Renaissance and Baroque Art Leo Steinberg, 2020-08-19 Leo Steinberg was one of the most original art historians of the twentieth century known for taking interpretive risks that challenged the profession by overturning reigning orthodoxies In essays and lectures ranging from old masters to contemporary art he combined scholarly erudition with an eloquent prose that illuminated his subject and a credo that privileged the visual evidence of the image over the literature written about it His writings sometimes provocative and controversial remain vital and influential reading Steinberg's perceptions evolved from long hard looking at his objects of study Almost everything he wrote included passages of formal analysis but always put into the service of interpretation This volume begins and ends with thematic essays on two fundamental precepts of Steinberg's art history how dependence on textual authority mutes the visual truths of images and why artists routinely copy or adapt earlier artworks In between are fourteen chapters on masterpieces of renaissance and baroque art with bold and enlightening interpretations of works by Mantegna Filippo Lippi Pontormo El Greco Caravaggio Steen and finally Velázquez Four chapters are devoted to some of Velázquez's best known paintings ending with the famously enigmatic *Las Meninas* Renaissance and Baroque Art is the third volume in a series that presents Steinberg's writings selected and edited by his longtime associate Sheila Schwartz

Taking the Noli me tangere and Doubting Thomas episodes as a focal point this study examines how visual representations of two of the most compelling and related Christian stories engaged with changing devotional and cultural ideals in Renaissance and Baroque Italy This book reconsiders depictions of the ambiguous encounter of Mary Magdalene and Christ in the garden John 20 11 19 known as the Noli me tangere and that of Christ's post Resurrection appearance to Thomas John 20 24 29 the Doubting Thomas as manifestations of complex theological and art theoretical milieus By focusing on key artistic monuments of the Italian Renaissance and Baroque periods the authors demonstrate a relationship between the rise of skeptical philosophy and empirical science and the efficacy of the senses in the construction of belief Further the authors elucidate the differing representational strategies employed by artists to depict touch and the ways in which these strategies were shaped by gender social class and educational level Indeed over time St Thomas became an increasingly public and therefore masculine symbol of devotional verification juridical inquiry and empirical investigation while St Mary Magdalene provided a more private model for pious women celebrating mostly behind closed doors the privileged and active participation of women in the faith The authors rely on primary source material paintings sculptures religious tracts hagiography popular sermons and new documentary evidence By reuniting their visual examples with important often little known textual sources the authors reveal a complex relationship between visual imagery the senses contemporary attitudes toward gender and the shaping of belief Further they add greater nuance to our understanding of the relationship between popular piety and the visual culture of the period

Between Renaissance and Baroque Gavin Alexander Bailey, 2003

Between Renaissance and Baroque is a stunning achievement the first book to be written about the original painting commissions of the Jesuits in Rome Offering a uniquely comprehensive and comparative analysis of the paintings and stuccoes which adorned all of the Jesuit foundations in the city during their first half century of existence the study treats some of the most crucial monuments of late Renaissance painting including the original decorations of the church of the Ges and the Collegio Romano and the martyrdom

frescoes at S Stefano Rotondo Based on extensive new archival research from Rome Florence Parma and Perugia Gauvin Alexander Bailey s study presents an original revisionist treatment of Italian painting in the last four decades of the sixteenth century a critical transitional period between Renaissance and Baroque Bailey relates the Jesuit painting cycles to the great religious and intellectual climate of the period isolates the new stylistic trends which appeared after the Council of Trent and looks at the different ways in which artists met the challenges for devotional art made by the religious climate of the post Tridentine period Bailey also succeeds in providing the first ever written reconstructions of the Jesuit churches of S Tommaso di Canterbury S Saba and S Apollinare and the original novitiate complex of S Andrea al Quirinale the site of the most complex and original hospital decoration in late Renaissance Italy Through these reconstructions Bailey sheds new light on such works as Louis Riche me s meditation manual on the paintings at S Andrea *Le peinture spirituelle* a lively and detailed treatise on late Renaissance art that has never before been the subject of a thorough study Ultimately Bailey provides us with a new understanding of the stylistic and iconographic strands which shortly afterward were woven together to form the Baroque *From Renaissance to Baroque* Louis L.
