School Based Evaluation A Dialogue For School Improvement:

School-based Evaluation David Nevo, 1995 Presents a conceptual framework for school evaluation and evaluation methods that can be used within the framework of the school This work is based on concepts and ideas originally developed in the area of program evaluation and combining internal and external evaluation that provides a common ground for school evaluation

School-based Evaluation David Nevo, 2002-09-04 Divided into two parts this volume first discusses the concept of school based evaluation followed by a presentation of case studies of school evaluation from across the world In part one school based evaluation is examined from three perspectives school based evaluation as a dialogue between internal and external evaluation school evaluation from a perspective of institutional self evaluation in a democracy and issues of definition methods and implementation The second part of the book presents case studies from Norway England The Netherlands Austria Spain United States Canada Israel Scotland and Germany All of the case studies are based on actual experience with school based evaluation in various educational and social contexts Authors recognise the wide range of local constraints and reflect upon multiple evaluation perspectives describing their educational context evaluation perspective and specific school based experience They highlight difficulties encountered in their work discuss the implications and make recommendations for further development of the concept of school based evaluation and its practice *School Based Evaluation An International Perspective* does not suggest internal self school evaluation as an alternative to external objective evaluation However an attempt is made to advocate the combination of both for the benefit of school accountability and school improvement
