Bouget,Pauline M. Prior,Jo Campling,2001-06-07 This book seeks to counter the recent trend of speculation about the impact of globalization upon welfare states It begins by asking two related questions What exactly is globalization How if at all has globalization been implicated in recent changes to European welfare states The book combines both theoretical and empirical analysis to provide a critical account of the relationship between globalization and change in European welfare states Firstly the key theoretical and conceptual debates are reviewed and the existing perspectives on globalization and welfare policy change are assessed The text moves on to explore and challenge the more apocalyptic economic perspectives on globalization and welfare that suggest permanent retrenchment The discussion includes an outline and assessment of the role of international organisations such as the World Bank and the EU All the major types of European national welfare system are considered Bismarkian Southern Central and Eastern European Nordic and Liberal Individual chapters outline recent welfare policy changes in the European countries of each system and the role of globalization in such changes This ground breaking text provides new empirical and theoretical perspectives on links between globalization and European welfare state change It will be important reading for students and academics in the fields of social policy politics international relations European studies and related fields Empirical Poverty Research in a Comparative Perspective

ECIC2014-Proceedings of the 6th European Conference on Intellectual Capital Dagmar Cagánová, Miloš Čambál, 2014-10-04

New Risks, New Welfare Peter Taylor-Gooby, 2004-11-11 This book introduces the concept of new social risks in welfare state studies and explains their relevance to the comparative understanding of social policy in Europe New social risks arise from shifts in the balance of work and family life as a direct result of the declining importance of the male breadwinner family changes in the labour market and the impact of globalization on national policy making They differ from the old social risks of the standard industrial life course which were concerned primarily with interruptions to income from sickness unemployment retirement and similar issues New social risks pose new challenges for the welfare policies of European countries such as the care of children and the elderly more equal opportunities the activation of labour markets and the management of needs that arise from welfare state reform and new opportunities for the coordination of policies at the EU level The book includes detailed and up to date case studies of policy development across these areas in the major European countries These studies written by leading experts are organized in a comparative framework which is followed throughout the book They highlight the way

in which national welfare state regimes and institutional arrangements shape policy making to meet new social risks A major feature of this volume is the analysis of developments at the EU level and their interaction with national policies The EU has been largely unsuccessful in its interventions in old social risk policy but appears to have more success in its attempts to coordinate policy for new social risks Experience here may provide lessons for future developments in EU policy making The comparative framework of the book seeks to inform an understanding of the development of new social risks in Europe and of the particular political opportunities and challenges that result It provides an original analysis of pressing issues at the forefront of European welfare policy debate and locates it at the heart of current theoretical debates
