Schooling And Disability:

Disability and Teaching Susan Gabel, David Connor, 2013-07-24 *Disability and Teaching* highlights issues of disability in K 12 schooling faced by teachers who are increasingly accountable for the achievement of all students regardless of the labels assigned to them. It is designed to engage prospective and practicing teachers in examining their personal theories and beliefs about disability and education. Part I offers four case studies dealing with issues such as inclusion over representation in special education, teacher assumptions and biases, and the struggles of novice teachers. These cases illustrate the need to understand disability and teaching within the contexts of school community and the broader society and in relation to other contemporary issues facing teachers. Each is followed by space for readers to write their own reactions and reflections. Educators dialogue about the case, space for readers' reactions to the educators' dialogue, a summary, and additional questions. Part II presents public arguments representing different views about the topic: conservative, liberal, progressive, and disability centered. Part III situates the authors' personal views within the growing field of Disability Studies in education and provides exercises for further reflection and a list of resources. *Disability and Teaching* is the 8th volume in the *Reflective Teaching and the Social Conditions of Schooling* Series edited by Daniel P. Liston and Kenneth M. Zeichner. This series of small, accessible, interactive texts introduces the notion of teacher reflection and develops it in relation to the social conditions of schooling. Each text focuses on a specific issue or content area in relation to teaching and follows the same format. Books in this series are appropriate for teacher education courses across the curriculum.

Disability & the Politics of Education Susan Lynn Gabel, Scot Danforth, 2008 *Disability and the Politics of Education: An International Reader* is a rich resource that deals comprehensively with the many aspects of the complex topic of disability studies in education. For nearly two decades, global attention has been given to education as a human right through global initiatives such as Education for All (EFA) and the Salamanca Statement. Yet, according to UNESCO, reaching the goals of EFA remains one of the most daunting challenges facing the global community. Today, millions of the world's disabled children cannot obtain a basic childhood education, particularly in countries with limited resources. Even in the wealthiest countries, many disabled children and youth are educationally segregated from the nondisabled, particularly if they are labeled with significant cognitive impairment. International agencies such as the United Nations and the World Bank have generated funds for educational development, but unfortunately, these funds are administered with the assumption that 'west is best,' thereby urging developing countries to mimic educational policies in the United States and the United Kingdom in order to prove their aid worthiness. This McDonaldization of education reproduces the labeling, resource allocation, and social dynamics long criticized in disability studies. The authors in this volume explore these subjects and other complexities of disability and the politics of education. In doing so, they demonstrate the importance and usefulness of international perspectives and comparative approaches.

Distinguishing Disability Colin Ong-Dean, 2009-08-01 Students in special education programs can have widely

divergent experiences For some special education amounts to a dumping ground where schools unload their problem students while for others it provides access to services and accommodations that drastically improve chances of succeeding in school and beyond Distinguishing Disability argues that this inequity in treatment is directly linked to the disparity in resources possessed by the students parents Since the mid 1970s federal law has empowered parents of public school children to intervene in virtually every aspect of the decision making involved in special education However Colin Ong Dean reveals that this power is generally available only to those parents with the money educational background and confidence needed to make effective claims about their children s disabilities and related needs Ong Dean documents this class divide by examining a wealth of evidence including historic rates of learning disability diagnosis court decisions and advice literature for parents of disabled children In an era of expanding special education enrollment Distinguishing Disability is a timely analysis of the way this expansion has created new kinds of inequality

Disability as Diversity in Higher Education

Eunyoung Kim, Katherine C. Aquino, 2017-02-03 Addressing disability not as a form of student impairment as it is typically perceived at the postsecondary level but rather as an important dimension of student diversity and identity this book explores how disability can be more effectively incorporated into college environments Chapters propose new perspectives empirical research and case studies to provide the necessary foundation for understanding the role of disability within campus climate and integrating students with disabilities into academic and social settings Contextualizing disability through the lens of intersectionality Disability as Diversity in Higher Education illustrates how higher education institutions can use policies and practices to enhance inclusion and student success

Who Benefits From Special Education? Ellen A.

Brantlinger, 2006-08-15 Who Benefits From Special Education Remediating Fixing Other People s Children addresses the negative consequences of labeling and separating education for students with disabilities the cultural biases inherent in the way that we view children s learning difficulties the social construction of disability the commercialization of special education and related issues The theme that unifies the chapters is that tension exists between professional ideology and practice and the wishes and expectations of the recipients of professional practice children adolescents and adults with disabilities and their families These voices have rarely taken center stage in formulating important decisions about the quality and characteristics of appropriate practice The dominant view in the field of special education has been that disability is a problem in certain children rather than an artifact that results from the general structure of schooling it does not take into consideration the voices of people with disabilities their families or their teachers Offering an alternative perspective this book deconstructs mainstream special education ideologies and highlights the personal perspectives of students families and front line professionals such as teachers and mental health personnel It is particularly relevant for special education disabilities studies graduate students and faculty and for readers in general education curriculum studies instruction theory and critical theory

Schooling and Disability

Douglas Biklen, Dianne Ferguson, 1989

How Did You Get Here?

Thomas Hehir, Laura A. Schifter, Wendy S. Harbour, 2015-03-01 When their children were young several parents interviewed in this book were told you can't expect much from your child. As they got older the kids themselves often heard the same thing that as children with disabilities academic success would be elusive if not impossible for them. *How Did You Get Here* clearly refutes these common destructive assumptions. It chronicles the educational experiences from early childhood through college of sixteen students with disabilities and their paths to personal and academic success at Harvard University. The book explores common themes in their lives including educational strategies, technologies, and undaunted intellectual ambitions, as well as the crucial roles played by parents, teachers, and other professionals. Above all, it provides a clear and candid account in the voices of the students themselves of what it takes to grapple effectively with the many challenges facing young people with disabilities. A compelling and practical book, *How Did You Get Here* offers clear accounts not only of the challenges and biases facing young disabled students but also of the opportunities they found and created on the way to academic and personal success.

Special Education James M. Kauffman, Daniel P. Hallahan, Paige C. Pullen, Jeanmarie Badar, 2018-05-30 *Special Education: What It Is and Why We Need It* provides a thorough examination of the basic concept of special education, a discussion of specific exceptionalities, and constructive responses to common criticisms of special education. Whether you're a teacher, school administrator, teacher educator, or simply interested in the topic, you will learn just what special education is, who gets it, or who should get it, and why it is necessary. The second edition of this brief yet powerful primer will help you build the foundation of a realistic, rational view of the basic assumptions and knowledge on which special education rests.

Righting Educational Wrongs Arlene Kanter, Beth Ferri, 2013-12-24 *Righting Educational Wrongs* brings together the work of scholars from the fields of disability studies in education and law to examine contemporary struggles around inclusion and access to education. Specifically, contributors examine policies and practices as they contribute to or undermine educational access for individuals with disabilities. Kanter and Ferri expand our understanding about the potential of legal studies to inform work around disability studies in education and vice versa. Contributors explore the intersections between disability studies, law, and education, forging a theoretical framework for thinking about educational access. Several essays take a critical look at some of the histories of exclusion in education and the ways that these exclusions have been upheld by a variety of educational policies and practices. Other essays reflect on how students with disabilities and their families experience the Individuals with Disabilities in Education Act. By bridging various disciplines, *Righting Educational Wrongs* offers new insights to allow us to better understand the multiple perspectives and voices within the field of disability studies.

New Directions in Special Education Thomas Hehir, 2005-11-01 A comprehensive study that is also practical and realistic, *New Directions in Special Education* outlines principles for decisionmaking about special education at every level, from the family to the classroom, school, and district, and for state and federal policy. With this volume, leading scholar and disability advocate Thomas Hehir opens a new round of

debate on the future of special education Extending the conceptual framework developed in his seminal 2002 article in the Harvard Educational Review *Eliminating Ableism in Education* Hehir examines the ways that cultural attitudes about disability systematically distort the education of children with special needs and uses this analysis to lay out a fresh approach to special education policy and practice Hehir traces the roots of ableism the pervasive devaluation of people with disabilities and shows how negative attitudes continue to shape debates in the field He assesses recent trends in special education policy particularly the shift of emphasis from compliance to outcomes and discusses in depth the successes and limitations of the inclusion movement He also investigates the impact of standards based reforms on children with disabilities and critically examines the promise of Universal Design for Learning
