German Monuments in the Americas Hans A. Pohlsander, 2010 This book looks at the many transatlantic bonds which have linked and still link Germany and the United States German immigrants to the Americas brought with them a good deal of cultural baggage They cultivated their German heritage in their schools churches and clubs They expressed pride in this heritage by erecting monuments to Goethe or Schiller Beethoven or Wagner Alexander von Humboldt or Turnvater Jahn They claimed Friedrich Wilhelm von Steuben Carl Schurz Gustave Koerner and John A Roebing as their own But German born or German trained sculptors did not limit themselves to German subjects They also paid tribute to America by creating sculptures of Benjamin Franklin George Washington Thomas Jefferson Abraham Lincoln and others who occupy a place of honor in American history While a few German monuments can be found in Canada and in Latin America the number of German monuments in the United States is surprisingly large These monuments illustrate the contribution often overlooked or ignored of the German American community to American society and American cultural life

Cultural Landscapes of India Amita Sinha, 2020-11-10 Most people view cultural heritage sites as static places frozen in time In Cultural Landscapes in India Amita Sinha subverts the idea of heritage as static and examines the ways that landscapes influence culture and that culture influences landscapes The book centers around imagining enacting and reclaiming landscapes as subjects and settings of living cultural heritage Drawing on case studies from different regions of India Sinha offers new interpretations of links between land and culture using different ways of seeing transcendental romantic and utilitarian The idea of cultural landscape can be seen in ancient practices such as circumambulation and immersion in bodies of water that sustain engagement with natural elements Pilgrim

towns medieval forts religious sites and contemporary memorial parks are sites of memory where myth and history converge Engaging with these spaces allows us to reconstruct collective memory and reclaim not only historic landscapes but ways of seeing making and remembering Cultural Landscapes in India makes the case for reclaiming iconic landscapes and rethinking conventional approaches to conservation that take into consideration performative landscape as heritage

Pioneer Mother Monuments Cynthia Culver Prescott, 2019-04-04 For more than a century American communities erected monuments to western pioneers Although many of these statues receive little attention today the images they depict sturdy white men saintly mothers and wholesome pioneer families enshrine prevailing notions of American exceptionalism race relations and gender identity Pioneer Mother Monuments is the first book to delve into the long and complex history of remembering forgetting and rediscovering pioneer monuments In this book historian Cynthia Culver Prescott combines visual analysis with a close reading of primary source documents Examining some two hundred monuments erected in the United States from the late nineteenth century to the present Prescott begins her survey by focusing on the earliest pioneer statues which celebrated the strong white men who settled and conquered the West By the 1930s she explains when gender roles began shifting new monuments came forth to honor the Pioneer Mother The angelic woman in a sunbonnet armed with a rifle or a Bible as she carried civilization forward an iconic figure resonated particularly with Mormon audiences While interest in these traditional monuments began to wane in the postwar period according to Prescott a new wave of pioneer monuments emerged in smaller communities during the late twentieth century Inspired by rural nostalgia these statues helped promote heritage tourism In recent years Americans have engaged in heated debates about Confederate Civil War monuments and their implicit racism Should these statues be removed or reinterpreted Far less attention however has been paid to pioneer monuments which Prescott argues also enshrine white cultural superiority as well as gender stereotypes Only a few western communities have reexamined these values and erected statues with more inclusive imagery Blending western history visual culture and memory studies Prescott's pathbreaking analysis is enhanced by a rich selection of color and black and white photographs depicting the statues along with detailed maps that chronologically chart the emergence of pioneer monuments

Civil War Monuments and the Militarization of America Thomas J. Brown, 2019-10-10 This sweeping new assessment of Civil War monuments unveiled in the United States between the 1860s and 1930s argues that they were pivotal to a national embrace of military values Americans wariness of standing armies limited construction of war memorials in the early republic Thomas J Brown explains and continued to influence commemoration after the Civil War As large cities and small towns across the North and South installed an astonishing range of statues memorial halls and other sculptural and architectural tributes to Civil War heroes communities debated the relationship of military service to civilian life through fund raising campaigns artistic designs oratory and ceremonial practices Brown shows that distrust of standing armies gave way to broader enthusiasm for soldiers in the Gilded Age Some important projects challenged the trend but many Civil War

monuments proposed new norms of discipline and vigor that lifted veterans to a favored political status and modeled racial and class hierarchies A half century of Civil War commemoration reshaped remembrance of the American Revolution and guided American responses to World War I Brown provides the most comprehensive overview of the American war memorial as a cultural form and reframes the national debate over Civil War monuments that remain potent presences on the civic landscape

The Language of War Monuments David Machin, Gill Abousnnouga, 2013-10-10 This book analyses war monuments by developing a multimodal social semiotic approach to understand how they communicate as three dimensional objects The book provides a practical tool kit approach to how critical multimodal social semiotics should be done through visual textual and material analysis It ties this material analysis into the social and political contexts of production Using examples across the 20th and 21st century the book s chapters offer a way of analysing the way that monument designers have used specific semiotic choices in terms of things like iconography objects shape form angularity height materials and surface realisation to place representations of war in public places across Britain This social semiotic approach to the study of war monuments serves three innovative purposes First it provides a contribution to the work on the ideological representations of war in Media and Cultural Studies and in Critical Discourse Analysis applied specifically to more banal realisations of discourse Second it responds to calls by historians for innovative ways to study war commemoration by providing an approach that offers both specific analysis of the objects and attends to matters of design Thirdly following in the relatively recent tradition of multimodal analysis the arguments draw on the ideas of Kress and van Leeuwen 1996 2001 adapting and extending their theories and models to the analysis of British commemorative war monuments in order to develop a multimodal framework for the analysis of three dimensional objects

Taboo Pushkin Alyssa Dinega Gillespie, 2012-07-24 Since his death in 1837 Alexander Pushkin often called the father of Russian literature has become a timeless embodiment of Russian national identity adopted for diverse ideological purposes and reinvented anew as a cultural icon in each historical era tsarist Soviet and post Soviet His elevation to mythic status however has led to the celebration of some of his writings and the shunning of others Throughout the history of Pushkin studies certain topics texts and interpretations have remained officially off limits in Russia taboos as prevalent in today's Russia as ever before The essays in this bold and authoritative volume use new approaches overlooked archival materials and fresh interpretations to investigate aspects of Pushkin's biography and artistic legacy that have previously been suppressed or neglected Taken together the contributors strive to create a more fully realized Pushkin and demonstrate how potent a challenge the unofficial taboo alternative Pushkin has proven to be across the centuries for the Russian literary and political establishments

Time Honored John H. Russian Notions of Power and State in a European Perspective, 1462-1725 Endre Sashalmi, 2022-10-25 Winner of the 2023 Marc Raeff Book Prize A 2023 REFORC Book Award Longlist Title This book highlights the main features and trends of Russian political thought in an era when sovereignty state and politics as understood in Western Christendom were non-existent in Russia or were only beginning to be articulated It concentrates on enigmatic authors and sources that shaped official perception of rulership or marked certain changes of importance of this perception Special emphasis is given to those

Contemporary Theory of Conservation Salvador Munoz-Vinas, 2012-05-23 Classical theories of conservation are well known in the heritage community but in the last two decades thinking has shifted and classical theory has faced increasing criticism Contemporary Theory of Conservation brings together current ideas in conservation theory presenting a structured coherent analysis of the subject for the first time This engaging and readable text is split into 3 parts The first Fundamentals of conservation addresses the identity of conservation itself and problems arising when classical conservation theories are applied The second part Questioning classical theories delves deeper into the criticism of classical ideas such as reversibility This leads on to the creation of new paradigms such as sustainability which are covered in the final part of the book Conservation ethics

The Conservation Movement Miles Glendinning, 2013 Winner of the 2016 Antoinette Forrester Downing Award presented by the Society of Architectural Historians In many cities across the world particularly in Europe old buildings form a prominent part of the built environment and we often take it for granted that their contribution is intrinsically positive How has that widely shared belief come about and is its continued general acceptance inevitable Certainly ancient structures have long been treated with care and reverence in many societies including classical Rome and Greece But only in modern Europe and America in the last two centuries has this care been elaborated and energised into a forceful dynamic ideology a Conservation Movement infused with a sense of historical destiny and loss that paradoxically shared many of the characteristics of Enlightenment modernity The close inter relationship between conservation and modern civilisation was most dramatically heightened in periods of war or social upheaval beginning with the French Revolution and rising to a tragic climax in the 20th century age of totalitarian extremism more recently the troubled relationship of heritage and global commercialism has become dominant Miles Glendinning's new book authoritatively presents for the first time the entire history of this architectural Conservation Movement and traces its dramatic fluctuations in ideas and popularity ending by questioning whether its recent international ascendancy can last indefinitely
