hold negative attitudes towards mathematics and they are likely to opt out of elective mathematics courses which also affects their career opportunities. Although at the university level many students do not continue to study mathematics, social science students are confronted with the fact that their disciplines involve learning about statistics, another potential source of anxiety for students who are uncomfortable with dealing with numerical content. Research on mathematical anxiety is a truly interdisciplinary field with contributions from educational, developmental, cognitive, social, and neuroscience researchers. The current collection of papers demonstrates the diversity of the field, offering both new empirical contributions and reviews of existing studies. The contributors also outline future directions for this line of research.

**Distributed Leadership** Alma Harris, 2009-03-17. Alma Harris: The old of school leadership is currently preoccupied with the idea of distributed leadership. Few ideas it seems have provoked as much attention, debate, and controversy. Whatever your position on distributed leadership, you cannot fail to have one. It is irrefutable that distributed leadership has become the leadership idea of the moment. Yet it is an idea that can be traced back as far as the mid 20s and possibly earlier. So why the interest? Part of the answer can be found in a move away from theorizing and empirical enquiry focused on the single leader. This shift has undoubtedly been fuelled by structural changes within schools and across school systems that have resulted in alternative models or forms of leadership practice. Evidence highlights how those occupying formal leadership positions are increasingly recognizing the limitations of existing structural arrangements to secure organizational growth and transformation. Fullan et al 2007, Harris et al 2008, Chapman et al 2008. As a consequence, many heads and principals are actively restructuring, realigning, and redesigning leadership practice in their schools. Harris 2008. While the terminology to describe such changes varies, the core principle is one of extending or sharing leadership practice. While scholars have long argued for the need to move beyond those at the top of organizations in order to examine leadership, Barnard 1968, Katz and Kahn 1966, until relatively recently, much of the school leadership literature has

tended to focus upon the head or the principal *Politics and Divinization in Augustan Poetry* Bobby Xinyue, 2022 This book offers a new interpretation of one of the most prominent themes in Latin poetry the divinization of Augustus and argues that this theme functioned as a language of political science for the early Augustan poets as they tried to come to terms with Rome's transformation from Republic to Principate
