Remaking Cities Alison Ravetz, 1980 Sustainable Communities Hugh Barton, 2013-12-02 This book re addresses the concepts of neighbourhood and community in a refreshing and challenging way It will be of immense benefit not only to town planners but also to all those professional and voluntary groups and politicians who seek to create the new communities of tomorrow From the Foreword by Jed Griffiths Past President of the Royal Town Planning Institute There is widespread support for the principle of creating more sustainable communities but much hazy wishful thinking about what this might mean in practice In reality we witness more the death of local neighbourhoods than their creation or rejuvenation reflecting an increasingly mobile privatized and commodified society Sustainable Communities examines the practicalities of re

inventing neighbourhoods It is neither an idealistic utopian tract nor a designer's manual but is rather a serious attempt to address the real issues This collection of expert contributions examines the nature of local community and methods of building social capital presents the findings of a world wide survey of eco neighbourhoods and eco villages with case studies from the United Kingdom Europe America and Australia develops a fresh perspective on the planning and design of neighbourhoods in urban areas based on the eco system approach explores practical programmes for local resource management and the implications for community based decision making provides a detailed appendix listing current eco village and eco neighbourhood schemes by country Written by an interdisciplinary team of social and environmental scientists town planners and urban designers this is a thought provoking and important contribution to both the theory and practice of the development of sustainable communities

Richer Futures Ken Worpole, 2020-09-10 In every area of life traditional centralized party politics has been failing and the seeds of a new form of political life are being sown This is true in housing health education consumption and transport where public policy is attracting increasing criticism In an age of social alienation and urban despondency *Richer Futures* is a timely response to the growing interest in community based self help action It introduces new forms of communication and decision making and sets out a programme for a sustainable politics Contributions from some of the best known thinkers and writers on contemporary urban cultural and social policy and campaigns in Britain today pay tribute to the ideas and industrious activities of the influential writer and commentator Colin Ward This uplifting collection of essays looks forward to a new politics of self management and environmentally aware and sustainable lifestyles Ken Worpole has written a number of books on urban and cultural policy and a series of influential reports for Comedia Demos and the Department of the Environment Originally published in 1999

Exhibitions and the Development of Modern Planning Culture Robert Freestone, Marco Amati, 2016-12-05 The evolution of city planning theory and practice in the first half of the twentieth century was captured and driven by a range of exhibitionary practices in a variety of settings globally from international expos to local public halls The agendas of the promoters varied but exhibitions generally drew their social legitimacy from their status as appropriate educative agencies of citizenship Bringing together a range of international case studies this volume explores the highly visual genre of public planning exhibitions worldwide In doing so it provides a unique lens on the development of modern urban planning and design from the late 19th century to the present day Focussing mainly on the first half of the 20th century it looks in particular at historic exhibitions which sought to transform urban society's understanding of the possibilities of planning as a force for social betterment The visuality of presentation contemporary reactions and outcomes for the planning profession and the community are explored to make for a unique innovative and attractive approach to the history of planning ideas The five major themes are the visual representation of ideas and ideologies institutions and individuals involved the broader context of display and the impacts and implications for the development planning culture With contributors including Karl Fischer John Gold Carola Hein Peter

Larkham Javier Monclus and Mark Tewdwr Jones the dominant intellectual paradigm further unifying the collection is planning history *Death and Survival in Urban Britain* Bill Luckin, 2015-05-19 The narratives of disease hygiene developments in medicine and the growth of urban environments are fundamental to the discipline of modern history Here the eminent urban historian Bill Luckin re introduces a body of work which published together for the first time along with new material and contextualizing notes marks the beginning of this important strand of historiography Luckin charts the spread of cholera fever and the everyday but frequently deadly infections that afflicted the inhabitants of London and its new manufacturing districts between the 1830s and the end of the nineteenth century A second part Pollution and the Ills of Urban Industrialism concentrates on the water and smoke problems and the ways in which they came to be perceived defined and finally brought under a degree of control *Death and Survival in Urban Britain* explores the layered and interacting narratives within the framework of the urban revolution that transformed British society between 1800 and 1950

The Planning of a New Town London County Council, 2015-03-05 The publication of *The Planning of a New Town* in 1961 aroused remarkable interest Its pages described a private new town sponsored by the London County Council LCC to be built at Hook in Hampshire a scheme that innovatively combined Garden City New Town traditions with sensitivity to modern design At its heart lay a multilevel and megastructural town centre intended to serve as a genuine focus for the gathering community featuring shops and amenities placed on a pedestrian deck with cars and servicing beneath The report itself proved extremely popular even though the New Town had fallen foul of political opposition at local and national levels and had been abandoned before any construction took place It offers an insight into the flux of ideas that surrounded New Town development in the early 1960s Analysing the world as it might have been not only identifies choices that were once available for shaping the built environment it also often reveals once cherished hopes and aspirations about how people might live in cities **Design History** Hazel Conway, 2006-08-21 Hazel Conway introduces the student new to the subject to different areas of design history and shows some of the ways in which it can be studied and some of its delights and difficulties No background knowledge of design history art or architecture is assumed *The Globalized City* Frank Moulaert, Arantxa Rodriguez, Erik Swyngedouw, 2003-03-27 This book explores the dynamics that have accompanied the implementation of large scale Urban Development Projects UDPs in nine European cities within the European Union EU It contributes to the analysis of the relationship between urban restructuring and social exclusion integration in the context of the emergence of the European wide new regimes of urban governance These regimes reflect the reawakening of neo liberal policy and the rise of a New Urban Policy favouring private investments and deregulation of property and labour markets The selected UDPs further reflect global pressures and changing systems of local regional and or national regulation and governance These projects while being decidedly local capture global trends and new national and local policies as they are expressed in particular institutional forms and strategic practices The large scale urban interventions were deliberately

chosen as reflections of a particular hegemonic and dominant expression of urban policy as pursued during the 1990s The book provides a panoramic view of urban change in some of Europe s greatest cities The nine case studies include The Europeanization of Brussels The Guggenheim museum in Bilbao the new financial district in Dublin the science university technology complex Adlershof in Berlin the 1998 World Expo in Lisbon Athens s bid to stage the Olympic Games Vienna s Donau City Copenhagen s Oresund project and Naples new business district These case studies testify to the unshakable belief the city elites hold in the healing effects that the production of new urban mega projects and events has on their city s vitality and development potential The book also analyses the down side of this development in terms of social exclusion the formation of new urban elites and the consolidation of less democratic forms of urban governance The principal aim is to show how the production of these new urban spaces is actually also part of the production of a new polity a new economy and new forms of living urban life that are not very promising for a socially harmonious and just future for metropolitan urban Europe

Unhealthy Housing R. Burridge,D. Ormandy,2005-10-09 Unhealthy Housing presents an analysis of the research into the health implications of housing and the significance for legal regulation of housing conditions Key experts present short papers together with an overview to give an evaluation of the significance of housing on the health of occupiers

Conceptions of Space and Place in Strategic Spatial Planning Simin Davoudi,Ian Strange,2008-11-24 Bringing together authors from academia and practice this book examines spatial planning at different places throughout the British Isles Six illustrative case studies of practice examine which conceptions of space and place have been articulated presented and visualized through the production of spatial strategies Ranging from a large conurbation London to regional Yorkshire and Humber and national levels the case studies give a rounded and grounded view of the physical results and the theory behind them While there is widespread support for re orienting planning towards space and place there has been little common understanding about what constitutes spatial planning and what conceptions of space and place underpin it This book addresses these questions and stimulates debate and critical thinking about space and place among academic and professional planners

Neoliberal Spatial Governance Phil Allmendinger,2016-04-14 Neoliberal Spatial Governance explores the changing nature of English town and city planning as it has slowly but clearly transformed Once a system for regulating and balancing change in the built and natural environments in the public interest planning now finds itself facilitating development and economic growth for narrow sectional interests Whilst there is a lip service towards traditional values the progressive aims and inclusivity that provided planning s legitimacy and broad support have now largely disappeared The result is a growing backlash of distrust and discontent as planning has evolved into neoliberal spatial governance The tragedy of this change is that at a time when planning has a critical role in tackling major issues such as housing affordability and climate change it finds itself poorly resourced with low professional morale lacking legitimacy and support from local communities accused of bureaucracy and red tape from businesses and ministers and subject to regular

disruptive reforms Yet all is not lost There is still demand and support for more comprehensive and progressive planning one that is not purely driven by the needs of developers and investors Resistance against the idea that planning exists to help roll out development is growing Neoliberal Spatial Governance explores the background and implications of the changes in planning under the governments of the past four decades and the ways we might think about halting and reversing this shift

Conservation in the Age of Consensus John Pendlebury, 2008-09-17 This new text on the subject of conservation in the built environment provides a unique holistic view on the understanding of the practice of conservation connecting it with wider societal and political forces UK practice is used as a means along with international examples for bringing together a real understanding of practice with a social science analysis of the issues The author introduces ideas about the meanings and values attached to historic environments and how that translates into public policies of conservation

The Practice of Modernism John R. Gold, 2007-06-13 In this sequel to his widely acclaimed book *The Experience of Modernism* 1997 John Gold continues his detailed enquiry into the Modern Movement's involvement in urban planning and city design Making extensive use of information gained from hours of in depth interviews with architects of the time this new book examines the complex relationship between vision and subsequent practice in the saga of postwar urban reconstruction *The Practice of Modernism* traces the personal institutional and professional backgrounds of the architects involved in schemes for reconstruction and replanning deals directly with the progress of urban transformation focusing on the contribution that modern architects and architectural principles made to town centre renewal and social housing highlights how the exuberance of the 1960s gave way to the profound reappraisal that emerged by the early 1970s Written by an expert this is a key book on the planning aspects of the modernist movement for architectural historians urban geographers planners and all concerned with understanding the recent history of the contemporary city

The SAGE Companion to the City Tim Hall, Phil Hubbard, John Rennie Short, 2008-05-21 This book pulls together an exceptional range of literature in addressing the complexity of contemporary patterns and processes of urbanization It offers a rich array of concepts and theories and is studded with fascinating examples that illustrate the changing nature of cities and urban life Paul Knox Virginia Tech University *The SAGE Companion to the City* is a tour de force of contemporary urban studies At once a stocktake showcase and springboard for scholarly approaches to cities and city life the editors have assembled a cohesive and convincing set of lucid insightful and critical essays of great quality Eschewing grand theory and deadening encyclopaedism the contributors refresh both longstanding concerns and explore new themes in ways both brilliantly accessible to newcomers and satisfying to the cognoscenti Robert Freestone University of New South Wales Organized in four sections *The SAGE Companion to the City* provides a systematic A Z to understanding the city that explains the interrelations between society culture and economy *Histories* explores power religion science and technology modernity and the landscape of the city *Economies and Inequalities* explores work and leisure globalisation innovation and the role of the state *Communities* explores migration and settlement

segregation and division civility housing and homelessness Order and Disorder explores politics and policy planning and conflict law and order surveillance and terror An accessible guide to all areas of urban studies the text offers both a contemporary cutting edge reflection and measured historical and geographical reflection on urban studies It will be essential reading for students of any discipline interested in the city as an object of study **Living Cities in Japan** André Sorensen, Carolin Funck, 2007-08-07 Over the last fifteen years local citizens movements have spread rapidly throughout Japan This volume examines the growth and nature of civil society participation in local urban and environmental governance
