Science And Belief In The Nuclear Age:

Science and Belief in the Nuclear Age Peter E. Hodgson, 2005 Written not just for experts but for the average Christian who wants to know how his faith has to do with modern cosmological and atomic theories Publisher **Nucleus** Scott Eastham, 1987 **Bulletin of the Atomic Scientists**, 1998-05 The Bulletin of the Atomic Scientists is the premier public resource on scientific and technological developments that impact global security Founded by Manhattan Project Scientists the Bulletin's iconic Doomsday Clock stimulates solutions for a safer world

Christianity: A Complete Introduction: Teach Yourself John Young, Greg Hoyland, 2016-07-14 An exciting engaging and intellectually serious book Dr Rowan Williams 104th Archbishop of Canterbury I think it's brilliant Bishop Stephen Cottrell How is it that a faith that began in 1st century Palestine with a handful of followers has become the largest movement the world has ever known Christianity A Complete Introduction traces the story of the Christian faith from sandals to cyberspace It describes the origins and key ideas of Christianity and gives an account of how it looks in the modern world Socially scientifically economically and politically Christianity today inhabits a very different world from that of Jesus of Nazareth and his early disciples Yet it seems to possess an inherent ability to survive and thrive in the face of great change It remains a compelling and powerful faith in the modern world with a rich and diverse heritage Whether you are preparing for an essay studying for an exam or simply want to expand your knowledge Christianity A Complete Introduction is your go to guide **Bulletin of the Atomic Scientists**, 1988-07 The Bulletin of the Atomic Scientists is the premier public resource on scientific and technological developments that impact global security Founded by Manhattan Project Scientists the Bulletin's iconic Doomsday Clock stimulates solutions for a safer world *Bulletin of the Atomic Scientists*, 1988-07 The Bulletin of the Atomic Scientists is the premier public resource on scientific and technological developments that impact global security Founded by Manhattan Project Scientists the Bulletin's iconic Doomsday Clock stimulates solutions for a safer world *Unlocking Divine Action* Michael J. Dodds, 2012-09-26 A penetrating study of how the discoveries of contemporary science resonate with the thought of Thomas Aquinas to open a deeper understanding of God's action in the world publisher website *Forty Years of Science and Religion* Neil Spurway, 2016-08-17 This book celebrates the fortieth anniversary of the UK's Science and Religion Forum by bringing together leading scientific and theological thinkers to reflect on the last four decades of the science theology conversation and to chart new directions for its future Through an engagement with some of the most recent developments in the sciences as diverse as quantum holism theories of emergence technology studies and the sociology of religion the book explores a broad range of pressing theological questions such as What is religion What does it mean to be human How can theology best respond to the ecological crisis In addressing these questions and many more the contributors to this volume forge innovative models for the interrelation of science and religion making this book a timely and valuable resource for all those interested in the future of the science theology conversation **Eden and the Individual** Emil Mihelich, 2006-07

Even more than we might realize the Garden of Eden story has supplied the foundation for Western civilization ever since the Roman Emperor Theodosius the Great granted the orthodox version of Christianity imperial support in the fourth century AD. Faced with the scientific and economic challenges of the 21st century however it's time to revisit our traditional understanding of our Christian heritage. St Augustine's monumental work *The City of God* built on his original sin interpretation of the Garden of Eden story traditionally defined the role of the responsible individual living within the resulting orthodox structure. But what is the role of such an individual living in an era that has witnessed the waning of the power and influence of that institutional authority the authority built on Augustine's persuasive interpretation of the events described in the Garden of Eden story. Without throwing the baby out with the bath water and by paying homage to Augustinian sacrifice and commitment to belief *Eden and the Individual Christianity for the 21st Century* explores that question. In the process it offers creative conclusions directed toward enhancing the meaning and value of individual lives. Given a fresh sense of purpose every individual can then work toward creating and preserving the order and structure that have governed collective Western life. In this awe inspiring chronicle indeed revelation of Christianity Misapplied Mr Mihelich courageously has given us a pearl to keep for ourselves. And we must Ben Swearson eBook Reviews Weekly

Epistemic Virtues in the Sciences and the Humanities Jeroen van Dongen, Herman Paul, 2017-12-07 This book explores how physicists astronomers chemists and historians in the late nineteenth and early twentieth centuries employed epistemic virtues such as accuracy objectivity and intellectual courage. In doing so it takes the first step in providing an integrated history of the sciences and humanities. It assists in addressing such questions as What kind of perspective would enable us to compare organic chemists in their labs with paleographers in the Vatican Archives or anthropologists on a field trip with mathematicians poring over their formulas. While the concept of epistemic virtues has previously been discussed primarily in the contexts of the history and philosophy of science this volume is the first to enlist the concept in bridging the gap between the histories of the sciences and the humanities. Chapters research whether epistemic virtues can serve as a tool to transcend the institutional disciplinary boundaries and thus help to attain a post disciplinary historiography of modern knowledge. Readers will gain a contextualization of epistemic virtues in time and space as the book shows that scholars themselves often spoke in terms of virtue and vice about their tasks and accomplishments. This collection of essays opens up new perspectives on questions discourses and practices shared across the disciplines even at a time when the neo Kantian distinction between sciences and humanities enjoyed its greatest authority. Scholars including historians of science and of the humanities intellectual historians virtue epistemologists and philosophers of science will all find this book of particular interest and value.
