Children of the Mill Ronald D. Cohen, 2014-05-01 Gary Indiana was founded in 1906 and was part of the US Steel Corporation s plan to build the world s largest steel mill The city s school system became world famous as a progressive educational experiment until the 1930s when a changing political and economic climate led to an erosion of the system which faced a serious overcrowding crisis in the 1950s Blending social and intellectual history Ronald Cohen examines the economic political and cultural context of the unique educational experience developed in this urban industrial center Cohen demonstrates that while various interest groups local as well as national helped mold educational policies and practices the Gary schools operated within the framework of corporate capitalism Despite their early experimental nature the Gary schools exemplified the rise of mass education in a multi racial multi ethnic class structure and urban setting

The Struggle for the History of Education Gary McCulloch,2011-02-25 The history of education is a contested field of study and has represented a site of struggle for the past century of its development It is highly relevant to an understanding of broader issues in history education and society and yet has often been regarded as being merely peripheral rather than central to them Over the years the history of education has passed through a number of approaches more recently engaging with a different areas such as curriculum teaching and gender although often losing sight of a common cause In this book McCulloch contextualizes the struggle for educational history explaining and making suggestions for the future on a number of topics including finding a set of common causes for the field as a whole engaging more effectively with social sciences and humanities while maintaining historical integrity forming a rationale of missions and goals for the field defining the overall content of the subject its priorities and agendas and reassessing the relevance of educational history to current educational and social issues Throughout this book the origins of unresolved debates and tensions about the nature of the field of history of education are discussed and key examples are analysed to present a new view of future development The Struggle for the History of Education demonstrates the key changes and continuities in the field and its relationship with education history and the social sciences over the past century It also reveals how the history of education can build on an enhanced sense of its own past and the common and integrating mission that makes it distinctive interesting and important for a wide range of scholars from different backgrounds *Schooling in Western Europe* Mary Jo Maynes,1985-06-30 Mary Jo Maynes looks to school reform in early modern Europe to show the relevance of early ideas about schooling for understanding contemporary society She presents the competing perspectives on issues such as the identity and motivations of school reformers the broad societal changes that made educational reform seem imperative toward the end of the eighteenth century all over the West the connections between educational change and economic development the role of schools in the evolution of class relations

the impact of reform on family strategies in the context of early industrialization The work concludes by assessing historical data on the social impact of school reform and addressing the social meaning of schooling in the past and in the present
