Saskatchewan's Communities in the 21st Century Jack C. Stabler, Margaret Rose Olfert, University of Regina. Canadian Plains Research Center, 2002 This report traces the evolution of Saskatchewan's trade centre system for the 40 years between 1961-2001 For assessing/classifying communities into functional categories 68 variables are used In assessing a community's status/future prospects the systematic trade centre relationships the demand thresholds required to support trade/service activities and the impact of non-systematic events such as the establishment of a manufacturing plant or mine are taken into account The relationship between infrastructure/economic development is also discussed The events summarized emphasize a continuous extension of the geographic framework within which people journey to work/shop attend school obtain health care and in general live their everyday lives In this process the concept of community as a functional entity has evolved from village or town to a region large enough to satisfy the everyday requirements of rural dwellers

Targeting Regional Economic Development Stephan J. Goetz, Steven Deller, Tom Harris, 2009-03-25 Targeting regional economic development TRED has a long and rich tradition among academic economists and in the world of economic development practitioners This book builds on a series of workshops and papers organized by The Northeast Regional Center for Rural Development NERCRD at the Pennsylvania State University and the Rural Policy Research Centre RUPRI at the University of Missouri Through the coordinated efforts of NERCRD and RUPRI a network of university-based researchers and Extension education specialists was developed and provides the foundation of this new edited volume For the first time in a single book Goetz Deller and Harris present an innovative approach through a collection of chapters discussing industry targeting and the relevance of TRED as an important analytical tool for practical targeting purposes The papers present issues surrounding community economic development clusters in industry and rural

communities and the role of agglomeration economies The book provides the reader with insights into not only the theoretical foundations of targeting as well as empirical methods but also approaches for using the community level analysis to affect policy directions Our Energy Future Don Albrecht, 2014-07-25 Rapid changes in energy production and consumption are having major socioeconomic implications for the communities of rural America Technological developments in horizontal drilling hydraulic fracturing fracking nuclear energy biofuels wind and solar energy have significantly increased domestic energy production and the production of energy from renewable sources has encouraged energy efficiency Yet severe concerns persist and policy decisions on energy issues will have profound implications for all Americans and rural communities where consequences are experienced most directly Thus the time is appropriate for a careful exploration of the socioeconomic implications of our energy future The purpose of this book is to present timely and scientifically sound information on energy policy socioeconomic aspects of energy production and consumption with a focus on rural areas The book presents the latest research by top scholars with the goal of clarifying options and providing the basis for informed policy decisions Environmental Amenities and Regional Economic Development Todd L. Cherry, Dan Rickman, 2009-12-04 Rising U S income and wealth in recent decades have fueled an increase in consumption demand for environmental amenities Many observers and researchers have argued that this at least in part underlies current differentials in economic growth across regions This collection of key articles addresses the issues and more **Social Capital and Rural Development in the Knowledge Society** Hans Westlund, Kiyoshi Kobayashi, 2013-01-01 This book by Westlund and Kobayashi emphasises the fact that the gap between urban and rural areas is no longer relevant today all places and regions are under a strong influence from cities The authors show in a straightforward way that the continuum between more and less urbanized places requires new types of regulations based on innovation and local skills and that rural policies cannot be based on agriculture only but primarily require the mobilization of local social capital links Andr Torre INRA Agroparistech Paris France Rural communities are not all resource dependent and very low density places Not all have people leaving in droves and no newcomers This book s theoretical arguments and case studies from five countries help one understand better the diversity of rural We find population gainers population losers newcomers and long term stayers together in sizable towns Aboriginal communities where out migration is limited The diversity is a key dimension in the analyses of public and private action to build and maintain social capital Roger E Bolton Williams College US This amazingly surprising book takes the popular topic of social capital and provocatively examines the contemporary rural development issue New social capital driven thinking and insights are applied globally from a conceptual frame and locally with examples The way forward for both urban and rural development is achieved when the variables that define social capital are simultaneously balanced around focused development objectives Examples show how a multidimensional view of social capital enables meaningful rural development Roger R Stough George Mason University US Social capital is often considered a key factor for local development This book

analyzes the role of social capital for rural areas survival and development in the current age of metropolitan growth an era in which urban is the norm and where rural areas must adapt to this new situation and build innovative urban rural relations The traditional division between rural and urban is no longer valid in the knowledge society Instead of being a homogeneous unit based on primary sector production the countryside in the developed world increasingly consists of areas with very different development paths With examples from Europe Asia and America the book discusses building and renewal of rural social capital from both bottom up and top down perspectives and from the standpoint of business and both the public and private sectors Being the first book to treat social capital and rural development in the age of megacities and the knowledge economy it will be of great benefit to academics interested in social capital research and rural development The Rural-urban Fringe in Canada Kenneth B.
