as energy markets, security conflicts and NATO-Russian antagonism. This book will be of much interest to students of Arctic politics, security studies, geopolitics, Russian and Scandinavian politics and international relations in general. **Nuclear Decommissioning**

Case Studies: Organization and Management, Economics, and Staying in Business Michele Laraia, 2023-01-11. Nuclear Decommissioning Case Studies: Organization and Management, Economics and Staying in Business is the fifth volume in Michele Laraia's series which presents a selection of global case studies on different aspects of nuclear decommissioning. This volume focuses on organization, economics and performance, offering the reader guidance on project management, staffing, costs and funding, and training. It guides those responsible for the planning and implementation of nuclear decommissioning to ensure thorough and reliable applications. Decommissioning experts, including regulators, operating organizations, waste managers, researchers and academics, will find this book to be suitable supplementary material to reference works on the theory and applications of nuclear decommissioning. Readers will obtain an understanding of many key case studies, including what happened and what they can learn from the events, quoted to help supplement, solidify and strengthen their understanding of the topic. Presents a selection of global case studies which focus on organization, economics and performance of nuclear decommissioning in relation to project and industry sustainability, with a focus on management, funding and training aspects. Includes 100 case studies on project management, costs and funding, and teaching and learning. Based on experience and lessons learned, assists the reader in developing and implementing decommissioning plans while ensuring the availability of technical, financial and human resources at all times. **Safety, Reliability, Human Factors, and Human Error in Nuclear Power Plants** B.S. Dhillon, 2017-12-14. Each year, billions of dollars are being spent in the

area of nuclear power generation to design, construct, manufacture, operate and maintain various types of systems around the globe. Many times these systems fail due to safety, reliability, human factors and human error-related problems. The main objective of this book is to combine nuclear power plant safety, reliability, human factors and human error into a single volume for those individuals that work closely during the nuclear power plant design phase as well as other phases, thus eliminating the need to consult many different and diverse sources in obtaining the desired information. *Federal Register*, 2005-06-03

House of Commons - Environmental Audit Committee: Energy Subsidies - HC 61 Great Britain: Parliament: House of Commons: Environmental Audit Committee, 2013-12-02 The Government is shifting the goal posts on fuel poverty so that official statistics record far fewer households as fuel poor The changes to the fuel poverty definition and target in part being made

through amendments to the Energy Bill should be stopped unless the Government is prepared to make a public commitment to end fuel poverty altogether. A short term bid to cut bills must not throw energy and climate change policy off course. In the longer term green levies could actually keep bills down if they drive energy efficiency improvements that cut the cost of heating our homes. Insulating homes and supporting green technologies is vital to help the fuel poor and cut the emissions causing climate change. At the Rio 20 Summit and the G20 the Government committed itself to phasing out fossil fuel subsidies that encourage wasteful consumption and contribute to greenhouse gas emissions. The Government must set a target to reduce subsidies to harmful fossil fuels. The Government should also use the Autumn Statement as an opportunity to provide a clear and comprehensive analysis of energy subsidies in the UK. The report also looks at whether Government support for the new nuclear power station at Hinkley Point constitutes a subsidy and concludes that it does despite the Government's assurance otherwise. The Government's policy of no public subsidy for new nuclear requires it to provide only similar support to that provided to other types of energy but even on that basis the deal for Hinkley Point C is dissimilar notably on support for decommissioning and waste. *The Retreat of Social Democracy* John T. Callaghan, 2000. An examination of policy and programme in the key social democratic parties of Britain France Germany and Sweden since the 1970s. It situates change in the context of capitalist restructuring and shows how the radical Left initially responded to the unfolding crisis of the post war order.
