Varieties of Cultural History Peter Burke,1997 In this collection of essays of which four are published here for the first time Peter Burke explores the theory and practice of what is called new cultural history He focuses on the varieties of cultural history which have emerged since the writings of Jacob Burckhardt and Johan Huizinga No new

orthodoxy has emerged to replace the classic model Burke suggests despite the importance of innovative approaches inspired by social and cultural anthropology After discussing the origins and identity of cultural history Burke explores the social history of dreams and the relation between history and social memory He presents five case studies addressing topics in the history of early modern Italy Each is located on the frontiers of cultural history between learned and popular culture between the public and the private spheres and between the serious and the comic Burke then turns to the encounter between Europe and the New World and to the phenomenon of cultural translation in the etymological literal and metaphorical senses of the term He concludes with two theoretical investigations one on the history of mentalities and one which asks why cultural history seems doomed to fragmentation
