Urbanisation in the Island Pacific John Connell, John Lea, 2002-09-26 Managing rapid urban growth presents a significant challenge in the small independent countries of the Pacific Islands Although they originated in colonial times the towns and cities are now distinctively post colonial with economies environments and social

structures that reflect unique island characteristics This transformation has stimulated new concerns such as the causes and effects of pollution the need for employment for landless migrants the need for adequate and affordable housing and the financing of expanding urban services This book explores the diversity of the urban experience in the ten independent island states focusing on strategies to secure long term sustainable development **The Australian People** James Jupp,2001-10

Australia is one of the most ethnically diverse societies in the world today From its ancient indigenous origins to British colonisation followed by waves of European then international migration in the twentieth century the island continent is home to people from all over the globe Each new wave of settlers has had a profound impact on Australian society and culture The Australian People documents the dramatic history of Australian settlement and describes the rich ethnic and cultural inheritance of the nation through the contributions of its people It is one of the largest reference works of its kind with approximately 250 expert contributors and almost one million words Illustrated in colour and black and white the book is both a comprehensive encyclopedia and a survey of the controversial debates about citizenship and multiculturalism now that Australia has attained the centenary of its federation *Identity and Development* Paul van der Grijp,2021-11-22

Identity and Development presents a remarkable record of Tonga s increasing participation in the modern global economy and provides anthropologists economists and historians with a detailed case study that bears heavily on major issues of the day both practically and theoretically The book focuses on issues of identity entrepreneurship and the intricacies of development and addresses the question How in the current state of the economy can a Tongan become a successful grower This question is set against the background of a boom in cash cropping sparked by a burgeoning export trade with Japan

Pacific Studies ,2001 *International Migration* Douglas S. Massey,J. Edward Taylor,2004-03-25 *International Migration Prospects and Policies* offers a comprehensive up to date survey of global patterns of international migration and the policies employed to manage the flows It shows that international migration is not rooted in poverty or rapid population growth but in the expansion and consolidation of global markets As nations are structurally transformed by their incorporation into global markets people are displaced from traditional livelihoods and become international migrants In seeking to work abroad they do not necessarily move to the closest or richest destination but to places already connected to their countries of origin socially economically and politically When they move migrants rely heavily on social networks created by earlier waves of immigrants and in recent years professional migration brokers have become increasingly common Developing countries generally benefit from international migration because migrant savings and remittances provide foreign earnings to finance balance of payments deficits and make productive investments Some developing nations have gone so far as to establish programs or ministries dedicated to the export of workers Developed nations in contrast focus more on the social and economic costs of immigrants and seek to reduce their numbers regulate their characteristics and limit their access to social services Over time receiving nations have gravitated toward a similar set of restrictive policies

yielding undocumented migration as a worldwide phenomenon Globalization also creates infrastructures of transportation communication and social networks to put developed societies within reach In the latter ageing populations and segmenting markets create a persistent demand for immigrant workers All these trends are likely to intensify in the coming years to make immigration policy a key political issue in the twenty first century
