Chinese vs. Western Perspectives Jinghao Zhou, 2013-12-04 China is on the rise in the globalized world The relationship between China and the United States has become the most important global issue in the twenty first century It is urgent to understand what is happening in China and where China is heading However there are many misconceptions about China in the West which affect Westerners ability to objectively understand China and ultimately influence the making of foreign policy toward China The author attempts to challenge the misconceptions coming from both Western societies and China and offer an integrated picture of contemporary China through systematically examining the major aspects of contemporary Chinese society and culture with the most recent data and presents convincing arguments in eighteen chapters for spurring mutual understanding between China and the West The author intends this book to be an interdisciplinary and comprehensive guide to China for a general audience and it covers a wide variety of topics including history family population Chinese women economy environmental issues politics religion media U S China relations and other subjects This book demonstrates the author's extensive research and thoughtful examination of many sides of controversial issues related to China with a nice balance of Western and Chinese scholarship This is one of the few that are authored by scholars who originate from China and have their professional career in the United States but it is distinctive from the rest of studies on this subject in that the author is committed to examining today's China from Chinese as well as Western

perspectives This is not only a scholarly book but also is suitable for general classes on China Remaking China's Public Philosophy and Chinese Women's Liberation Jinghao Zhou,2006 Views women s liberation as a comprehensive project and part of the process of China s democratization by using the prism of public philosophy to examine Chinese women s liberation in a global context **Routledge Handbook of Politics in Asia** Shiping Hua,2018-03-15 The Routledge Handbook of Politics in Asia is designed to serve as a comprehensive reference guide to politics in Asia Covering East South Southeast and Central Asia this handbook brings together the work of leading international academics to cover the political histories institutions economies and cultures of the region Taking a comparative approach it is divided into four parts including A thorough introduction to the politics of the four regions of Asia from the perspectives of democratization foreign policy political economy and political culture An examination of the Big Three of Asia China India and Japan focusing on issues including post Mao reform China s new world outlook Indian democracy and Japanese foreign policy A discussion of important contemporary issues such as human rights the politics of the internet security nationalism and geopolitics An analysis of the relationship between politics and certain theoretical ideas such as Confucianism Hinduism socialist constitutionalism and gender norms As an invaluable and all inclusive resource this handbook will be useful for students scholars researchers and practitioners of Asian politics and comparative politics China's Peaceful Rise in a Global Context Jinghao Zhou,2010-04-02 China s rise has become inevitable but there is no agreement about whether China will rise peacefully or pose a threat to the United States The author asserts that both theories of China threat and peaceful rise failed to address China s central domestic problem Thus both theories are not convincing This book attempts to develop a third view of China s rise from a domestic perspective and contends that China s potential threat to the existing global order is not derived from her rapid economic growth and military expansion but from her potential domestic chaos A strong democratic China will contribute to the global peace but the collapse of China will gravely threaten Western societies The current Chinese political system directly contributes to this social instability and could possibly cause China s social crash China s democratization is the key to ensure China s peaceful rise in a global context However the Party is still in power and any attempt to dissolve the one party system in present day China has poor prospects China must take a two step gradual reform approach to complete the transition from an authoritarian regime to a democratic one In the two step theory the first phase for promoting China s democratization includes exercising freedom of media increasing the consciousness of citizen participation and enacting religious rights Through all these democratic exercises China will gradually be able to achieve a fully democratic society This two step theory is crucial for the United States if it is to enact effective foreign policy toward China and for China to develop a democratic harmonious society *Why Is The China Model Losing Its Power? - Challenges And Opportunities Of The Second Global Competition* Jinghao Zhou,2020-07-23 History has proved that communism failed at many levels during the first global competition between the capitalist and socialist camps during the Cold War As a result the

socialist camp was dissolved China is one of the few communist countries to survive in the twenty first century The Chinese economy was on the verge of collapse in the 1970s but began to take off in the early 1980s guided by the China model China became the world s second largest economy in 2010 and has quickly expanded its enormous global market and political influence The second global competition between the capitalist countries and China has started The second global competition is in fact between the China model and the Washington Consensus Will Western hegemonies end as the result of the second global competition Will China be able to rewrite the international rules Will the Chinese communist political system collapse during the competition What should the West do to the China model This book will explore the implications of the China model in the context of the second global competition and argues that the downturn of the China model and China s global expansion are the two sides of the same coin The China model is losing its power but not broken China would be able to become even stronger if it could reshape the philosophical foundation of the China model The future of Western hegemony will depend on how the West understands the China model and deals with it This book addresses these aspects and more

Great Power Competition as the New Normal of China-US Relations Jinghao Zhou,2022-09-01 Will China U S relations come back to the normal track Does the confrontational approach work for China US relations This book argues that it is an unrealistic hope to bring China US relations back to the so called normal track because the great power competition will be a new normal of China US relations and the USA will gain more from strategic competition than cooperation in the long run This book shows that the strategy of great power cooperation through competition is more positive and constructive than the approaches of peaceful coexist and maximum pressure This book does not intend to provide policy recommendations for governments to consider but mainly to explain why the great power competition is inevitable and why it is necessary to continuously work with China in some areas through strategic competition This book alarms the importance of understanding the nature of the Chinese Communist Party during the great power competition and aims to motivate both sides to revisit their foreign policy practice and come up with a better foreign policy strategy of handling China US relations

The Routledge International Handbook of Religious Education Derek Davis,Elena Miroshnikova,2013-02-01 How and what to teach about religion is controversial in every country The Routledge International Handbook of Religious Education is the first book to comprehensively address the range of ways that major countries around the world teach religion in public and private educational institutions It discusses how three models in particular seem to dominate the landscape Countries with strong cultural traditions focused on a majority religion tend to adopt an identification model where instruction is provided only in the tenets of the majority religion often to the detriment of other religions and their adherents Countries with traditions that differentiate church and state tend to adopt a separation model thus either offering instruction in a wide range of religions or in some cases teaching very little about religion intentionally leaving it to religious institutions and the home setting to provide religious instruction Still other countries attempt managed

pluralism in which neither one nor many but rather a limited handful of major religious traditions are taught. Inevitably there are countries which do not fit any of these dominant models and the range of methods touched upon in this book will surprise even the most enlightened reader. Religious instruction by educational institutions in 53 countries and regions of the world are explored by experts native to each country. These chapters discuss legal parameters in terms of subjective versus objective instruction in religion. Constitutional, statutory, social and political contexts to religious approaches. Distinctions between the kinds of instruction permitted in elementary and secondary schools versus what is allowed in institutions of higher learning. Regional assessments which provide a welcome overview and comparison. This comprehensive and authoritative volume will appeal to educators, scholars, religious leaders, politicians and others interested in how religion and education interface around the world.

Business Leadership Development in China Shuang Ren, Robert Wood, Ying Zhu, 2015-03-24. This book argues that China's businesses and hence China's future economic development face a huge crisis in that there is a considerable leadership gap in China with a shortage of competent business leaders at a time when new leadership skills are required urgently as China's businesses evolve rapidly and engage ever more with the global economy. Moreover, the book argues training is an undervalued and often marginalised activity in Chinese companies. The book outlines the nature of this problem and goes on to demonstrate that there is a new breed of manager emerging in China aware of the need to upgrade management skills moving away from skills appropriate in traditional industrial firms and emphasising more flexibility, positive engagement with workers and competence in the market economy. The book includes an evaluation of different management approaches in China, reports on extensive original research including interviews with practising managers and sets out how self-development is widespread, deep and important.
