Renal Histopathology Robert Meadows (M.D.),1973 *Renal Pathology in Biopsy* H.U. Zollinger,M.J. Mihatsch,2012-12-06 Vor die Therapie setzten die Gotter die Diagnose Otto Niigeji Renal biopsy has decisively enriched renal diagnostics Kidney diseases may be monitored during their entire course and new techniques such as immunofluorescence and electron microscopy may be systematically applied resulting in novel insights into the morphogenesis pathogenesis and etiology of kidney lesions These insights in turn have served as new starting points in the spirit of the quotation above for the institution of causal therapy by the clinician This work presents our findings based on 20 years of experience in evaluating renal biopsies As of the end of 1974 our computer supported systematic clinical morphologic and follow up evaluation of case material consisted of over 2000 biopsies including 679 examined by electron microscopy and 400 by immunofluorescence microscopy The subsequent 500 biopsies 400 studied by electron microscopy and 300 by immunofluorescence were considered qualitatively only In order to enhance qualitative findings with quantitative data it was necessary to devise new methods for quantifying electron microscopic findings Additionally we attempted to correlate cytologic and immunofluorescent observations to integrate the isolated findings of electron microscopy into a vital cytologic pattern of reactions We also attempted to evaluate the almost overwhelming flood of publications especially those appearing within the last 10 years The idea for this book was conceived a decade ago At that time however our own experience in renal biopsy diagnostics seemed insufficient to support such a major undertaking *Heptinstall's Pathology of the Kidney* J.
