Coverage encompasses everything from early intervention and prevention to applications for high-risk adolescents. Exemplary programs are described for broad populations of EBD students as well as those with particular disorders including autism spectrum disorders and externalizing behavior problems. The book combines theory and research with practical information on how to select interventions and implement them with integrity.

Alternative Schools in British Columbia

1960-1975 Harley Rothstein, 2024-07-18 The tumultuous 1960s was an era of the counterculture, political activism, and resistance to authority. Conventions and values were challenged, and new approaches to education captured the imaginations of parents, teachers, and students. Reacting against the one-size-fits-all nature of the traditional public school system, groups of parents and teachers in Canada and the United States established alternative schools or free schools based on the Progressive child-centered philosophy of John Dewey and the Romantic ideas of Summerhill founder A. S. Neill. In *Alternative Schools in British Columbia 1960-1975*, Harley Rothstein tells the story of ten such schools that arose in the province of British Columbia. Drawing on 350 self-conducted interviews, newspaper articles, personal journals, and school records, Dr. Rothstein invites readers to experience the early days of alternative schools. He describes the educational philosophy, curriculum, and governance of these institutions and introduces readers to the people who were at the heart of alternative communities. Tracing the evolution, successes, and challenges of each school, he presents the day-to-day experience and brings to life the ethos of the 1960s era. Historians, educators, and all curious readers will become immersed in this engaging account of a group of educational pioneers on Canada's west coast and how they inspired the liberalization of the public school system that would come in the 1970s.

Place Randomized Trials Robert F. Boruch, 2005-05 The phrase "evidence-based policy" is frequently used, but it's crucial that such claims are scrutinized and validated. When the data on social and behavioral interventions are presented, high-quality evidence must be clearly defined, and the methodology behind such studies held to rigorous standards. Both the Cochrane Collaboration, focusing on healthcare, and the international Campbell Collaboration, concentrating on criminal justice, education, and social services, were created to develop, maintain, and improve detailed guidelines for producing high-quality systematic reviews. And both organizations emphasize randomized controlled trials to evaluate the effectiveness of various interventions. As a springboard from the Campbell Collaboration initiative and supported by the Rockefeller Foundation, this special issue of *The Annals* includes a thorough review of randomized tests across a variety of studies. Exploring significant dimensions of place-randomized trials, also called cluster-randomized trials or group-randomized trials, these papers shed light on recent efforts to enhance the quality of designing such trials, as well as on results reporting. The research topics included in this volume are diverse. Taken together, these papers offer important insight into the nuts and bolts of conducting randomized trials: the significance of place in trials, how such studies are initiated, the

incentives and justifications needed by participants how to overcome challenges of implementation and where to find out what studies have already been conducted or are currently underway While providing far reaching insight into the topic of randomized testing these papers also identify new issues and key questions to be further addressed in future research Scholars and policymakers alike will find this collection of rigorous research essential in understanding the implications of current evidence based policies as well as a guidepost for designing and conducting new studies Responding to Problem Behavior in Schools, Third Edition Leanne S.
