Saving The Planet How To Shape An Environmentally Stable Global Economy:

Saving the Planet Lester Russell Brown, Christopher Flavin, Sandra Postel, 1991 Describes an environmental research team's plan for a global economy *Biosphere 2000* Donald G. Kaufman, Cecilia M. Franz, 2000 **U.S. Policy and Latin America in the 1990s** Frances Scott, 1992 **Special Bibliography Series** United States Air Force Academy. Library, 195? **Consumers, Policy and the Environment** Klaus Günter Grunert, John Thøgersen, 2005-12-05 The role of the consumer has changed from seeking the most satisfaction from goods and services to reconciling consumption with active citizenship which links consumption to modern social issues such as environmental protection sound business ethics and fair working conditions Understanding consumers the way they buy products the way they relate to questions of environmental importance and the way they participate in public policy formulation processes is of vital importance to modern society In this book eminent researchers examine contemporary issues related to the field of consumers policy and the environment **The Environment in Anthropology** Nora Haenn, Richard Wilk, 2006 Presenting ecology and current environmental studies from an anthropological point of view this book gives readers a strong intellectual foundation as well as offering practical tools for solving environmental problems **Special Bibliography Series** , 1957 *Environment, Capitalism & Socialism* , 1999 Our planet is gripped by twin crises of the most fundamental nature social mass poverty austerity militarism etc and environmental In this document the Democratic Socialist Party argues that they spring from the same cause the capitalist system which places the ruthless pursuit of profit by the few before the needs of the vast majority of humanity Environment Capitalism and Socialism provides a comprehensive overview of the environmental crisis the various explanations advanced for it and the responses to it The document argues strongly for the need to build a mass popular movement to fight corporate planet wreckers and create a socialist order in which human beings will be in harmony with their environment Included here as an appendix is editor Dick Nichols thorough critique of so called green taxation often put forward as the answer to the crisis Provided by publisher *The Planetary Interest* Kennedy Graham, 2003-09-02 This text suggests that contemporary political and institutional arrangements for problem solving based on sovereignty as a principle and the nation state as a decision making unit are not equipped to handle such problems and that concepts and methods of decision making are therefore needed to augment existing ones in dealing with the challenges of the 21st century Kennedy Graham argues that henceforth the planet and humanity must be considered as a single entity for decision making purposes He introduces and develops the idea of the planetary interest as a vital conceptual tool to assist citizens and policy makers in understanding emerging global problems and approaching them with global solutions The book includes contributions from 20 current or former politicians who discuss the particular global problems threatening their countries looking at the ways in which the planetary interest can help them pursue a legitimate national interest **Global Transformations and World Futures - Volume I** Sohail Tahir Inayatullah, 2009-10-20 Global Transformations and World

Futures is a component of Encyclopedia of Development and Economic Sciences in the global Encyclopedia of Life Support Systems EOLSS which is an integrated compendium of twenty one Encyclopedias The Theme on Global Transformations and World Futures in two volumes deals with the diversity of points of view on this complex subject The chapters in these volumes are organized into three groups The first starts with chapters introducing the Global transformations in Knowledge Social and Cultural issues Issues such as the nature of global science the challenge of building real communities in a virtual world and the transition from an information economy to a communicative economy are explored The second presents the Global Economy The final group discusses the World Futures These two volumes are aimed at the following five major target audiences University and College students Educators Professional practitioners Research personnel and Policy analysts managers and decision makers and NGOs

Environmental Science 6e (paper) Daniel D. Chiras, 2013

Planning Sustainability Michael Kenny, James Meadowcroft, 2002-01-31

Environmental sustainability has become one of the most salient issues on the policy agenda of nation states This book argues that planning is seldom credited by advocates of environmental politics The authors leading scholars in the field explore the relationship between environmental sustainability one of the most important innovations in recent political discourse and planning an idea which has slipped from public attention recently

Leaders from the 1960s David De Leon, 1994-06-22

The throngs at Woodstock Jane Fonda in Hanoi I Have a Dream burning draft cards fire in the streets these images of the 1960s are still very much alive today What happened to the people and principles that dominated that decade Which leaders from those turbulent years had the most lasting effect on our lives today How well have the principles for which those leaders fought so strongly withstood the test of time This thought provoking biographical dictionary allows the reader to study the leaders both conservative and liberal their ideals and their enduring influence With major sections on racial democracy peace and freedom sexuality and gender the environment radical culture and visions of alternative societies *Leaders from the 1960s* includes entries on a wide selection of nationally prominent activists of the 1960s In addition to those who dominated only the sixties the volume includes earlier activists who came into prominence in the 1960s and activists of the era who came into prominence since the 1960s Each entry provides a biographical sketch but the focus of the entries is on the person's basic concepts or the essence of his or her work and the public response it generated Included are extensive bibliographies on the individuals and the period

Creating Sustainable Community Programs Mark R. Daniels, 2001-02-28

Public opinion polls consistently reveal the lack of confidence disillusionment and mistrust that citizens feel toward government Daniels and his contributors believe that the relationship between citizens and their governments can be changed by facilitating greater citizen collaboration with government particularly through local sustainable programs As the case studies show often sustainable community programs are created through grassroots movements that are initiated and managed by citizens themselves bringing them in contact with their local elected and appointed officials Unlike traditional programs that are administered by local officials on behalf

of their citizens once sustainable community programs are created citizens administer their own programs in collaboration with local officials The case studies look at a variety of sustainable programs primarily in the United States that help to deal with issues such as recycling transportation microcredit site redevelopment pollution health care and hunger Creating Sustainable Community Programs is the first book on sustainable programs that is intended for an audience of public administration scholars researchers and students as well as practitioners who are searching for ways to change the relationship between citizens and their governments

Unsafety Shigeo Atsugi, 2016-11-15 This is the first book to examine the linkages among natural and organizational accidents and disasters in the modern era and clarifies the mechanisms involved and the significance of emerging problems from the aging of vital infrastructure for the supply of water gas oil and electricity to the breakdown of pensions healthcare and other social systems The book demonstrates how we might check the underlying civilizational collapse and then explore translational systems approaches toward resilient management and policy for sustainability In *Unsafety* the author focuses on the kinds of unnatural disasters and organizational accidents that arise as repercussions of natural hazards Japan serves as an example where earthquakes tsunamis and typhoons are common with the Fukushima nuclear disaster as an outstanding case of this link between natural disasters and organizational accidents Natural and human made disasters happen worldwide and cause misery through loss of life destruction of livelihoods as in agriculture fisheries and the manufacturing industry and interruption of urban life *Unsafety* from a disaster in one place increases uncertainty elsewhere presenting urgent issues in all nations for individuals organizations regions and the state The author explains that one factor in the Fukushima catastrophe which followed in the wake of the earthquake and tsunami in 2011 was the latent deterioration and aging of systems at all levels from the physical to the social leading through a chain reaction to unsought and unforeseen consequences Here the aging of the nuclear reactor system the breakdown of safety management and inappropriate instructions from the regulatory authorities combined to create the three fold disaster in which technological organizational and governmental dysfunction have been diagnosed as reflecting a systems pathology infecting all levels

Ethics of Consumption David A. Crocker, Toby Linden, 2000-01-01 Scholars in diverse fields now agree on the importance of investigating the impact of consumption practices on the global environment quality of life and international justice In this comprehensive collection of essays most of which appear for the first time eminent scholars from many disciplines philosophy economics sociology political science demography theology history and social psychology examine the causes nature and consequences of present day consumption patterns in the United States and throughout the world Specifically the essays evaluate the impact of consumption practices on our own lives our institutions other people and the environment The contributors give explicit attention to the principles relevant for a consumption ethic as well as to the policies and practices that such an ethic permits or requires These engaging jargon free essays frame the problem of consumption in a variety of ways challenging readers to see the issue from new perspectives For scholars and students from

across the disciplines as well as for environmental and consumer activists this volume will serve as the touchstone for discussions of consumption and global stewardship

John A Collected Essays 1 John S Avery, 2016-02-06 This book contains a collection of essays and articles by John Scales Avery discussing the severe problems and challenges which the world faces during the 21st century Human civilization and the biosphere are threatened by catastrophic climate change Unless rapid steps are taken to replace fossil fuels by 100% renewable energy we risk passing a tipping point beyond which uncontrollable feedback loops could produce a 6th extinction event comparable to those observed in the geological record Another serious threat to human civilization and the biosphere is the danger of a catastrophic thermonuclear war Over a long period of time there is an ever increasing risk that such a war will occur by accident or miscalculation Thirdly there is threat of an extremely serious and widespread famine produced by the climate change rapidly growing populations and the end of the fossil fuel era We must urgently address all three challenges

Living is Risky Felix M Berardo, 2006-07 It has been suggested that the best hope for achieving a longer and healthier life lies in voluntary efforts derived from personal choices This means that individual change must be directed toward the modification of lifestyles and the choices associated with them Every lifestyle is a complex of related attitudes habits and other behaviors that in essence constitute a death style Each death style in turn carries with it various degrees of risk taking Our survival potential both in terms of quality and longevity is significantly enhanced or diminished by certain attitudes and habits and their associated risks This dimension of survivor education is a central focus of this book While it largely concentrates on individual culpability the societal context is also emphasized Indeed threats to our welfare often come from institutional or corporate activities that are beyond our control

Privileged Goods Jack P. Manno, 2019-05-30 What are the obstacles in the way of effectively solving the environmental crises of our time What can we do to overcome them These may be two of the most important questions heading into the 21st century Organized human societies have the ability to completely change the world While we have excelled at building destroying and rebuilding we have
