The Evolution of Teaching Rich Waters, 2014-10-08 The Evolution of Teaching invites teachers to rethink what teachers and schools do The need to rethink the role of teachers is driven by an abundance of data showing that teachers are increasingly unhappy with their work Most critically they feel a loss of control over their work and their profession as they witness teacher voices being marginalized by impersonal authorities outside of schools who dictate more and more of what teachers and schools must do The antidote to this condition is the evolution of teaching Teachers need to take charge and lead change They need to redefine teaching and schooling in such a way that it authentically supports student learning and teacher learning They must redefine it in a way that supports every teacher's desire to have a personal impact on students while having control over their own work stakeholder standing as respected professionals and a full career of professional growth As A Guidebook to the Advancement of Teaching Teacher Education and Happier Careers this text will assist teachers in reconceiving the profession of teaching in ways that will make it more personally satisfying while acknowledging that the work of teachers in the twenty first century must necessarily be different from what we have now legacy practices of standardization left over from the industrial age

Schlechty, 2011-01-11 Leading for Learning Written by acclaimed school reform advocate Phillip C Schlechty Leading for Learning offers educators the framework tools and processes they need to transform their schools from bureaucracies into dynamic learning organizations Schlechty explains how to move beyond some of the deeply ingrained and negative conceptions of schooling that guide so much of their practice He shows educators how they can take advantage of new learning technologies by increasing their organization's capacity to support continuous innovation Clearly not for the fainthearted Schlechty's engrossing appraisal of American education calls for a bold truly fundamental transformation of how we run our public schools Some books are thought provoking this one is action provoking W JAMES POPHAM professor emeritus UCLA Dr Schlechty has once again written an insightful book that educational leaders can use as a road map in transforming our schools into learning organizations designed to serve twenty first century students DR RANDY BRIDGES superintendent Alamance Burlington School System NC Because education is ultimately a community responsibility

Schlechty's proposal to shift school systems from bureaucracies to learning organizations can open doors to citizens who are frustrated by the bureaucracy in their efforts to reclaim their role in education. Garbology Edward Humes, 2013-03-05. A Pulitzer Prize winning journalist takes readers on a surprising tour of America's biggest export: our most prodigious product and our greatest legacy: our trash. The average American produces 102 tons of garbage across a lifetime and 50 billion in squandered riches are rolled to the curb each year. But our bins are just the starting point for a strange, impressive, mysterious, and costly journey that may also represent the greatest untapped opportunity of the century. In *Garbology*, Edward Humes investigates trash: what's in it, how much we pay for it, how we manage to create so much of it, and how some families, communities, and even nations are finding a way back from waste to discover a new kind of prosperity. Along the way, he introduces a collection of garbage denizens: unlike anyone you've ever met, the trash tracking detectives of MIT, the bulldozer driving sanitation workers building Los Angeles Garbage Mountain landfill, the artists residing in San Francisco's dump, and the family whose annual trash output fills not a dumpster or a trash can but a single mason jar. *Garbology* reveals not just what we throw away but who we are and where our society is headed. Waste is the one environmental and economic harm that ordinary working Americans have the power to change and prosper in the process. *Garbology* is raising awareness of trash consumption and is sparking community wide action through One City One Book programs around the country. It is becoming an increasingly popular addition to high school and college syllabi and is being adopted by many colleges and universities for First Year Experience programs.

Saving Schools Paul E. Peterson, 2010-07-30. In this book, Peterson interprets the history of American schools by placing major educational reformers in the context of their times and relates their thinking to our own era by scrutinizing the often unanticipated consequences of their commitments and ideas. These extraordinary individuals provided the critical ideas and articulated the ideals that motivated many others to search for ways to save the schools from the limitations in which they were embedded: Horace Mann, John Dewey, Martin Luther King, Al Shanker, William Bennett, and James S. Coleman. The drive to centralize was pervasive despite repeatedly expressed reform desire to customize education. Peterson argues that education has become an increasingly labor intensive industry that must reverse direction and become more capital intensive or it will descend in quality. Fortunately, technological change is making it possible to radically alter the way in which education services are delivered, providing a new chance to save our schools.
