Science After Forty Osiris Ser Vol 7:

Stalinist Science Nikolai Krementsov, 1996-11-25 Some scholars have viewed the Soviet state and science as two monolithic entities with bureaucrats as oppressors and scientists as defenders of intellectual autonomy Based on previously unknown documents from the archives of state and Communist Party agencies and of numerous scientific institutions Stalinist Science shows that this picture is oversimplified Even the reinstated Science Department within the Central Committee was staffed by a leading geneticist and others sympathetic to conventional science In fact a symbiosis of state bureaucrats and scientists established a much more terrifying system of control over the scientific community than any critic of Soviet totalitarianism had feared Some scientists on the other hand developed more elaborate devices to avoid and exploit this control system than any advocate of academic freedom could have reasonably hoped Nikolai Krementsov argues that the model of Stalinist science already taking hold during the thirties was reversed by the need for inter Allied cooperation during World War II Science as a tool for winning the war and as a diplomatic and propaganda instrument began to enjoy higher status better funding and relative autonomy Even the reinstated Science Department within the Central Committee was staffed by a leading geneticist and others sympathetic to conventional science However the onset of the Cold War led to a campaign for eliminating such servility to the West Then the Western links that had benefited genetics and other sciences during the war and through 1946 became a liability and were used by Lysenko and others to turn back to the repressive past and to delegitimize whole research directions

The Alchemy of Conquest Ralph Bauer, 2019-10-08 The Age of the Discovery of the Americas was concurrent with the Age of Discovery in science In *The Alchemy of Conquest* Ralph Bauer explores the historical relationship between the two focusing on the connections between religion and science in the Spanish English and French literatures about the Americas during the early modern period As sailors conquerors travelers and missionaries were exploring new worlds and claiming ownership of them early modern men of science redefined what it means to discover something Bauer explores the role that the verbal conceptual and visual language of alchemy played in the literature of the discovery of the Americas and in the rise

of an early modern paradigm of discovery in both science and international law The book traces the intellectual and spiritual legacies of late medieval alchemists such as Roger Bacon Arnald of Villanova and Ramon Llull in the early modern literature of the conquest of America in texts written by authors such as Christopher Columbus Amerigo Vespucci Jos de Acosta Nicol s Monardes Walter Raleigh Thomas Harriot Francis Bacon and Alexander von Humboldt *Holocene Settlement of the Egyptian Sahara* Fred Wendorf,Romuald Schild,2013-11-11 by Fred Wendorf and Romuald Schild The Eastern Sahara is a fascinating place to study structures These larger more complex sites are almost prehistory Confronted with the stark reality of a hyper always in the lower parts of large basins most of which arid environment that receives no measurable rainfall were formed by deflation during the Late Pleistocene lacks vegetation and is seemingly without life it would hyper arid interval between about 65 000 and 13 000 seem to be an unlikely place to find a rich and complex years ago Their location near the floor of these basins mosaic of archaeological remains documenting past was influenced primarily by one factor water During human presence Despite this impression of a hostile wet phases runoff from extensive catchment areas environment there is widespread and abundant caused the development of large deep seasonal lakes archaeological evidence or playas in the lowermost parts of these basins This It is obvious that this area was not always a lifeless surface water would last for several weeks or months desert Faunal and plant remains found in the excavations after the seasonal rains and by digging wells after the at Holocene age settlements dating between 9500 and playa became dry water could still be obtained during 5000 radiocarbon years ago indicate that rainfall during most if not all of the dry season **Physics Briefs** ,1994 History. A World Without Women David F. Noble,2013-01-23 In this groundbreaking work of history David Noble examines the origins and implications of the masculine culture of Western science and technology He begins by asking why women have figure so little in the development of science and then proceeds in a fascinating and radical analysis to trace their absence to a deep rooted legacy of the male dominated Western religious community He shows how over the last thousand years science and the practice and institutions of higher learning were dominated by Christian clerics whose ascetic culture from the late

medieval period militated against the inclusion of women in scientific enterprise He further demonstrates how the attitudes that took hold then remained more or less intact through the Reformation and still subtly permeate our thinking despite the secularization of learning Noble also describes how during the first millennium and after women at times gained amazingly broad intellectual freedom and participated both in clerical activities and in scholarly pursuits But as Noble shows these episodic forays occurred only in the wake of anticlerical movements within the church and without He suggests finally an impulse toward defeminization at the core of the modern scientific and technological enterprise as it works to wrest from one half of humanity its part in production the Industrial Revolution's male appropriation of labor and reproduction the millennium-old quest for the artificial womb An important book that profoundly examines how the culture of Western Science came to be a world without women *Science, Politics and the Public Good* Nicolaas A. Rupke, 1988-06-18 An exploration of the relationship between scientific ideas technology government and politics demonstrated by examples from the last 150 years including the birth of the NHS the Channel Tunnel radiation protection the atomic bomb and power and nuclear power in the US and USSR
